

## Prepare for Cold Weather

We are headquarters for the celebrated Buck's and Cole's Base Burners and Hot Blast Heaters. No better Stoves made. If you are in the market for a Stove be sure and see our stock before you buy.

Points of Merit in

### "Buck's" Base Burners

A non-competitive heating machine that is the most beautiful, best mounted, easiest controlled Base Burner in the world.

It is a specialty, because it has a double base; it is two stoves in one; a first-class Base Burner multiplied by two.

On account of the Double Base it has a hot air circulating flue system twice the size of any other Base Burner.

The double base and double size hot air circulating flue system produces the largest radiating surface ever put into any Base Burner.

This causes it to deliver double the heat with a given amount of fuel, or as much heat with half the fuel.

Features Which Are Found In All "Buck's" Base Burners—

Largest amount of direct radiating surface ever put into a stove of equal size.

All heat makes complete circuit of base, heating all corners equally.

Circle flue forces heat to all sides and corners of base flues.

Magazine has locked joints—prevents leakage of gas.

Fire pot almost as wide at bottom as at top giving large fire surface on grate.

Automatic cover under swing top fitted gas-tight.

Revolving fire pot allows for equal wear.

Extra long teeth on fire pot admit air freely and aid combustion.

Anti-clinker grate, with hollow duplex center, removes dead ashes.

Beveled shaking ring forces all ashes to duplex center.

All nickel parts ventilated, which prevents tarnishing.

Fire pot and ring can be removed in five minutes in the parlor.

Removable grates and grate frame.

Body construction such that all inside plates can be replaced without dismounting stove.

Clean-out for base flues, in front, for convenience.

All sizes made with extra large tea kettle attachment.

Symmetrical in appearance, elegant in design, finish and ornamentation.

Fairly sparkles with highly polished silver finish nickel.

No handsomer heater ever adorned a home.

Made in one grade only, and that the best.

Produces more heat for less money than any other stove in the world.

### Cole's Original Hot Blast Heater

WE OFFER YOU—A Heater in which the fire is not out from Fall until Spring. A Heater that gives even steady heat day and night. A Heater that will not puff and is the most easily kept clean. A Heater that will save you time and money in greatly reduced fuel bills. COLE'S ORIGINAL HOT BLAST is the only stove of any kind that has all these advantages. Decide now—Put this beautiful and economical Heater in your home today.

#### You Feed The Fire

Through the cleanest and most convenient feed door possible—no smokes, no soot, no spilling coal, less lifting.

This sanitary feed door is placed in the top of the stove, the same position as in all high priced base burners.

Add to this the advantage of less coal to lift and to carry, due to the guaranteed fuel-saving, and remember also that by this modern arrangement the powerful radiating surface of the sensitive steel body is not hampered or impaired by old-fashioned side doors, and you have the cleanest, handiest, and most economical stove on the market at any price.

#### No Puffing or Soot

In your house. This patented Anti-puffing device can be had only on Cole's Original Hot Blast heaters and is guaranteed to prevent puffing. This great boon to the housewife places our modern heater above all competition. If you have an eye for true comfort and economy you will place Cole's Original Hot Blast Heater in your home today.

#### The Guaranteed Fuel-Saving

And fire holding qualities are made possible by the Patented Air-Tight Lower Draft which makes an everlasting air-tight connection with the steel body which cannot be effected by the fiercest heat. This great feature makes our guaranteed air-tight construction possible and places this beautiful heater as the heating stove without a peer. Put one in your home now.

#### Think Of It

Use any fuel—this heater will hold fire perfectly and give all the heat available from hard coal, soft coal, crushed coke, wood and cobs, as well as from the cheapest grades of slack, lignite or siftings.

Every ton of soft coal is fully half gas. Stop the scandalous waste of this valuable fuel—it is entirely saved in Cole's Original Hot Blast, since our novel construction eliminates all but one or two joints and, owing to our Patented Construction, these can never be loosened and made to waste this fuel.

#### This Remarkable Heater

Uses less hard coal or coke, and requires less attention than any base burner made.

Ideal economy in burning hard coal and coke can only be had with a deep bed of coals. This is impossible in base burners owing to the very shallow fire pots used, but is realized in Cole's Original Hot Blast, since the entire stove is filled with hard coal or crushed coke to the extreme top of the inside cast lining, and the fuel is burned under perfect control at slow combustion. The heat from this large body of fuel is in direct contact with every square inch of the nearby sensitive steel radiating surface and radiates more heat at slow cherry-red combustion than other stoves at white hot rapid combustion.

Another reason for great economy is that Cole's Hot Blast has twice the positive radiating surface of a base burner with the same size fire pot. It is the safest and most powerful heater ever placed on the market for hard coal or crushed coke.

#### Unlike Other Stoves,

It does not require any change of fixtures to successfully burn different fuel. Wood, cobs, trash and even garbage can be burned with perfect success.

The large sensitive radiating surface responds quickly to a wood or cob fire and owing to the air-tight construction, the stove will hold fire over night and the fire is never out, unless from neglect. If the best is none too good for you, and you have an eye for economy, you will purchase this handsome heater for you home.

ALL TIRED OUT.

Hundreds More in O'Neill in the Same  
Plight.

Tired all the time;  
Weary and worn out night and day;  
Back aches; head aches,  
Your kidneys are probably weaken-  
ed.

You should help them at their work. Let one who knows tell you how. E. Bartling, Creighton, Neb., says: "I was so bad with my back that I couldn't get up without catching hold of something for support. At night I could hardly rest on account of a dull, nagging backache. I also had trouble with the kidney secretions, which at times were too frequent, then again scanty. I had headaches and dizzy spells and I was tired nearly all the time. Doan's Kidney Pills finally cured me. I have been free from kidney complaint since." Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that cured Mr. Bartling. Foster-Milburn Co., Props., Buffalo, N. Y.

### There is no after-glow

When you blow out a Safe Home match, it is OUT. And it stays out.

Every Safe Home match is chemically treated to prevent after-glow.

Safe Home matches are extra long and extra strong.

The extra length means extra service.

Safe Home matches are non-poisonous. They are safe to have in the home.

All grocers.  
5c a box.
