Shoe Polishes

America's Fastest Selling—SHOE POLISH

AGENTS—Very latest toilet articles, perfumes and novelties. East stores, Sarsaparilla, Big profits. Free sample case. Lee-Jackson Co., Avondale 7, Cincinnati, O.

Folks! Just What You Have Always Wanted
 Automatic door-closing device and check easily attached without screws or hooks. 50c. postpaid. Interstate Sales Co., Fairbank, Minn.

Gray Hair

is out of fashion; is unnecessary; for you can have abundant hair of the original shade by using Q-Ban Hair Color Restorer—Safe as water—try it. At all good druggists, 75 cents, or direct from HESSIG-ELLIS, Chemists, Memphis, Tenn.

SIoux CITY P.T.G. CO., NO. 44-1922.

Monkey Reasons.

It used to be thought that beasts and birds were guided in their action entirely by instinct, reason playing no part whatever in their daily lives. But now naturalists are not so sure. To learn to use a lever as a mechanical instrument implies, one would think, a certain amount of reasoning power. Yet a monkey kept in captivity employed a stick to pry up the lid of a chest which was otherwise too heavy for the animal to raise.

Didn't Have That Twin.

Two Irishmen who were old friends met in the street one day.

"Sure, I met a man last week, and, bedad, I'd have sworn it was yourself," said one.

"And wasn't it?" replied the other.

"Divil a bit," replied the first. "But he was your very image, barrin' he was a trifle gray. I suppose, now, ye haven't a twin brother a few years older than yourself?"

A Return Desired.

"How was the political speaking last night, squire?" asked old Ripley Rezdlew of Potunia. "My rheumatiz was hectoring me so that I didn't feel like attending."

"The Hon. Thomas Rott pleaded with the voters for a return to the principles of the glorious Old Party, and—" replied Squire Ramsbottom.

"He did, hey? That reminds me: if he is in town yet I am going around and plead with him for the return of them ten dollars he borrowed from me six years ago, when he started for the convention."—Kansas City Star.

Woman's Organization Growing.

The Auxiliary of the American Legion, said to be the fastest growing woman's organization in America, has a membership of 140,000 in the 48 states, Alaska, Hawaii, the Canal zone, Cuba and Mexico. These women are divided into 5,959 posts.

The tongue of a fool is the key of his counsel, which, in a wise man, wisdom hush in keeping.

Children sweeten labors, but they make misfortunes more bitter.

KING STOPS THREATENED REVOLUTION

Bloodshed Prevented by Victor Emmanuel's Action Siding With Fascisti—Mussolini to Be Power Behind Throne.

BY C. F. BERTELLI, Universal Service Correspondent
Special Cable Dispatch

Paris, Oct. 29.—All is quiet in Italy. Rumors of revolution are false, according to diplomatic dispatches received tonight. The situation in Rome, as summed up now is:

- 1—The courageous action of King Victor Emmanuel in throwing his personal weight in the scales in favor of the fascisti, has prevented bloodshed, and forced the government to revoke its orders for martial law, which might have had serious consequences.
- 2—Benevito Mussolini, a few years ago a country lawyer, now the dictator of Italy with more than 2,000,000 supporters, is not likely to accept the premiership, preferring to remain the power behind the throne.
- 3—The first important result of the fascisti success will probably be a tension in Italy's foreign affairs. Mussolini is a partisan of the annexation of Austria, which, however, will not be pressed at present.

The new government is likely to veer from England to France, further complicating the international situation on the eve of the Near East peace conference.

The principal note of the new government will be its intense nationalism and one of its first acts will probably be to annul the Washington naval pact on the ground that Italy must be the greatest Mediterranean sea power.

STORAGE OF COAL IS URGED BY MINERS

Would Help Prevent Seasonal Shortage, Commission Is Told.

Universal Service.

Washington, Oct. 29.—Coal storage, so as to keep up a continuous flow of coal from the mines, will help solve the country's fuel problem, as cold storage of farm products has aided in solving the food problem, in the opinion of spokesmen for the organized miners of the country.

This is one of a number of suggestions to the United States coal commission made public here today by Ellis Searles, John Moore and Thomas Kennedy, the advisory committee representing the bituminous miners of the United Mine Workers of America. These suggestions are the outgrowth of the committee's conference with the commission last Monday.

Suggestions will be offered later for the anthracite miners, which, together with suggestions from committees of bituminous and anthracite operators, will give the commission a basis for beginning its inquiry into the ailments of the coal industry and arriving at remedies therefor.

AUTOIST RUNS DOWN DEER.

Fredericksburg, Va., Oct. 29.—The novel experience of killing a deer by automobile came to Charles A. Mac Henry. A large doe traversing the highway, probably blinded by the headlights, jumped directly in front of the automobile, was struck and killed. Approximately 150 pounds of fresh venison were turned over to the Children's Home.

CHICAGO BALMY; SNOW IN WEST.

Universal Service.

Chicago, Oct. 29.—Climate? America has it.

While Chicago enjoyed a balmy, summer day and folks took a dip in Lake Michigan, Colorado and Wyoming tussled with snow drifts. Out on the Pacific coast the temperature was about normal, with the same condition prevailing in New York and New England states.

In Chicago the temperature broke all records for this time of the year, the thermometer going to 74. Thousands of people flocked to the parks and hundreds donned bathing suits and sported on the beaches.

The snowfall was heavy in Wyoming, according to the weather bureau. Snow also fell in Colorado and South Dakota.

The autumnal "hot wave" extended over a good portion of the middle west. Record temperatures were reported in Minnesota, Kansas, Iowa, Illinois, Indiana and Wisconsin. Davenport, Ia., reported 80 degrees.

CAPITALIST IS FOUND SHOT DEAD IN HIS HOME

St. Louis, Oct. 28 (A. P.)—Selwyn C. Edgar, capitalist and former president of the Edgar Zinc company, was found shot to death in the kitchen of his home here today. He was 71 years old, and police expressed the belief that he had committed suicide. A note addressed to his wife saying: "You do not commence to live until you die." He and his wife were estranged.

BARLEY, POTATOES AND RYE HEAVY CROP

Department of Agriculture Announces World Production Is Larger.

Washington, Oct. 28 (A. P.)—Production of rye, barley and potatoes for all countries reporting is larger than for the same countries last year, the department of agriculture announced today. Rye production for 16 countries is placed at 101 per cent. of production for the same countries in 1921 but only 91 per cent. of the average yield for 1909-13. Production in the United States and Canada is 163 per cent of the 1921 crop, while production in European countries is only 93 per cent. The barley crop of the United States and Canada this year is 129 per cent. of the 1921 crop and for 15 European countries it is 103 per cent.

Wheat production in 1922, according to latest estimates, is 99 per cent. of 1921 crop being 109 per cent. in North America, and 81 per cent. in Europe. Condition of the new wheat crop is reported good in Argentina, Australia and India.

UNREQUITED LOVE MURDER MOTIVE

Coroner's Jury Declares Slaying of Rev. J. L. Christler Committed While Woman Mentally Deranged.

Universal Service.

Havre, Mont., Oct. 29.—Mrs. Margaret Carleton, wife of former district Judge Frank Carleton, was found by the coroner's jury here early today to have been the slayer of the Rev. J. L. Christler, rector of St. Marks Episcopal church who was shot to death in his home early Friday morning.

An inquest verdict, returned after the jury had been in session five hours, made this finding of fact and the further declaration that Mrs. Carleton shot the rector while "temporarily mentally deranged," destroying herself by shooting herself through the heart an instant after killing the rector.

Unrequited love, or love turned cold, is the motive generally accepted in Havre for the slaying. A letter was found in the dead woman's effects in which Rev. Christler advised her against obtaining a divorce as suggested by her husband, from whom she had been separated.

Widow Chief Witness.

Mrs. Christler, dressed in deep mourning, was the main witness at the inquest. In modulated tones she recited the events of the tragedy and incidents of the evening leading up to it. She said that after the church service which she attended with the rector and the Rev. Charles Chapman at Havre, at which the rector presided, she remembered that she had left the key in the door and the lights burning. The rector, she said, left the witness and the Rev. Mr. Chapman and went home to get the key and extinguish the lights, but found that the key had been taken from the door? Mrs. Christler testified that she had a key and went home, after the rector's return, to put out the lights.

Arriving there, she said she discovered somebody was inside and before entering summoned O. C. Houge, an attorney living next door. He stood on the doorstep, she testified, while she went in. Within, she continued, she found Mrs. Carleton tearing up the rector's photograph. Mrs. Carleton talked incoherently, she said, but failed to make the purpose of her visit plain. Mrs. Christler said she finally persuaded Mrs. Carleton to accompany her and they left together, meeting the rector and the Rev. Mr. Chapman as they went down the street.

Makes Midnight Call.

The Rev. Mr. and Mrs. Christler left Mrs. Carleton at the meeting place and went to the railroad station with the Rev. Mr. Chapman, returning about midnight to their home. A short time after their arrival, there was a knock on the door, she testified, and Mrs. Carleton entered, remarking to the rector's wife that she had no place in her husband's life.

Mrs. Christler said that after talking a few minutes in an attempt to procure an explanation of Mrs. Carleton's words and actions the rector arose and walked towards his sleeping room. Mrs. Christler walked to the front door to open it for Mrs. Carleton and as her back was turned she heard two shots in quick succession. Turning, she testified, she saw Mrs. Carleton fall through a doorway into a small hall. Running back, she saw that Mrs. Carleton was dead and stepped over her body to reach her husband but he had fallen in such a way that his body partially blocked the door. She then summoned the police and two physicians Drs. Foss and McKenize. No threats were made nor any violence indicated by Mrs. Carleton at any time during their conversations.

Houge corroborated Mrs. Christler's statements concerning the discovery of Mrs. Carleton in the Christler home said that about 10 o'clock on the night of the shooting he saw Mrs. Carleton reach up and turn out a light in the house.

ALL SOUTH AGOG OVER HEALINGS BY NEGRESS

Atlanta, Oct. 29.—Such miraculous cures are being performed by a negro woman living near Caldesta, Ga., that sufferers from all parts of the south are journeying to her home.

She is reported to have cured cases of cancer, tuberculosis and chronic heart affection simply by laying her hands on the sufferers and telling them over and over again that their disease was leaving them and that they were growing strong again.

DYED HER DRAPERIES, SKIRT AND A SWEATER WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—Advertisement.

Work Without Proper Aim.

I respect the man who knows distinctly what he wishes. The greater part of all the mischief in the world arises from the fact that men do not sufficiently understand their own aims. They have undertaken to build a tower, and spend no more labor on the foundation than would be necessary to build a hut.—Goethe.

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

Impressive Income.

"Dubwaite was always hard up when he was making \$2,000 a year. Now he's making \$20,000 a year and he's still hard up."

"But he has one advantage."

"Well?"

"Bill collectors will stand for a great deal more back talk from a \$20,000-a-year man than from a \$2,000-a-year man."—Birmingham Age-Herald.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

PLAN TO CONTROL WEATHER

Scheme Has Been the Dream of Many Scientists, But Nothing Practical Has Been Evolved.

Three or four years ago a Sheffield (Eng.) workman claimed to be putting the finishing touches to an instrument to enable him "to focus beams of ether oscillation" and so control the weather. Unfortunately, the instrument could not have been so perfect as he thought, for nothing further has been heard of it. Before that a Leeds scientist had come to the conclusion that it was "within the scope of human possibility to prevent disastrous cyclones, hurricanes and storms, and even to improve permanently the weather of the British Isles." The idea was the production of an instrument enabling the operator to collect or disperse the molecules which form the atmosphere, securing the degree of density desired and so arranging the best weather required for any district or seasonal occupation. More than twelve years ago Sir Oliver Lodge demonstrated that fog could be dispelled by electricity, though the process was too costly for adoption generally.

Her Chief Sensation.

"What were your thoughts while you were flying through the air on the wings of the tornado?"

"One of 'em," replied economical old Mrs. Frett, "was about the wasteful way my daughter-in-law always cuts the bread, and the fact that it didn't look like I'd ever have another chance to tell her about it."—Kansas City Star.

Queer Job.

"What do you mean, your job is a queer one?"

"It's a bookkeeper for a bookseller."

A million men have turned to One Eleven Cigarettes—a firm verdict for superior quality.

COAL OF VEGETABLE ORIGIN BIRD IS FAST ON ITS FEET

Abundant Proof That Huge Forests, in Former Epochs of the Earth, Became Petrified.

Although in most instances there are comparatively few traces of its vegetable origin left, coal owes its existence to the vast masses of vegetable matter deposited through the luxuriant growth of plants in former epochs of the earth's history, and since slowly converted into a petrified state.

Coal fields today present abundant indications of the existence of huge ancient forests, usually in the form of coal formed from the roots of trees. Several such forests have been uncovered, one of which in Nova Scotia is a good example. Remains of trees have been found there, six to eight feet in height and four feet in diameter. In a colliery in England, in a space of about one-quarter of an acre, there have been found the fossilized stumps of 73 trees, with roots attached, and broken-off trunks lying about, one of them 30 feet long, and all of them turned into coal.

California Roadrunner Famous for Its Custom of Sprinting in Front of Trotting Horses.

A bird known as the California roadrunner has earned his common name from his delight in sprinting along roadways, especially when pursued by horsemen or moderately slow-going vehicles. In the picturesque old days of California it was no uncommon sight to see this bird running a half-mile or so in front of fast-trotting horses.

Another common name, chaparral-cock, is given in allusion to his living in the chaparral of the seal-deserts. The bird belongs wholly to the West. Formerly he ranged from the plains of Kansas to the chaparral-covered hills of the Pacific coast and from central California to Mexico, but he is rapidly becoming rare. He is built like a heron, except for his short legs, but, unlike that water-loving bird, chooses deserts for his home. He has wings, but scarcely has the power to fly, though he is one of the fleetest of runners.

"Land of El Dorado."

The word is Spanish and means "the gilded one," because the early explorers thought there was an Indian chief somewhere in South America who used to cover himself all over with gold dust at a religious festival once a year. Now the name is applied to any country where there is supposed to be an abundance of valuable natural products.

The Aisle Revue.

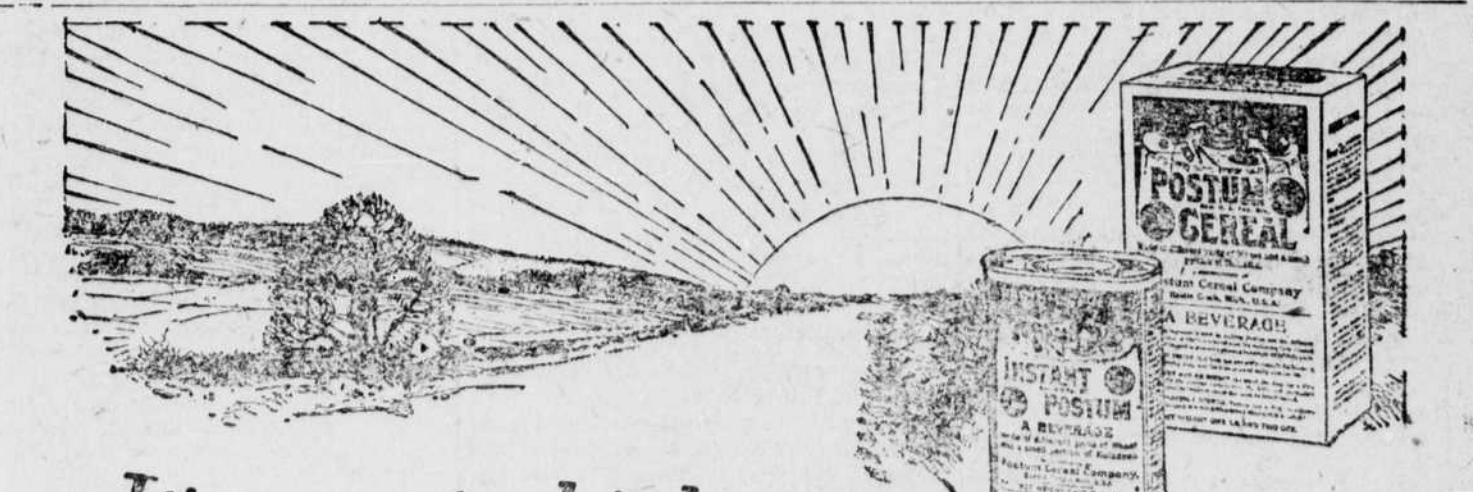

"Chorus girls in the aisles, hey? Don't be foolish. Many of our society people come late to the theater."

Beware equally of a sudden friend and a slow enemy.

Want "Souvenirs" Returned.

The French government is making an appeal to American soldiers who extended their activities as souvenir hunters by taking fragments from the historic Reims cathedral, to send these mementos back to Reims. Thousands of members of the A. E. F. visited the cathedral and many carried away statuary and other elements of fabric from the structure. Some of these were priceless to the French. The reconstruction efforts aim to replace all portions that can be recovered.

It is folly for an eminent man to think of escaping censure, and a weakness to be affected by it.

It's a main highway

THE way to satisfaction, comfort and health through Postum, has become a world-wide way. This famous table beverage which has stood the test of twenty-five years, fills every requirement of taste for a hot and invigorating mealtime drink. Unlike coffee or tea, Postum contains nothing that can irritate nerves or disturb digestion. Even the children may safely enjoy it.

Wouldn't it be well for you to avoid the harm which so many have found in coffee and tea, and protect health while pleasing taste, with wholesome, satisfying Postum?
