ANOTHER DESTRUCTIVE FIRE

A Fire Early This Morning Causes a Property Loss of Over \$30,000.00.

Fire, of unknown origin, destroyed over \$30,000.00 worth of property in this city at an early hour this morning. Seth Noble, dealer in lumber and coal, the Bazelman Lumber Co., and H. M. Uttley were the heaviest losers. The office, front sheds, including the coal, cement, sash and door and paint sheds were totally destroyed and their contents burned. The rear yard and its contents were saved. Mr. Agnes, manager, estimates their loss at \$25,000.00. They carried \$20,000.00 insurance on the entire yard, but at least two-thirds of their stock was in the front yard, where they kept all their finishing lumber, sash, doors, paint, etc.

The building just north of the yard, occupied by Lewis Chapman, county attorney, and owned by the Bazelman Lumber Co., was also destroyed. The building was valued at \$2,200 and was insured for \$1,500. Mr. Chapman and Frank Lancaster, county agent, who officed with Mr. Chapman, succeeded in getting out their books and office furniture. H. M. Uttley lived upstairs and he only succeeded in getting out only a very little of their furniture. He also lost his law library, which was one of the best in this section. Mr. Uttley valued the library at \$3,000 and the furniture at \$1,000, so that he was a \$4,000 sufferer by the fire. He carried no insurance.

John Melvin, whose grocery store is in the Golden block just south of the lumber yard, suffered a loss from

smoke. The fire destroyed the window sashes and windows, but was kept from the interior of the building. His loss is covered by insurance. Mr. Golden also suffered a small loss on the building.

The Nebraska Telephone Company was also a sufferer from the fire and the system has been put out of business. The terminal cable box was on a pole on the corner near the lumber yard and it was destroyed by fire, thus putting the entire exchange out of commission. Local employees say that it will probably be a week before the damage is repaired.

The Electric Light company was also put out of business for the day, as one of their main lead wires ran through the alley south of the lumber yard. They spent all day Thursday making repairs and had the juice turned on at 8:30 Thursday evening. The fire was discovered at 5:45 by Burlington employees while on their way to work. By the time the alarm was given and the fire department on the scene the fire had gained such headway, that for a time, it looked as if the entire block would go up in flames, but the department managed to confine it to the lumber yard and the building adjacent thereto on the north.

The origin of the fire is a mystery. Those first on the scene say that the fire appeared to be on the north side, back from the front of the building. The paint shed was on the north side and if it started there it might have been caused by spontaneous combustion. But some of those who seen it early say that it was about thirty feet back from the front, which would be among the
