After having become a long recog-nized and accepted institution, the red flag of the guard at the railroad crossing has been found inadequate for the modern demands, and a movement to bring about its overthrow is well un-der way. In the light of recent deder way. In the light of recent de-mands and experiences, many criti-cisms of the railroad watchman and his red flag have developed. Some times he shook it in the air to warn pedes-trians and drivers of the approach of a train, and later he waved the same flag with much the same motion to beckon them to come on. Then again he was lost to view at the crossing at train time. The crossing men em-ployed on the Central railroad of New Jersey and the Long Island railroad are now supplied with metal hand signals with the word "Stop" painted on their surfaces in large letters. At night a double-faced lantern is used with the same legend in red letters across the surface of the glass.

That too much fat is a condition which neither the possessor of it nor his physician should ignore was asserted by Dr. Jacob Gutman, instructor in medicine, New York Post-Graduate Medical school and hospital, in an ad-dress before the New York Physicians' association. Excess of fat effects the heart by putting an extra burden on it; it augments the labor of the muscles of breathing, the diaphragm in particular; it interferes with the vital functions of the liver and other inter-nal organs, and by filling the inter-muscular spaces it compresses the muscular spaces muscle fibers, causing atrophy and degeneration.

The law school of the University of Pennsylvania hereafter will not confer a degree on any student whose moral conduct both in and out of the school is not absolutely unimpeachable. The university is, according to Provost Smith, the first large institution of learning in the east to take such a measure in an effort to elevate the standards of the legal profession and to prevent men of immoral character from becoming members of the bar.

An unusual exhibit produced in a law suit was that of a trolley car mounted on flat cars and shipped to the place of trial by the defendant, a Vir-ginia electric road. The plaintiff al-leged that he was injured by the trol-ley of the car falling on him. To dis-prove this charge the car in question was brought twice to the county seat where the case was being tried, that where the case was being tried, that the jury might see it.

In recent years valuable coal depos-its have been discovered in Spitzber-gen. The extent of the deposits ap-pears to be enormous. It is estimated after careful examination that two strata in the neighborhood of the flords between Advent bay and Green harbor contain more than 1,000,000,000 tons of coal. There appears to be also a third stratum in the same neighbor-

DEVERAL ASPIRANTS FOR VIELE'S STATE BOARD JOB

Lincoln, Neb., May 19.—Senator Phil Cohl, of Wayne, and Arthur Mullen, he latter the newly chosen national committeeman, are candidates for a place on the state normal board. Both were in the city today looking after the job. The term of A. H. Viele, of Norfolk, will expire next month, and the tip is out that he will not be reap-pointed. The gossip is that neither Kohl nor Mullen have a lookin at the place. The objection to Kohl is that he lives at Wayne, where one of the state normals is located, and the gover-nor wants to appoint somebody who lives at a town other than where a normal is located. The reason is that as there are four normals and four members constitute a majority of the board and the opportunity for a comfor a combine that will control is bright.

CHANCELLOR ANNOYED AT ENLARGEMENT OF CLASS SCRAPS

ENLARGEMENT OF CLASS SCRAPS Lincoln. Neb., May 20.—Nebraska seniors will not be guests of Chancel-lor and Mrs. Avery on the annual class picnic next year if any scrapping with lower classmen precedes. This was made plain by the chancellor in a statement made public. The infantile humor of the juniors has usually been displayed each year by a foray against the senior class, girl members being captured by girl juniors and boy by boys, the idea being to deprive them of the pleasure of attending the picnic. This year the seniors forestalled the juniors by capturing a number of juniors by capturing a number of juniors whom they designed taking with them to serve as waiters at the plenic. The resultant publicity and scrapping has so annoyed the chancellor that he now declares that he and Mrs. Avery will invite the seniors next year to a picnic, but that the event will not take place if any scrapping occurs before the train starts. He says: "We must insist that it is our party or we will withdraw from it entirely. Under such conditions the future senior classes will go as our guests, and any class scraps will be regarded as dis-courteous to the hosts."
