

CIRCLE TOURS OF THE PACIFIC COAST

In planning "The Perfect Coast Tour" or the "See America Tour," Scenic Colorado is of first importance. No coast tourist could afford to say that he had not included "Scenic Colorado" either one way or the other in this world's greatest journey. Go one way via Seattle, Portland, and during the season visit either Glacier or Yellowstone National Park. Link together these scenic routes with the Ocean Coast voyage between San Francisco and Portland.

Through the season, various publications, special folders and the like will be available, descriptive of the Burlington circuit rates and through service routes.

Aged People

sometimes forget that poor teeth and improper mastication prevent sufficient nourishment from ordinary food and burden the digestive organs, but if every man or woman past fifty would fully realize the bountiful, sustaining nourishment in **Scott's Emulsion** they would take it after every meal.

Scott's Emulsion contains the renowned body-building fats of pure cod liver oil, so medically predigested that it distributes energy, power and strength all thru the body and simplifies the stomach's work.

To people in declining years we say with unmistakable earnestness—**Scott's Emulsion** will add years to your life and life to your years.

is wearing and dangerous because the inflamed, mucus-filled tubes interfere with breathing and the fresh air passes through that unhealthy tissue.

Probably no other remedy affords such prompt and permanent relief as **Scott's Emulsion**; it checks the cough, heals the linings of the throat and bronchial tubes and strengthens the lungs to avert tuberculosis. This point cannot be emphasized too strongly—that **Scott's Emulsion** has been suppressing bronchitis for forty years and will help you.

To the Housewife.

Madam, if your husband is like most men he expects you to look after the health of yourself and children. Coughs and colds are the most common of the minor ailments and are most likely to lead to serious diseases. A child is much more likely to contract diphtheria or scarlet fever when it has a cold. If you will inquire into the merits of the various remedies that are recommended for coughs and colds, you will find that Chamberlain's Cough Remedy stands high in the estimation of people who use it. It is prompt and effectual, pleasant and safe to take, which are qualities to be desired when a medicine is intended for children. For sale by all dealers. 38-4

Mexican Troubles Cut Twine Supply. Norfolk News: Washington, March 19.—How seriously American wheat and other grain crops would have been effected had Gen. Carranza carried out his threat to close the port of Progreso, on the east coast of Mexico, is indicated by the department of agriculture's statement today.

The United States imports from Yucatan through the port of Progreso practically all of its sisal fibre used in making binder twine for harvesting wheat, etc., amounting in nominal years to 200,000,000 pounds. Had that port been closed, the supply of twine would have been cut off.

Already disturbances in Mexico have resulted in a shortage of fibre in this country. Between Jan. 1 and Feb. 28, only 67,489 bales of 350 pounds each were imported, compared with 156,659 in the same period last year.

The demand for twine, the department says, is certain to be greater than ever before if estimates for the biggest wheat crop ever produced are borne out. The cutting off of further supplies of twine would have resulted in the loss of a very large portion of the wheat crop.

Give Enough Virus. When vaccinating pigs by the simultaneous method it is important to give not only enough serum but enough virus. Where the dose of serum has been too small pigs may show symptoms of cholera in from 10 to 15 days. When too small a dose is given, some of the pigs will not have a permanent immunity, especially if from immune sows. As such pigs have usually inherited some measure of protection, it is better to double rather than pinch the prescribed dose of virus. It is not necessary that a pig show any effects of vaccination or to have even a rise in temperature in order to become permanently immune.—Department of Animal Pathology, University Farm.
