

AN OPEN LETTER TO THE PUBLIC OF O'NEILL.

The Universal-Jewel photoplay — "THE FLIRT" — which is to be presented at the Royal Sunday and Monday, is in the estimation of the critics and myself, one of the greatest of achievements in the history of the screen.

"THE FLIRT" is Booth Tarkington's masterpiece transferred to the screen with a fidelity and sincerity that makes this picture the greatest drama of American life ever produced.

A remarkable cast under the direction of Hobart Henley has made the characters in Booth Tarkington's famous book live and act in a mighty drama that will live in your memory long after all other big pictures have been forgotten.

Naturally, a showman wants everybody to see every picture he shows. But it's something other than mere business that prompts me to plead with you not to miss "THE FLIRT."

It is one of the greatest most satisfying pictures I have ever seen anywhere. It certainly is one of the finest this theatre has ever shown. I am proud to be able to show it at my theatre.

DR. MCCARTHY'S DEATH.

Dr. P. H. McCarthy died at Rochester, Minnesota, last Friday following an operation for appendicitis. The remains were taken to Butte, Montana, for burial. Dr. McCarthy was a stepbrother of T. D. Hanley of this city and was a former O'Neill boy, having spent his boyhood days in this city. He is quite well known by many in this vicinity. The following article is taken from the Butte (Montana) Daily Post of last Friday, and tells of his life in the west:

Dr. P. H. McCarthy, of Butte, eminent Montana physician and surgeon, died early this morning at Rochester, Minnesota. He failed to survive an operation for appendicitis. He had been suffering from acute pneumonia as well.

Dr. McCarthy's health broke down under strain of professional work a few months ago. He spent some time in California and friends hoped that the trip might serve to restore his health. As a last resort he left several days ago for Rochester for a consultation with specialists.

His wife was with him when the end came. His daughter left Wednesday, accompanied by Mrs. Mayme Leary, a sister of Dr. McCarthy, for Rochester.

Dr. McCarthy was a native of Michigan, where he was born October 15, 1875. His parents were pioneers of the west and the family migrated to O'Neill, Nebraska. His mother was widowed when he was quite young, but Dr. McCarthy concluded his first studies in the schools of that city and came to Butte thirty-two years ago, where he worked as a miner for several years. He later attended Creighton Medical college where he attained his degree. During the summer vacations he returned to Butte and labored with the multitude of underground workers in the local mines.

He began his practice in Butte on completion of his studies and was united in marriage to Miss Jule Stafford, of Norfolk, Nebraska, seventeen years ago. His wife also comes of a prominent pioneer family of the middle west. She had been a teacher in the Butte schools and is now active in civic and other organizations here.

Dr. McCarthy's practice grew to be one of the biggest in the profession in Butte. Aside from his success at that work, he was prominent in other activities. He had been connected with the county board of health for the last twelve years, during which time he served as secretary. He was also a member of the state board of medical examiners and one of the leading surgeons and physicians of Montana.

Besides his wife and daughter, Mary Catherine, he is survived by his mother, Mrs. Mary Hanley, Billings, Montana; a brother, Dr. James McCarthy, Goldfield, Nevada; a half brother, Dr. Robert Hanley, Billings; a half sister, Miss Genevieve Hanley, Dear Lodge; Mrs. Mayme Leary, Butte, sister; Jerry Hanley, a half brother, and Miss Abbie Hanley, half sister, of Billings.

Tribute to Dr. P. H. McCarthy.

The following editorial also appeared in the Butte (Montana) Daily Post of last Friday, and is a tribute to Dr. McCarthy:

During most of his manhood years, Dr. P. H. McCarthy held estimable professional rank in this city and throughout the state he was much esteemed within the circle which includes the medical fraternity. Of itself that is a record which is enviable, but in a broader sense and a larger way he was a citizen whose career was excellent and whose death, in the prime of useful manhood, will be sincerely deplored by his townsmen.

Dr. McCarthy was endowed with genial social traits which gave to him pleasant personal distinction and multiplied the number of his sincere friends. He was an enjoyable companion and a much-admired comrade. While he held the confidence of those with whom his relations were professional, he was, as well, a fellow citizen whose public-spirited motives were recognized and whose helpful effort in all things relating to civic or community welfare were appreciated. He volunteered for world-war service, at severe personal cost, and his soldier record was to his enduring credit.

It had come to the notice of Dr. McCarthy's friends within recent weeks that he was in failing health. Their hope was that his recovery would be speedy and complete, but this week's tidings were ominous, and they proved to be a most unwelcome preface to this morning's deeply-regretted announcement that he has passed out of life.

Best Skimmer of Cold Milk in the World

We can prove that the Beatrice Cream Separator is the closest skimmer of cold milk. Every farmer knows this to be a convenience that is worth money. With the Beatrice you can skim milk when you are ready—you don't have to make your plans fit the Separator—the Beatrice will fit your convenience.

One of the several reasons for this closer skimming is the Double Angle Disc. This type of Disc is possessed by no other Separator, but is generally admitted to be such a great advantage over the old-style Disc that one Separator manufacturer spent \$50,000 trying to imitate the Beatrice Disc.

Beatrice Cream Separator

One Beatrice user tells us: "In 20 years' experience I have not seen a closer skimming Separator than the Beatrice Separator. It is being operated every day, running full capacity, skimming a heavy cream and leaving only one one-hundredth to two one-hundredths of one per cent in the skim milk."

Don't consider any Separator until you come in and see the Double-Angle Discs, and also the Beatrice Washer—a new invention, given free with each Separator.

Washed in Two Minutes

With the Beatrice Washer, the Beatrice Separator may be thoroughly cleaned, sterilized and dried in only two minutes. This makes a hit with every woman. Saves an immense amount of time and work.
