### The Tortures of Rheumatism

are aggravated during climatic changes because the impure blood is incapable of resistance and ordinary treatment seems useless—but the fame of Scott's Emulsion for relieving rheumatism is based on logical principles and scientific facts. This oil-food promptly makes active, red, life-sustaining blood corpuscles and its body-building properties regulate the functions to expel poisonous acids.

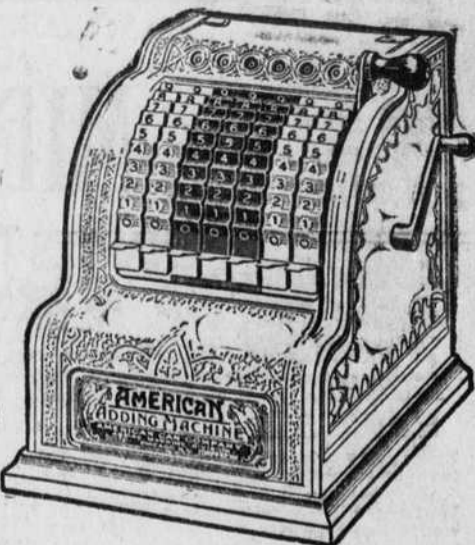

Scott's Emulsion, with careful diet for one month, will relieve the lame muscles and stiffened joints and subdue the unbearable sharp pains when other remedies fail.

Beware of alcoholic imitations and insist on the purity of SCOTT'S. AT ALL DRUGGISTS 13-82

## THE American Adding Machine

The latest Adder Costs but \$35

See our exhibit—ask for 10 day' trial

Here is a new price on a competent Adder. On a machine that is rapid, full-size and infallible.

The very latest machine, built by men who know, in one of the largest metal-working shops.

It is an individual Adder, to be placed on one's desk, close to one's books and papers. To take the place of the central machine requiring skillful operators.

It is also intended for offices and stores where costly machines are a luxury.

The price is due to utter simplicity and to our enormous output. Seven keys do all the work.

Each copied number is shown up for checking before the addition is made.

The machine will add, subtract and multiply. With very little practice anyone can compute a hundred figures a minute. And the machine never makes mistakes.

Countless offices, large and small, are getting from these machines the highest class of service.

Manufactured and Guaranteed by

**AMERICAN CAN COMPANY, CHICAGO**

Sold in O'Neill by J. W. HIBER.

**Norris & Monarch**

## -- Dispersion Sale --

# Pure Bred Red Polled Cattle

Sale to be held in Sale Barn in O'Neill, Neb., on

**Wed., March 4, 1914**

Hornless, or Polled Cattle, have existed in the counties of Suffolk and Norfolk, England, from time immemorial. John Kirby, who published the Suffolk Traveler in 1734, speaks of the butter produce in dairy districts as "the best and pleastentest in England." Arthur Young, in his "survey of Suffolk," published in 1794, mentions the breed and of the milk yield says: "There is hardly a dairy in our district that does not contain cows which gives eight gallons of milk a day and will give five gallons a day during the season. Many of these beasts fatten well. The flesh is of a very fine quality."

There seems little doubt that the Red Polled Cattle are the descendants of the old Muley Cows of Suffolk and Norfolk breeds. The first importation of Red Polled Cattle was made by G. F. Tabor of New York in 1873, one bull and three heifers. In 1875 four cows; in 1882 three bulls and twenty-two heifers and since then there has been different importations by other parties, so you see these are an old breed of cattle. The Polled Durham and Polled Hereford, Polled Holsteins and the Polled Jersey are a cross from the old muley cow, or descendants of the Red Polled Cattle. Can you dispute this by facts and figures? Come to my sale and buy an original Dehorner, a Red Polled Cow or Bull.
