VOLUME XXXV.

O'NEILL, NEBRASKA, THURSDAY NOVEMBER 12 1914.

NUMBER 22

## MR. DEPOSITOR:

We invite you to Deposit your funds in this bank for the reason that all depositors are protected by the Depositors' Guarantee Fund of the State of Nebraska.

That the Deposits are amply protected in State Banks was exemplified in the failure of the State Savings Bank of Superior, Nebraska, a few months ago. Shortly after the bank closed the depositors were paid in full, together with interest up to the time the bank suspended payment.

At the same time the First National Bank of Superior failed and up to this time the depositors have not received a cent, and prospects of ever receiving a substantial portion of their deposits are not very bright.

The harvest of the farmers and stockmen is now at hand and they will soon be disposing of their products and will want to deposit their surplus funds.

Kindly keep this bank in mind, as this is the only bank in O'Neill operating under the Guarantee Law of the State of Nebraska.

braska. Samples of blood were drawn from 130 animals, and five mares were found to be infected and six showed traces of the disease. A hurried meeting of the live stock sanitary board was called and all the stallion inspectors were instructed to draw blood from animals that might be suffering from the ailment. Railway agents have been instructed not to accept horses unaccompanied by a permit from stations in Grant, Hooker, Thomas, Blaine and Cherry counties.

So far no traces of the hoof and mouth disease have been detected. Several car loads of cattle however, were recently shipped from Chicago to western points and these are being watched. The South Omaha stock yards has been notified not to ship any stock to points where herds are infected. The states of Maryland, New York, Michigan, Indiana, Illinois, Ohio and Pennsylvania are quarantined for hoof and mouth disease. At South Bend, Ind., the live stock industry has been paralyzed.

Such symptoms as sore feet, sore mouth and extreme glistening slobber should be at once reported. Hoof and mouth disease is that most highly contagious disease known and is transmitted from animals to man by contact and from the milk of cows. Children, cats, dogs, rats and mice and all animals spread the contagion. In the regions affected the government men kill all the animals on the farm,

including the mice and rats, and fumigate the premises.

In Nebraska, according to an estimate of the secretary of the state board of agriculture, there are cattle valued at \$125,000,000, horses worth \$110,000,000 and swine and sheep worth \$85,000,000. Every precaution should be taken to guard and conserve this vast industry. The shortage of meat will increase the value of all live stock during the coming year and every safeguard should be thrown about the animals. Stockmen can assist by cooperating faithfully with the state and federal officials to keep Nebraska free from contagious diseases.

Clinton, Iowa, Advertiser: "The Virginian" was the attraction at the Clinton theatre last night and to say the company of players gave satisfaction is putting it mildly. The Clinton theatre goes who saw the production were pleased in every respect. "The Virginian" company is one of the best that has played the Clinton theatre this season. All parts were well played by an unusually strong cast, and the scenery was excellent. Comes to O'Neill on Saturday, November 14th.
