THE O'NEIL FRONTIER SNOW GREAT BENEFIT TO NEBRASKA WHEAT

Fall Seeding Was Badly In Need of Moisture-Snow of More Benefit Than Rain.

Lincoln, Neb., Oct. 23.—Grain men say that the four-inch snow which cov-ered nearly all of Nebraska as a result of Wednesday night's storm was the best thing that could have happened for the wheat crop. Wheat was beginning to need moisture, the usual fall rains having absented themselves from most of the state. Grain was already showing distress.

The snow is better than the rain because it will remain to soak into the ground, whereas a rain would have gone off largely in surface drainage.

MISSOURI PACIFIC REBELS ON STATE BOARD'S ORDER ON STATE BOARD'S ORDER
Lincoln, Neb., Oct. 23.—Now it is the Missouri Pacific railroad company that is showing its disregard for the feelings and orders of the state board of commissioners. The board recently issued an order to railroad companies requiring them to return to the originating line all system cars and foreign box cars received in switching. The order was necessary in order to prevent what is known as car stealing, but the Missouri Pacific has indicated that it intends to appeal to the supreme court from the order. The road is listed at the commission office as being the most requent offender in the matter of reloading cars after they have been emptied and sending them to other states, while not delivering cars to the roads that sent them. The order was issued to aid in breaking up the car shortage.

Teach Wives to Bake Bread. From the Chicago News.

Bread "like mother used to make" has become a reality in Chicago. In-creased prices of the baker's product sent housewives rushing to the demon-stration in home bread baking ar-ranged by the Women's Association of Commerce in Schiller hall, where rich brown loaves that brought back mempries of vine covered cottages and country dinners were turned out with remarkable swiftness and ease. It was the free school in baking of white, whole wheat and corn bread.

"This is our answer to the threatened increase in cost of bread, whatever may be its gause," said Miss Florence King, president of the association. "Home made bread that is baked right cannot be equaled anywhere. But make the bare become a ing bread in the home has become a lost art in the cities, and largely so in the small towns, because it has been so convenient to run around the corner to a store or bakery and buy a loaf for

a nickel.
"We have been trying for a long time to get housewives to return to the old custom of making their own bread, be-cause it is so much better, fresher and has that richness of flavor that cannot be duplicated in any wholesale bakery. The present movement to raise the prices gives us an opportunity to im-press upon housekeepers and home-makers the advantages and economy of making bread for the family in their ewn homes."
