ATTACK TWO SHIPS; VILLA FLEES LOSSES NOT KNOWN

Steamer Sussex and Horse Boat Englishman Reported to Have Fallen Prey to Submarines -About 25 United States Subjects Said to Have Been on Board Channel Liner Which Has Been Towed Into Boulogne.

STATE DEPARTMENT IS INFORMED OF THE FACT

No Action Has Been Taken By This Government Yet, But a Critical Situation Has Been Produced By Latest Complications-Several Deaths Reported When Passenger Liner Was Blown Up In North Sea.

Washington, March 25 .- Destruction of the British steamer Englishman, with the possible loss of American lives and the explosion on the channel liner Sussex carrying American passengers, coming close on the alleged attack on the Patria and the sinking of the Tubantia, have served to unsettle the submarine situation again and raise possibilities of more complications with the central powers.

American Consul Armstrong's preliminary report received today from Bristol, that the Englishman was torpedoed, and that four Americans were missing from the rescued, presented the most serious aspect of the situation.

The fact that the missing Americans were workers on a horse ship and not passengers on a liner does not lessen the interest of the American government in the case. The circumstances are accentuated by the fact that the ship was bound away from Europe and carried no contrabrand. Further investigation of both the Englishman and Sussec cases will be made.

Paris, March 25 .- Reports of the damaging of the Sussex obtained here today state that she was torpedoed. The Sussex has arrived at Boulogne.

Congress Now Hopes to Adjourn Before National Conventions In June-Ten Bills on Slate.

Washington, D. C., March 27 .--- House lemocrats in caucus last night adopted a resolution outlining a plan for speeding up the administration legislative program with a view to adjournment before the national political conventions in June, as urged by President Wilson. They pledged themselves to coopera-

tion in earlier daily meetings and to such night sessions as may seem ad-visable. The plan is to handle at night sessions the business of all special days in the week, except the so called cal-endar Wednesday. It was also agreed that the tariff commission bill should ecome part of the general revenue measure

Before the resolution embodying the plan was adopted without dissent, Speaker Clark made a vigorous speech urging team work by the majority. He presented to the caucus a memoran-dum from President Wilson recom-

mending a legislative program. Wilson's Program.

Paris, March 25 .- Samuel F. Bemis, of Medford, Mass., a passenger of the Sussex, said today that he saw plainly and unmistakeably the wake of a torpedo coming toward the steamer.

London, March 25.-Twenty-five Americans were on board the Cross channel steamer Suscex, which met with disaster from a mine or subwith disaster from a mine or sub-marine yesterday afternoon. Two Americans are known to have been in-jured seriously by the explosion. They are Miss Elizabeth Baldwin, daughter of Prof. J. Mark Baldwin, a resident of Paris, and Wilder G. Penfield, of Hudson, Wis., a Rhodes scholar at Ox-for university. Whether any Americans were killed by the explosion or drowned has not been ascertained, but American pas-sengers say that a young American was standing at the point where the explo-sion occurred and could not be found

sion occurred and could not be found afterward.

While the loss of life was considerable, according to passengers, it is be-lieved the greatest sufferers were mem-bers of the crew.

London, March 25.—Information ob-tained from passengers of the channel steamship Sussex, damaged by an ex-plosion yesterday afternoon on the way from Folkestone to Dieppe, indicates there may have been a considerable loss of life. One American is missing and is supposed to have been lost. An-other was injured seriously. Several Americans were rescued. Opinion of passengers of the Sussex

Americans were rescued. Opinion of passengers of the Sussex is divided as to whether the vessel was the victim of a mine or torpedo. The explosion was terrific. It occurred just ahead of the captain's bridge and tore the front part of the steamer to pieces, killing or injuring a number of per-sons. Many were wounded severely by flying splinters.

Silence of General Pershing About Operations In Casas Grandes Region Is Profound Mystery.

CENSORSHIP IS RIGOROUS

Mexican Sources Declare That Outlaws Are at Bay, But Contain No Mention of U. S. Troops.

Queretaro, Mex., (via Mexic City), March 25.—General Car-ranza's reply to the latest note of the Washington government was handed today to James L. Rodgers, the American special representative here for transmission to-Washington. The reply agrees in the main to the American proposals but a few unimportant changes are suggested.

El Paso Tex., March 27.-Panche Villa was reported today to be fleeing west in the San Miguel country, having successfully eluded the encircling ring that was being drawn around him by American and Carranza troops. News of the outlaw's retreat westward was brought here from El Valle, but could not be confirmed at Fort Bliss, or in Mexican official circles. Several thousand American soldiers

Several thousand American soldlers are known to be ranging the country south of Casas Grandes in every direc-tion trying to locate the bandits, but have not come into contact with him.

Bandits Cut Wires.

Wire communication out of El Pase into Mexico, is still interrupted, and it is believed that roving bands of Villistas are responsible for the wire cutting having been detached from the main Villa command for that purpose. Mexi-Willa command for that purpose. Mexi-can Consul Garcia, was still without further word of the reported fight that the Carranzaistas soldiers had with Villa at El Oso south of Namiquipa. Dispatches received at Mexico City and Douglas, Ariz., apparently confirm the reports to El Paso from General Ber-tani in the field, that the troops of the defacto government had come into con-tact with Villa in the Santa Clara can-yon. General Pershing had made no mention of this battle and army offlmention of this battle and army offi-cers here incline to the belief that it was probably little more than an out post engagement.

Report Border Raid.

Report Border Kalo. Major Sample in command of the United States army base at Columbus has been asked to verify the report brought into Douglas, Ariz., that Villa bandits had crossed the border eight miles west of Columbus and murdered three Americans, two women and one man. The bandits, numbering 100 or more are said to have recrossed into Mexico after the killing. The presence of such a body of Villaistas in the up-per Galena district would be a threat to the line of communication to the base of the American expedition at Casas Grandes. Transportation over Casas Grandes. Transportation over this line from Columbus southward is troublesome, the trails being badly cut and the heaviest motor trucks negoti-ating the desert with difficulty.

Taking No Chances.

Juarez was quiet today and there was no surface indications that any trouble was impending. United States troops constantly guard the international bridges, power houses at El Paso and railroad tunnels, while General and Bell had a reserve in readiness to quell any uprising in Mexican quarters. Sheriff Edwards, of El Paso, was on

Nature's provisions for the comfort of mankind in seemingly inhospitable regions are sometimes well hidden and are found only after the scientist and the venturesome prospector have come where the temperature ranges from 32 degrees below zero in January to 105 degrees above zero in July, where the annual rainfall is less than six inches, and where timber is scarce, is not at-

Some years ago three wells drilled in a dome or upfold of the rocks near Basin, in Big Horn county, struck a strong flow of gas, and Greybull and Basin now have the distinction of being the only towns in Wyoming that

are supplied with natural gas. Field work done by United States geological survey parties has resulted in reports that show the position of the rock folds, and drilling has resulted in the discovery of oil. Fifty-two wells had been drilled near Basin up to last October and more than threefourths of them yielded oil or gas in commercial quantity.

In order to drill some of these wells, water had to be hauled in wagons from the river, miles away. Water suitable for domestic use was found in many of the wells.
