Obituary.
Henry G. Schmidt died at his home in this city last Sunday morning after an illness of several months of tuberculosis, at the age of 46 years, 3 months and 17 days.

Deceased was born near Dover, Minnesota, on June 28, 1870. For several years Mr. Schmidt was a resident of Ewing, moving to this city four years ago, where he followed his trade as a carpenter. About a year ago he was stricken with the malady that resulted in his death. Last spring he went to Wyoming in the hopes that a change of climate would be beneficial and later went to a sanitarium at Colorado Springs, but the disease had secured too firm a hold and no hope was held out for his recovery. A little over a week ago his brother, Frank, went to Colorado Springs and brought him home and he passed away surrounded by his loved ones.

When the Spanish-American war broke out Mr. Schmidt enlisted in the army and served in the Philippines from November 6, 1899, to March, 1901. Deceased leaves a wife, two daughters and two brothers, Frank G., of this city and Aaron F., of Ormsby, Minn., to mourn the death of a kind and loving husband, father and brother.

The remains were shipped to Benet, Neb., for interment and were accompanied by his wife and children and his brother, Frank.

The Frontier joins the friends of the family in extending sympathy to the bereaved ones in their hour of sorrow.

How Catarrh is Contracted.
Mothers are sometimes so thoughtless as to neglect the colds which their children contract. The inflammation of the mucus membrane, at first acute, becomes chronic and the child has chronic catarrh, a disease that is seldom cured and that may prove a life's burden. Many persons who have this loathsome disease will remember having had frequent colds at the time it was contracted. A little forethought, a bottle of Chamberlain's Cough Remedy judiciously used, and all this trouble might have been avoided. Obtainable everywhere.

Community Interests

The reasoning of many of the soundest thinkers of different eras has gone to prove that the welfare of the public at large is in many ways best served, directed or protected by a collective national or community force.

This is not a socialist doctrine or theory. It does not tend to detract from the results of competition and individual development in business and social life.

Public ownership of railways may or may not be desirable. Municipally controlled water, and lighting systems are successful features of many cities.

There is one great principle of community interest however that has been proven by a number of year's practice to be an unqualified success. That is the creation of Depositors' Guarantee Funds by several progressive States. In effect these laws are similar, and the Depositors' Guarantee Fund of Nebraska is a good example.

Each State Bank in Nebraska is required to make up its proportion of this fund which amounts to over a million dollars. Should a Nebraska State Bank fail now its depositors lose absolutely nothing. Why? Because from this guarantee fund a sufficient amount is drawn to make up the shortage in the insolvent bank's assets, thus fully reimbursing each depositor.

This is a form of community protection that stimulates individual progress.

DON'T BE SATISFIED!

The persons who are contented with their lot seldom better that lot. Be ambitious. Desire to be something better—a richer man or woman. Forge ahead and forge ahead and forge ahead. Begin an account here. Strain every nerve to add to it. Don't be contented with a small account here. Cut out every expense possible. Every dollar you save here makes you that much richer—that much better off.
