

# WOMAN NOW IN PERFECT HEALTH

## What Came From Reading a Pinkham Advertisement

Paterson, N. J.—"I thank you for the Lydia E. Pinkham remedies as they have made me well and healthy. Some time ago I felt so run down, had pains in my back and side, was very irregular, tired, nervous, had such bad dreams, did not feel like eating and had short breath. I read your advertisement in the newspapers and decided to try a bottle of Lydia E. Pinkham's Vegetable Compound. It worked from the first bottle, so I took a second and a third, also a bottle of Lydia E. Pinkham's Blood Purifier, and now I am just as well as any other woman. I advise every woman, single or married, who is troubled with any of the aforesaid ailments, to try your wonderful Vegetable Compound and Blood Purifier and I am sure they will help her to get rid of her troubles as they did me."—

## LIMBS MADE OF CARDBOARD

Artificial Leg, invented by Danish Doctor, Enables Wearer to Walk Soon After Amputation.

A Danish doctor at a hospital in Paris has invented a cardboard leg which enables the wearer to go about without crutches two days after his limb has been amputated.

The materials used are two sheets of cardboard about three-sixteenth of an inch thick, and bandages soaked in a starch solution. After careful measurements have been taken the cardboard is cut into what looks like two peg-tops, which after being soaked in the bath fold round each other and are secured with bandages.

The principle is that of an egg in a cup, and the patient can wear the leg long before the wound is completely healed. He can thus get air and exercise, which it is usually impossible to obtain at this phase of his convalescence; also he has to suffer none of the inconveniences of crutches, a stick sufficing for his needs. The leg, properly treated, lasts from six months to a year, by which time a permanent artificial limb is ready to be fitted.

### Good Policy.

"I never interfere with other people's affairs."

## CUT KAISER OUT OF CHICAGO SPELLER

154 CHICAGO PUBLIC SCHOOL Grade Eight

### SPELLING—EIGHTH GRADE

December 19, 1910

Note: Dictate to the pupils the following text and the list of words below. The pupils will be marked on the words in italics and the words in the list.

#### THE KAISER IN THE MAKING

In the gymnasium at Cassel the German Kaiser spent three years of his boyhood, a diligent but not a brilliant pupil, ranking tenth among seventeen candidates for the university.

Many tales are told of this period of his life, and one of them, at least, is illuminating.

A professor, it is said, wishing to curry favor with his royal pupil, informed him overnight of the chapter in Greek that was to be made the subject of the next day's lesson.

The young prince did what many boys would not have done. As soon as the class room was opened on the following morning, he entered and wrote conspicuously on the blackboard the information that had been given him.

One may say unhesitatingly that a boy capable of such an action has the root of a fine character in him, possesses that chivalrous sense of fair play which is the nearest thing to a religion that may be looked for at that age, hates meanness and favoritism, and will wherever possible, expose them. There is in him a fundamental bent toward what is clean, manly and aboveboard.

#### The offensive page in the Chicago speller.

The Chicago school board has decided to eliminate forty pages from 70,000 spellers now in the hands of the board and have the books rebound. Among the pages is one eulogizing the German emperor entitled "Kaiser in the Making." He is compared with the greatest of modern men. There are 130,000 of the same spellers in the hands of the school children. The board refused to issue an order to teachers or children to tear the Kaiser out.

## KAISER AND CROWN PRINCE REVIEW PARADING TROOPS ON AISNE FRONT

The most recent picture of the Kaiser and his oldest son to come from abroad shows them marching between the lines of parading German troops in a recent inspection on the Aisne front, the scene of Germany's latest offensive.

## THIS ATTRACTIVE SHAPE WILL BE WORN QUITE A BIT IN THE FALL

#### A new model for fall bonnets.

Pretty hats for fall will interest you now if you wear ladies' headgear and one of the most interesting shapes is the wide one in the photograph. The hat shown is made of black velvet and has a feathered brim. It is worn with a large gold pin, the only decorative touch the hat requires. With this model in mind a clever girl might trim a wide hat to please herself.

#### The Kaiser's Rhetoric.

From the New York World. The Kaiser's flow of rhetoric never falls him in any emergency. But in the twin proclamations of August 1, his love of bombastic utterance played him a bad trick when he boasted of Germany's achievements in defending its colonies. Of its whole colonial empire only one small corner of German East Africa remains in German possession, and there a few German officers with a small force of natives are chiefly engaged in retreating from one place of refuge to another in the jungle.

the recent series of cool and snappy days have made us hanker for the crisp, colorful Indian summer, there has come a subtle change in birdland. The spring songs are gone and in their place are heard the first vocal attempts of the new generation and the more serious observations of the parents, doubtless somewhat worn with the task of raising their children.

The most noticeable change is the return of the bluebirds into public life, reinforced by new contingents of youngsters. In the spring these glorious creatures, largely by reason of their brilliant plumage, are the most prominent of all our songsters, excepting, perhaps, the robins; but after their homes have been established and their eggs hatched, little more is seen of them for weeks, even months.

## Crops on Wheels.

Bumper crops in New Jersey are being put on wheels and rolled right into the city markets, fresher and faster this year than ever before, and for the first time since the growing of perishable products became an extensive industry in the state, the farmers feel themselves to some degree independent of railroad schedules and freight rates.

Motor trucks have solved the problem of fast delivery for Jersey farmers. Hundreds of big cars, some of them with a carrying capacity of several tons, have been put on the roads between the farms and markets this season. Many of these auto trucks are owned by the farmers themselves, having been purchased to replace horses and market wagons.

#### The Reason.

"Let that man down easy."  
"Why should I?"  
"Because he's so hard up."

China's one mutual life insurance company last year paid \$800,000 in claims.

## The Great Need.

The Prince of Udine, head of the Italian commission, said at a luncheon in New York:

"The Germans need, above all things, a spiritual bath or cleansing. When I contemplate them I feel like the restaurateur."

"A restaurateur in the Galleria in Milan was waited on by a tramp who wanted work. The restaurateur, being short-handed, agreed to take the tramp on. But, heavens, he was dirty. 'I'll put you at the dish washing,' said the restaurateur, and then he took out a two-lira note. 'But, here, take this first, and go and get a bath.'"

"As the tramp, bowing and scraping, started off, the restaurateur called him back and said:

"There may be some change. In that event, take another bath."

## A Message to Mothers

YOU know the real human doctors right around in your neighborhood; the doctors made of flesh and blood just like you; the doctors with souls and hearts; those men who are responding to your call in the dead of night as readily as in the broad daylight; they are ready to tell you the good that Fletcher's Castoria has done, is doing and will do, from their experience and their love for children.

Fletcher's Castoria is nothing new. We are not asking you to try an experiment. We just want to impress upon you the importance of buying Fletcher's.

Your physician will tell you this, as he knows there are a number of imitations on the market, and he is particularly interested in the welfare of your baby.

Genuine Castoria always bears the signature of Dr. H. Fletcher.

## Canada's Liberal Offer of Wheat Land to Settlers

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

100 Acre Homesteads are actually free to settlers and other land sold at from \$15 to \$20 per acre. The great demand for Canadian Wheat will keep up the price. Where a farmer can get near \$2 for wheat and raise 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. #### The Potato Blessing.

Riding outside the city, one will not fail to see the wide expanse of potato plants growing luxuriously, and forthwith he indulges in anticipations of the golden plenty that is soon to be the good fortune of our people. But clouding these anticipations is a dark fear that the speculator will invade these premises and get nearly all these potatoes into his own hands and by some sort of restriction or limitations so work the prospects that he will be able to keep up the price and gather in the profits, says the Ohio State Journal. It would be a decided advantage to the public welfare if it could be so decreed that no producer should sell to a mere speculator. There is no oppression in that. Of course, it might stave off a little inconvenience, but it will pay in the end. Let us hope that the beautiful potato prospect will turn out a public blessing.

#### A Wise Provision.

The witty journalist was conversing with a friend about raising carp in ponds for food. The friend remarked that such a food supply would not be much in demand here, but that the Germans liked carp.

"Germans will eat anything," remarked the witty journalist, but immediately qualified his remark. "That is, when they can get anything to eat."

## HOW INSANITY HAS GAINED

Increase in United States Revealed by Census Taken by National Committee for Mental Hygiene.

Insanity in the United States is decidedly on the increase. This fact is revealed by reason of a census taken of the insane, feeble-minded, epileptics, inebriates and drug addicts by the National Committee for Mental Hygiene. Analysis of this census is found in the Mental Hygiene. It was compiled by Horatio M. Pollack, statistician of the New York State Hospital commission, and Edith M. Furbush, statistician of the National Committee for Mental Hygiene.

The federal census bureau estimates that the increase of population from April 15, 1910, to January 1, 1917, was 11.80 per cent. The same government agency found in 1910 that the number of insane in institutions was 187,791. The census taken in the present year revealed 234,055 insane persons in institutions. Thus the increase in the insane in institutions during the corresponding period was 24.84 per cent, a growth more than double that of the general population.

Moreover, the rate of increase of the insane in institutions was relatively greater than that of the general population in every state except Arizona, Kansas, Mississippi, Nevada and South Carolina. Illinois is one of the states in which the disparity between growth of population and increase in insanity has been greatest. In this state the population increase was 9.84 per cent, as compared with a percentage of increase of insane in institutions of 27.38. The neighboring state of Indiana shows an even greater disparity, with percentages of 4.64 and 27.44 respectively.

#### Not What He Said.

A recently commissioned second lieutenant was drilling his command in an Indianapolis street.

Something went wrong and the soldiers found themselves trying to march over a six-foot fence.

The lieutenant halted the company and said:
