AUTO LICENSE MONEY USED ON COUNTY ROADS.

Objection has been raised by several of our citizens to the new automobile law, because they are of the opinion that the seventy-five per cent that is sent to the State Treasurer is not spent upon the roads in this county. In this they are in error. All of the money paid as automobile licenses in this county will be spent upon the roads in the county. The twenty-five

per cent that is retained here by the county treasurer is to "be used by the county board for road dragging, and equipment for road dragging, for strawing, claying or stable littering the roads and for no other purpose." The money that is sent to the state treasurer, that is the seventy-five per cent of the automobile license money, is placed in the State Highway Fund to the credit of this county and will be used on the roads in this county and in no other. The only difference is

that the money sent to the state will be spent upon the roads in the county under the supervision of the State Engineer for the maintenance and building of the roads in the county.

The sections of the statute covering this, taken from House Roll No. 299 passed at the last session of the legislature, are as follows:

Section 16. All registration fees provided for in this act shall be paid to the county treasurer of the county in which the applicant for registration resides, and such treasurer shall credit twenty-five per cent of all fees so paid to the road dragging fund of the county and it shall be used by the county board of said county for road dragging, and equipment for road dragging, for strawing, claying or stable littering the roads and for no other purpose. The county treasurer shall immediately transmit the remaining sum of any registration fees so collected by him to the state treasurer to be placed in a fund to be known as the "State Highway Fund," and all money remaining in the motor vehicle fund on March 31, 1919, and all money paid into said fund after March 31, 1919, shall be immediately transferred to the State Highway Fund. The state treasurer and state auditor shall each keep in his books, a separate account with each county showing the amount received and the amount expended therefrom under this act.

Section 18. Said State Highway Fund shall be used on the State Highway system in such manner that each county shall receive the benefit of all money paid into said fund from such county, and there is hereby appropriated to be expended as provided by law under direction of the State Board of Irrigation Highways and Drainage, for and during the biennium, ending March 31, 1921, all the money now in the State Highway Fund or that may come into said fund at any time during the said biennium, and immediately after the taking effect of this act, the secretary of state shall transfer to the State Board of Irrigation Highways and Drainage, all records, books, blanks, reports, motor vehicle numbers, and all other appurtenances and property pertaining to motor vehicles.

Telephone Company To Increase Rates
Patrons of the Nebraska Telephone company will be called upon to pay an increased rate for their telephones, commencing June 1, that will amount to an increase of about thirty-seven and a half per cent over that paid one year ago. The company made application to the State Commission last fall for an increase of about twenty

per cent. Last fall they increased rates ten per cent and now the increase they are putting on their patrons here will amount to an increase of twenty-five per cent. If Burilson continues to have control of the telephone system much longer the rates will become so high that the average customer will be unable to continue to use them.

The new rates for O'Neill, that go into effect the first day of June, are as follows:

Residence, one party	\$1.75
Residence, two party	1.50
Business, one party	2.75
Business, two party	2.25

The rates charged since the increase in phone rates last fall is as follows:

Business phone	\$2.20
Residence phone	1.38

How He Looked At It.

"Papa," said a small boy to his parent the other day, "are not sailors very, very small men?"

"No, my dear," answered the father. "Pray, what led you to suppose that they are so small?"

"Because," replied the young idea smartly, "I read the other day of a German sailor going to sleep on his watch."

Her Opportunity.

They were discussing entertainments of various kinds, and one girl, whose plainness of feature and general air of thing old maidishness was very marked, said:

"For my part, I don't care a rap for your dances and receptions and teas. What I like is a dinner party."

"Mercy!" exclaimed another wom-

an, "are you becoming a gourmet?" "No," said the old maid, "the food doesn't matter, but it is the one time when I am sure of having a man on either side of me who can't get away." —Philadelphia North American.

Inherited.

The schoolteacher had punished Tommy so often for talking in school and the punishments had been so apparently without effect that as a last resort she decided to notify Tommy's father of his son's fault. So, following the department mark on his next report were these words:

"Tommy talks a great deal." In due time the report was returned with his father's signature and under it was written:

"You ought to hear his mother," —Milwaukee Journal.

Fisk Tires Going Onto More Cars Every Day

CONDITIONS these days—the larger demands on everybody's purse—are leading motorists everywhere to look more closely into the actual value of automobile tires.

We see it every day. See it in the steadily increasing demand for Fisk Tires.

Fisk Tires give certain very definite features that more and more motorists have come to look for—greater uninterrupted tire mileage, longer life, greater safety under all driving conditions.

As an enlightened motorist you want your tire expense cut down to where it really belongs. Next time—Buy Fisk!
