The amount is one of the largest amounts asked in the local courts for many years. The petition alleges that the plaintiff was induced to enter into a contract for the purchase of 160 acres of Colorado land at \$135 per acre, the land being represented as very fertile. The plaintiff paid \$500 on the contract and charges that he later found the land not to be as represented and cancelled the contract. Later suit was brought against him in the district court, then dismissed. An action against him then was begun in the federal court at Norfolk for \$745.24 by the Conejos County State Bank of Colorado as innocent purchaser of his notes from the defendants and recently attachment was filed on his personal property at his ranch near Stuart, in this action, just as he was about to dispose of the same at a public sale. Service was secured on the defendants at Stuart in the action just filed as they were serving the writ of attachment secured by them from the federal court.

The second game was easily won by O'Neill. They outclassed Clearwater in every department, and were very handy at teamwork. They worked the ball time after time past their opponents guards, to have Joe Bazelman or Bennett Gilligan to slip it in the basket. The final score was 18 to 8. The lineup:

### AMERICAN LEGION PLAN-NING MEMBERSHIP DRIVE

Simonson post of the American Legion will put on a membership drive in the near future, with the intention of doubling the present membership of about 75 paid members. This was decided upon at the post meeting at the club rooms Tuesday night when it was disclosed that the membership at present constituted but 40 per cent of the former service men in the vicinity. It is proposed to bring at least another 40 per cent into camp. The drive will be under the auspices of two team captains and the team securing the smallest number of new members will be awarded the privilege of dining the winning team.

The post also decided after a spirited discussion to honor those members who in the future absent themselves from regular meetings by giving them preference on the details for policing the club rooms, and instructed Adjutant Lee Weekes to so govern himself in making out the details. Adjutant Weekes also was authorized to put on a boxing bout under Legion auspices March 29, between Leahy and Reed.

Meetings will be held twice each month, in the future, dates to be determined at the next meeting and to be so arranged as not to conflict with the two Tuesdays each month on which the use of the club rooms is to be accorded the woman's auxiliary.

The post requested the woman's auxiliary to assist in providing entertainment for the Yankton college girls glee club, which will appear at the K. C. theatre under Legion auspices April 1.

Every member of the Legion will wear a red Poppy, the official emblem of the American Legion, on Memorial day, in honor of the soldier dead, and the adjutant was instructed to procure from the government proper markers, that each soldier grave may be marked before Memorial day.

Resolutions of thanks to donors of all gifts toward fitting up the club rooms were ordered drawn up for presentation at the next meeting, when they are to be adopted.

Reports of the post officers and committees read at Wednesday night's meeting, incidentally the second regular one of the year, show that the year is to be a banner one in the life of the organization. The club rooms have been secured and are nearly finished, other planned improvements soon are to be installed and entertainments are being arranged that will make the club a most attractive gathering place for local and visiting service men.

## Why Your Telephone May Get "Out of Repair"

The delicate signal which operates on the telephone switchboard when you lift your telephone receiver may "burn out" or stick—then you can't get "Central".

The fuse on your telephone line on the "main frame" may blow out—then your telephone is "dead".

Switchboard cords are small cables of several tiny wires which frequently snap from constant handling. Then your connection is "out-off".

Telephone apparatus is sensitive to extremes of heat or cold, dust or moisture, and it may become "dead" when least expected.

Considering all the delicate electrical apparatus and the "human element" involved in a telephone call, it is not surprising that things occasionally go wrong.
