Entered at the post office at O'Neill, Nebraska, as second class matter.

ADVERTISING RATES:

Display advertising on Pages 4, 5 and 8 are charged for on a basis of 50 cents an inch (one column width) per month; on Page 1 the charge is \$1.00 an inch per month. Local advertisements, 5 cents per line, each insertion.

Every subscription is regarded as an open account. The names of subscribers will be instantly removed from our mailing list at expiration of time paid for, if publisher shall be notified; otherwise the subscription remains in force at the designated subscription price. Every subscriber must understand that these conditions are made a part of the contract between publisher and subscriber.

No Hard Coal This Winter.

Nebraska will not receive any hard coal this winter, according to information received by the chairman of the County Federal Fuel Committee from John L. Kennedy, Federal Fuel Administrator for Nebraska. Following is a copy of the letter received from Mr. Kennedy:

TO ALL COUNTY CHAIRMEN:

"The United States Fuel Administration has determined the allotments of anthracite coal for domestic use to the various states for the twelve months ending March 31, 1919, and

has found it necessary to cut off entirely shipments to Nebraska.

"The transportation situation is such that anthracite coal is the only domestic fuel available to New England, Eastern New York state, Pennsylvania, and New Jersey and, with the materially greater needs due to the large increases in population, as a result of essential war industrial work, it has been necessary in order to take care of the minimum needs of the section mentioned, to exclude anthracite from the trans-Mississippi territory.

"This necessity is sincerely regretted by the Administration but it is felt that the wants of Nebraska can be met with other fuels and that, while inconvenience and discomfort may result, the people of our state will loyally abide by this decision as an absolutely necessary war measure. The National Administration promises that steps will be taken to provide for domestic consumption a sufficient amount of bituminous coal to make good the deficiency in anthracite.

"The above order permitted only anthracite that was actually in transit at the time the order was made to come through.

Yours very truly,

JOHN L. KENNEDY,
Federal Fuel Administrator for Nebraska.

Earley-Coyne.

Married, at the Catholic church in this city last Wednesday morning, James Earley and Miss Anna L. Coyne, Rev. M. F. Cassidy officiating, in the presence of a few of the immediate relatives and friends of the contracting parties.

After the ceremony the wedding breakfast was served at the Golden Hotel and shortly thereafter Mr. and Mrs. Earley left in a car for North Bend, Neb., where they will spend a couple of days with relatives and will then go on an extended wedding trip to Salt Lake City and Yellowstone Park. After their return they will make their home upon the farm of the groom northwest of this city.

The bride is the daughter of Mrs. T. Coyne of this city and was born and raised in this community. She is a charming young lady who possesses the happy faculty of winning and retaining friends.

The groom is the son of Mr. and Mrs. James Earley, who are also pioneer residents of this county. He is a young man of energy and thrift and is one of our most successful young farmers and stockmen.

The Frontier joins the many friends of this happy young couple in wishing them many years of happiness and bliss.

NON-REGISTERED NURSES ARE NO LONGER BARRED.

The need of Red Cross nurses for the army and navy is so urgent that the doors have been opened to graduate nurses who have not been registered with their state boards. Miss Jane Delano, Director of Nursing Service, says:

"The present situation at the front makes it imperative that we hasten the enrollment of competent nurses for the armed forces in every way possible."

The campaign is now under full headway all over the country. It took the smaller chapters longer to organize and get started, but some of them covered the ground quicker than the cities.

No comprehensive report is to be had this early, but scattered messages show that the Red Cross chapters are enlisting every nurse possible. Here are a few early reports:

Ludington, Mich., reports that every nurse in Mason county has enlisted.

"One hundred and fifty-four nurses enrolled, and we are only beginning" wired Detroit.

Waterloo, Iowa, enrolled eleven the first two days of the campaign, and reports "the campaign still going vigorously."

Agatha Hospital at Clinton, Iowa, enrolled three nurses the first day, and pledged three others to go July 1, and three more on July 31.

Chicago is getting a splendid response from its nurses. The whole graduating class of the Michael Reese hospital has enlisted, and 100 per cent has been forecast by St. Luke's.

Country places are asked by the Red Cross not only to give up all the nurses they possibly can, but to aid young women to enter training schools and make all haste to supply the shortage of nurses which faces the country in years to come.

As a stimulus to the whole Central Division, the Red Cross arranged a great parade of nurses on Saturday, June 15, in Chicago. Nurses returned from overseas service, nurses who have enrolled, the graduating classes and undergraduates of all schools, and nurses from outside schools, all were asked to march in full uniform. The Jackie Band from Great Lakes Naval Training Station, and various military bands, were called on to lead them.

The nurses will go without hesitation; it is the whole American people who must help them to go, and provide other patriotic young women to take their places.

EVERY STREET IN O'NEILL

Has Its Share of the Proof That Kidney Sufferers Seek.

Backache? Kidneys weak? Distressed with urinary ills? Want a reliable kidney remedy? Don't have to look far. Use what O'Neill people recommend. Every street in O'Neill has its cases.

Here's one O'Neill man's experience.

Let Harry Bowen tell it. He says: "Whenever anyone asks me about a kidney medicine I recommend Doan's Kidney Pills for I have used them. I get some at Gilligan & Stout's Drug Store, whenever my kidneys start acting irregularly and my back feels lame. They always relieve the heavy ache and other symptoms and prevent more serious trouble by putting my kidneys in good condition."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Bowen had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

WEEKLY WAR NEWS DIGEST.

Repair of Clothing at Army Camps Saves New Equipment

Through the operation of repair shops for clothing and other articles, a considerable saving in reissue of new equipment has been made at Army camps. One camp quartermaster estimates the issue of new clothing has decreased one-third, and of shoes 40 per cent.

At a base repair shop for clothing an average of 2,831 garments were repaired daily during the first 18 days of May. In addition to the work done at base repair shops, many thousands of garments are repaired at camp shops, one shop being located at each large camp.

During April nearly 170,000 pairs of shoes were repaired in Army repair shops. At present practically all hat repairing is done by contract, the price varying from 50 to 90 cents per hat.

This work is in charge of the Conservation and Reclamation Division of the Quartermaster Corps, which has been in operation only during the last four months.

More Railway Engineers to go to France

When the 5 new regiments and 19 battalions of railway engineers now being organized are put on duty there will be 50,000 Americans engaged in railroad construction and operation in France.

After the United States entered the war one of the first requests transmitted to this Government by the French mission was for assistance in strengthening the French railways. Nine regiments of railway engineers, whose organization was started before Gen. Pershing sailed, were in France by August, 1917. Six of them have been engaged in construction work, building and rebuilding railways, building docks, and arranging terminal facilities. The other three regiments have been engaged in operation, and some of the railway troops have been on the fighting line. The additional troops will be used partly for construction and maintenance and partly for operation.

A total of \$160,000,000 has been spent on railway materials alone. Included in the purchases are 1,727 locomotives, 22,630 freight cars, and 359,000 tons of steel rails.

Colored Registrants to Be Given Technical Training

Nearly 157,000 Negro soldiers are now in the National Army. Of these 1,000 are line officers holding commissions of captain and first and second lieutenants. There are about 250 colored officers in the Medical and Dental Reserve Corps.

The Army now includes two divisions of colored troops, which when fully constituted will include practically all branches of the service: Infantry, Engineer, Artillery, Signal Corps, Medical Corps, and service battalions with men technically trained in all branches of scientific work.

There are now openings in the Veterinary Corps for Negroes skilled in veterinary and agricultural work. Arrangements have been completed to send Negroes registered but not yet called to schools and colleges this summer for training in radio engineering, electrical engineering, auto mechanics, blacksmithing, and the operation of motor vehicles.

Children's Bureau Finds Many Babies Suffering from Lack of Food

Reports are reaching the Children's Bureau of the Department of Labor from the hundreds and thousands of women who during the last 60 days have been weighing 5,000,000 children of American, and the way in which permanent poverty menaces the healthy growth of the children of the Nation is being revealed as a result of the weighing and measuring campaign.

Workers have been so much aroused by the conditions revealed that they request information regarding follow-up work. Many of the families are described as being pitifully poor. One mother had a new baby wasting away for want of milk.

The mother was told to drink one quart of milk a day herself and to give one quart a day to each of her six children. Milk is 16 cents a quart and the family income \$15 a week. The woman writing to the Children's Bureau said they did not know how to solve the problem.

The Children's Bureau has been compelled to reply to such reports that Federal appropriations are available only for the families of men actually in the military or naval service.

Incomplete returns from 25 States show that nearly 3,400,000 women have registered for war work under the Woman's Committee of the Council of National Defense.

The 12-cylinder Liberty motor, according to a statement by the War Department, weighs 825 pounds and develops 450 horsepower, or a weight of 1.8-pounds per horsepower. The gasoline consumption is approximately 0.46 pound per horsepower hour.

The standardized "type B" truck has been officially adopted as the standard heavy-duty cargo truck for use by the Army in all its departments requiring this capacity truck. A large number have been ordered and it is expected the first 10,000 will be completed about August 1, 1918.

There is no discrimination of any kind between soldiers who are not citizens of the United States and the native born or naturalized citizens in the American Army, excepting that the former can not hold commissions. In all other respects—care, attention, privileges, etc.—they are all on the same footing.

The Food Administration is making a careful survey of the national ice situation in order that it may be prepared to meet any sudden shortage in particular communities. The destruction of ice plants by fire, breakdown of machinery, or the exigency of weather may at any time cause a serious shortage.

Next to the aggregate number of subscribers, perhaps the most striking feature of the third Liberty loan was the support given it by the farming and rural populations of the country, according to a statement by the Treasury Department. Not only did the farmers purchase liberally of the bonds, but the rural communities as a rule were more prompt in completing their quotas of the loan than the large cities. More than \$20,000 communities in the United States subscribed or oversubscribed their quotas, many of them on the first day of the campaign. The majority of these were not cities, but country districts.

GOVERNMENT SALARIES FOR STENOGRAPHERS

Washington, D. C., June 17, 1918.—The United States Civil Service Commission announces that through some misunderstanding an impression seems to prevail that the Government has raised the usual entrance salary for stenographers and typists in the departments at Washington, D. C., to \$1,400 a year. The Commission states that there has been no change in initial salaries for positions of this kind; the usual salaries at the beginning range from \$1,000 to \$1,200 a year, appointments at \$1,200 being in the minority. The War Department makes all appointments to such positions at not less than \$1,100 a year, and agrees to promote to \$1,200 a year after three months' satisfactory service. Appointments at salaries higher than \$1,200 a year are rare, and the appointees must possess exceptional qualifications.

There is still great need for stenographers and typists in the Government offices at Washington. Those who have had considerable office experience are most desired. The Civil Service Commission urges qualified persons to offer their services to the Government. Full information may be obtained from the representative of the Civil Service Commission at the post office in any city.

Snapped Off.

"Bloggs doesn't seem to have much snap in him any more."
"No; he used to have so much snap in him that now he's broke."—Answers.

All Depends.
"A primrose by the river's brim, a yellow primrose was to him, and it was nothing more." What does that line mean?
"Well, it means that to a poet a primrose is something to throw a fit over, while to a botanist it is a specimen of the primula vulgaris or grandiflora."

Home Hints.
For young housewives, a bit of dope—
Don't wash the beets with scented soap.

Pharmaceutical Supplies.
"I suppose you'd get rich if you
