

Safe instant relief from CORNS

One minute—and the pain of that corn—and that's what Dr. Scholl's Zino-pads do—safely. They remove the corn—friction-pressure, and heal the irritation. They stop you from infection from cutting your corns or using corrosive acids. This is a diastatic, waterproof. Sine for corns, callouses, bunions. Get a box today at your druggist's or shoe dealer's.

Dr. Scholl's Zino-pads

Made in the laboratories of The Scholl Mfg. Co., makers of Dr. Scholl's Foot Comfort Applicator, Arch Supports, etc.

Put one on—the pain is gone!

SPOHN'S DISTEMPER COMPOUND

Are your horses coughing or running at the nose? If so, give them "SPOHN'S." A valuable remedy for Coughs, Colds, Distemper, Influenza, Pink Eye and Worms among horses and mules. An occasional dose "tones" them up. Sold at all drug stores.

SPOHN MEDICAL CO. GOSHEN, IND., U.S.A.

Clear Baby's Skin With Cuticura Soap and Talcum

Soap 25c, Ointment 25 and 50c, Talcum 25c.

NO DYE

To restore gray or faded hair to original color, don't use a dye—it's dangerous—Get a bottle of Ban Hair Color Restorer—Safe as water—apply it and watch results. At all good druggists, 7c. or direct from HESSIG-ELLS, Chicago, Memphis, Tenn.

MULE'S MANY GOOD POINTS

"Old Jude" Knows, and Performs, Her Duties in Quarry of Arkansas Lime Company.

Old Jude, a mule that gains her daily oats and hay by pulling back empty tramcars in the quarry of the Arkansas Lime company, has been with the company since it started operations years ago, and she knows her business.

The cars run down to the dump by gravity. A man dumps the car, connects Old Jude with it and she hauls it back. In the quarry she is relieved of her load and returns to the dump pile. She does this without a driver. In the morning she is let out of the lot and she goes to the kilns. When the bell rings to start work she starts up the hill with the men. When the bell rings for dinner she ambles off down the hill again.

No man has to tell her to get out of the way of a blast. When they holler "Fire in the hole," she knows what it means and runs to cover behind a tree or a big rock. After the explosion she ambles back to her job again. In Old Jude are exemplified the fundamental principles of success—brains and a dogged determination to do her best.—Arkansas Gazette.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other line—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

So to Speak.

"He's an optimist. Even jokes about his asthma." "Lets out a few wheezes as it were."—Louisville Courier-Journal.

Important to Mothers

MOONSHINER SAYS HAD CLOSE CALL

Georgetown, Neb., Man Says He Is Not Profiteering So Should Not Be Molested.

Broken Bow, Neb., March (Special).—After Sheriff Talbot had returned to his office, following for two days a fruitless tip that there was hooch being manufactured in Buzard's roost, Georgetown precinct, he received the following letter:

"Well me boy you got so close once I dare not draw me breath. I do a legitimate business. I make 3 gallons a day from rye and fruit and sugar and sell it at 4 dollars per gallon, no profiteering you see so why bother me. I was in the Crows' nest as you steamed by. Mabe I best vacate a spell. I dont blame you to do your duty but thanks to you, you missed me. Who told you? Didn't know I had an enemy. Yours as ever.

"A good fellow."

CONFESSED BUT CAN'T BE CONVICTED OF CRIME

Omaha, Neb., March (Special).—William Albert Rich, 22, of Omaha, who in Cleveland, O., recently said he killed Charles E. and Robert Stefkins in an oil station holdup here, has been returned to Cleveland by Omaha detectives. It is announced by County Attorney Beal, who said Rich would not be prosecuted for the Omaha killings because he was satisfied Rich could not be convicted.

CHARGES MAN SHE WED WAS A LUNATIC

Aurora, Neb., March (Special).—Anna Bottorf has filed suit for divorce from Earl Bottorf to whom she was wed in June, 1918, charging that he was a lunatic at the time, but that she was ignorant of that fact. January 14, 1919, he was placed in an asylum, where he still resides. They have a child, four years old.

BRITISH SOLDIERS WILL BE WELL FED

Specially Trained Cooks Will Prepare Food Instead of "Impossible" Soldiers.

International News Service. London.—British soldiers are to be fed henceforth as never before. So says the latest edict of the army command.

"Cookhouse" is no longer to be the dumping ground of the impossible soldier. Every man employed as a cook henceforth must be specially trained. Every officer henceforward must know enough about food to discover whether it is properly cooked or not. An attractive service of food is to be as essential as good cooking.

The new army cook from now on must not on any account begin his day's work without being shaved; he must not smoke in the cookhouse, on threat of direct punishment, and he must have clean hands and nails.

The new soldier of the line is to be given a cup of tea when he wakes up in the morning, and a liberal breakfast is to follow. Each midday meal must consist of meat, vegetables and sweets, and a substantial tea and supper must follow each day.

"Links" up for rations is entirely abolished. Seating accommodation must be comfortable and adequate, and, above all, officers must make arrangements for food to be served steaming hot.

The war has taught the British war office that Napoleon was right when he remarked that "an army marches upon its stomach."

12-YEAR-OLD FAILS TO FIND HIS JULIET

Philadelphia.—Philip Meekin, 12-year-old "Romeo," failed in his quest for "Juliet," after a trip to Lancaster, Pa.

The romance of the theater spotlight, mixed with a fertile imagination, started Philip on a "love quest." The boy attended a vaudeville show here and a little blond maid won his heart.

Philip learned that the show was leaving for Lancaster so he shoveled snow to finance his trip there. Philip finally reached Lancaster but fate was against him for the theater was locked. He was found by police huddled against the stage door, hungry and nearly frozen.

Authorities sent the boy back to his home here without seeing his "dream girl."

THOUGHT ROBBERY JOKE.

Dublin.—Daniel Smith, a Belfast news agent, was robbed of 165 pounds. He was returning to his shop in the heart of the city when two men lassoed him, dragged him to the ground and robbed him. Several hundred people were looking on but took no notice, thinking it was a joke. The robbers got away.

Sugar can be produced by action of sunlight on aqueous carbon dioxide—commonly called soda water—according to recent researches, says Popular Mechanics Magazine.

TO VOTE ON BONDS FOR MUNICIPAL BUILDING

Randolph, Neb., March (Special).—At the regular meeting of the city council held this week a resolution was passed for putting the question of \$35,000 up before the regular spring election on April 3. A petition was presented to the council and the vote for the bonds was unanimous. These bonds will be used to finance the erection of a municipal building, tentative plans of which have been worked out.

NEBRASKA'S CODE FIGHT NEARS END

Republican Legislators Predict Final Vote Early This Week—Partisan Line-up Expected.

Lincoln, Neb., March (Special).—Storm bound legislators in Lincoln said Sunday night it was the plan of the republican majority in the lower house to force an early conclusion of the debate on code law revision and bring a vote either Monday evening or Tuesday. Majority leaders were quoted as saying no good could come from prolonging the debate and they believed constituents were impatient for action.

When the vote comes, it is believed it will be a close party alignment. Governor Bryan made public a statement in which he commended the stand of the democratic house minority in favor of his bill for the abolishment of the code system. He also singled out Representative Nelson, of Pierce county, a republican, as a man of sufficient independence to oppose the present law. Nelson, however, has not declared himself in favor of the governor's bill. In a speech he said the difference between the Bryan bill and the Dysart majority bill is that of a five cent piece and a nickel.

A number of other republicans are lukewarm in their support of the Dysart bill, but none has publicly announced he will vote against it.

Until the bitter code fight is ended other legislative action of importance is likely to lag.

RIVAL SCHOOLS GO INTO COURT

Two Sets of Chiropractors in Nebraska Seek to Settle Difficulty With a Test Case.

Lincoln, Neb., March (Special).—Representatives of the State Chiropractors' association has filed a test in supreme court to determine whether Palmer school graduates can qualify under the Nebraska law, which requires, among other things, attendance at an accredited chiropractic school for three terms of nine months each. The Palmer school, located in Iowa, has sent a number of graduates to Nebraska, guaranteeing to defend them from actions to prevent them from practicing. Judge Morning of the district court held that where a practitioner held 18 months of chiropractic training, a high school education and medical experience in the army, it was a substantial compliance with the law.

BLOOMFIELD MOVES TO GET BATHING POOL

Bloomfield, Neb., March (Special).—The move to provide Bloomfield with a swimming pool is meeting with a favorable reception. At the last meeting of the executive committee of the Commercial club, the following committee was appointed to investigate the matter thoroughly and report at the annual meeting of the club to be held on March 28: E. H. Mason, J. E. Gosard, Dr. S. B. Kalar, W. G. Lorie and J. W. Dart. Most of the different organizations in the city have signified their willingness to get behind the proposition and help make it a success. The probable location of the pool is in the city park.

PREACHER RAPS SCHOOLS, BOARD SUSTAINS TEACHERS

Ainsworth, Neb., March 17 (Special).—The disapproval occasioned by criticism of the high school students by the Rev. Mr. McDaniels and the reply of Superintendent C. A. Diggs, made in quotations of scripture has been settled seemingly to the satisfaction of all. The school board gave the entire faculty of the school a vote of confidence by re-electing them for the coming year, but it is understood that none will accept.

SOUSED GEESSE LEAD TO ARREST OF BOOTLEGGER

International News Service. Los Angeles.—The anti-Volsstead quacking of 300 geese recently led to the arrest of O. S. Steglatt, at Cudahy, according to local prohibition agents, who confiscated three stills, 100 gallons of moonshine and 300 gallons of mash concealed in coops of the chickens and geese at Staggatt's residence.

Suspicion of the agents was confirmed, it is said, by investigation into the peculiar antics of the geese. It was found later that the mash was fed to the poultry after being removed from the distillery boilers.

A large scale vacuum cleaner system was recently installed in a Chicago grain elevator for the removal of dust in order to reduce the risk from explosions.

S. DAKOTA PLUMBERS ELECT NEW OFFICERS

Mitchell, S. D., March (Special).—The South Dakota Retail Plumbers' association, which adjourned their fourth annual convention here Thursday afternoon, elected the following officers: President, George C. Hunt, Huron; vice president, Joseph Vinatire, Yankton; secretary, H. M. Dickenson, Yankton, and treasurer, J. H. Gliese, Mitchell. Directors were A. I. Olding, Redfield, retiring president of the association, G. V. Swanson, Mitchell, and C. L. Breedlove, Madison.

NEXT YEAR'S WHEAT.

By B. W. Snow.

In spite of a long, warm fall, the very late appearance of freezes and snow, and an extended period for late fall growth, the net condition of wheat is not wholly satisfactory. The length of season did no more than compensate for unfavorable conditions experienced earlier, and not full compensation at that.

Lack of rainfall over the great central valleys during September and October, interfered with the preparation of land for fall or spring planting, shortened early fall pasture, delayed seeding of winter grain, and retarded germination and early growth. The effect upon land preparation is reflected by an acreage decrease for winter wheat of 3,000,000 acres or more, and a smaller than usual area of fall plowed and summer fallowed land in the spring wheat country. Besides not being able to get all of the proposed plowing done, the seed bed that was prepared had to be left rough and cloddy, and in poor shape for root growth.

East of the Missouri.

Winter wheat seeding was purposely late east of the Missouri river because of the Hessian fly; but when the fly-free date was reached the soil was dry and hard, causing still later seeding and germination than had been intended. Fortunately the greater part of this district received rain relief shortly after seeding was completed, and this fact, coupled with the long, warm season, resulted in good germination and early growth.

The net result for the important territory from Ohio to the Missouri river is a small plant of good color and just moderate vigor when the wheat crop went into winter quarters. With the exception of Illinois, where there is a substantial acreage increase, and Indiana, where there may be a small increase, the acreage of winter wheat east of the Missouri river is smaller than last year.

Dryness in the Wheat Country.

In the west and southwest, where the greater fraction of the wheat acreage is found, the situation is much less favorable. There were good early rains in eastern Kansas and Nebraska, and the plant, while small and late, is sufficiently vigorous to promise good results. But there is little wheat in this district, and in the much greater wheat belt in the western half of Kansas and Nebraska, most of Oklahoma, and the producing district of Texas, the crop starts the winter not only with an acreage heavily cut down, but with a plant condition that can not properly be called anything less than critical.

A hard, dry soil delayed preparation and furnished a very unfavorable bed for seed that lay long in the ground without sprouting. There was no rain until well into November, and at the beginning of December the plants over large areas had not appeared above ground. Indeed, seeding was still going on as the month opened, in the hope of a possible winter germination, and a spring kind enough to nurse out-of-season plants. Last winter and spring Kansas had some of this kind of weather, and wheat that had lain in the ground until February was "coddled along" into a moderate yield.

The present situation is much less favorable. This year most of the wheat that began to sprout in the warm weather late in November. Much of this did not get above ground, and therefore goes into winter quarters without root establishment. When wheat is just sprouting it is very tender, and is subject to damage from even moderate freezing, so that the general prospect in Kansas, Nebraska and part of Oklahoma is distinctly not improved by the large percentage of late November sprouted plants.

Prophecy as to the probable character of the winter I leave to those who divine it from fur, bark, goose hooves or goose flight. It is important to say, however, that the universal smallness of the plant, its lateness and tender condition over the large western and southwestern area, all summed up in an average condition very much below normal, certainly means heavy winter killing. Official December reports of condition are of small importance as an indication of bushels of yield seven months later, but they have a decided value as showing plant strength and probable ability to stand the winter.

Records show that the percentage of winter killed area bears a rather definite relation to the December plant condition. The lower the condition figure, the higher the winter loss. This factor adds further to the uncertainty of our next wheat crop.

The suggestion that we will plant more spring wheat and thus maintain the total crop has small merit. The season for successfully seeding spring wheat is all too short at best. This year we have less fall plowing and summer fallowing done than usual. Spring wheat results vary in proportion to the character of land preparation. Stubble sowing and spring plowing promise but small results, and lack of fall preparation forecasts spring wheat yields also below normal.

With a heavy cut in winter acreage, with a poor condition as the plant entered winter quarters, with winter killing danger increased by plant weakness, and with the soil in rather poor condition for spring wheat seeding, the conclusion is forced upon us that at best we can reasonably expect only a moderate wheat crop next year. Russia remains an outpost among the nations, and her unfortunate people are again in the grip of famine; the world's bread supply hinges upon so narrow a margin of safety, that the prospect of a material crop reduction

VIGOR IN THE BREEDING PEN.

By H. H. Steup, Kansas.

There is no one thing more important in profitable poultry raising than exceptionally strong constitutional vigor in the stock. Constitutional vigor is nothing more than maximum efficiency of the digestive, circulatory, respiratory and nervous systems. The most learned and experienced poultryman could never show a profit if called in to manage a farm whose birds had low constitutional vigor, for there is no possibility of correcting this evil, except by changing stock. A constant yearly selection of birds of strong vitality, and a constant rejection of weak birds, will lead to stronger constitutional vigor and larger profits. But it is not wise to try to build up a strong flock out of a weak one without bringing in new blood.

In the fall, when the culler is separating the producer from the loafer, is the logical time to select the breeding pen for the following spring. On the average farm where there are no trap-nests, there is no better time to locate the high producers; and birds combining both constitutional vigor and high production are the only ones that should be allowed to produce chicks. If you choose these at culling time, you do not have to rehandle them.

A hen is a very complex and delicate machine. She turns raw feed into the finished product—the egg. Consequently, the more feed a hen eats, digests and assimilates, the more eggs she can lay and the greater will be the profit in keeping her. The larger her digestive capacity, the greater her production. Hence the birds with large body capacity, well supported underneath by a long keel bone to prevent "breaking down," are the ones that are able to use the most feed. These birds are the ones that have that excess of vigor first necessary for reproduction or egg laying. So a long, deep, full body, well supported underneath, and showing unmistakable signs of large capacity, is the first indication of strong vigor.

Look for Vigor When Culling.

The next requisite is a vigorous heart and a healthy blood stream. This is the railroad system of the hen's body. If this system is weak the same condition would exist as when a railroad strike is on. A large amount of nourishment would exist, but there would be no means of carrying it and this would cause a shutting-down of the factories—the ovary, the oviduct, the gizzard, the digestive glands; there would soon be a general tie-up.

A healthy blood stream is full of red corpuscles and hence the blood has a deep red color. A strong heart forces this blood in a constant stream to every extremity. The external sign of good circulation is a fiery red comb. A broad, deep head, set with keen, alert and prominent eyes, a soft, healthy, full, dark red comb—these are the second set of indications of strong constitutional vigor.

Oxygen is needed for growth, for egg production, and for vital functions of all organs. This gas is taken from the air into the lungs. Therefore, a deep, rounded chest is the third indicator of strong constitutional vigor. Care must be exercised and allowance made for breed characteristics, as some types are more meaty on the breast than others. The bird that falls away in front, giving the head and neck a very upstanding and high appearance, has no lung capacity. Choose only those with full, well rounded breasts.

The working hen is the one that has the proper nervous temperament. She is the first one off the roost in the morning and the last to perch at night. Her toenails are short and worn from foraging after food. The hen that sits on the perch in the daytime and has long toenails, is the one with weak vigor. Choose only the active, working hen with short toenails.

These same pointers apply in selecting male birds. It seldom pays, however, for a person to choose breeding males from his own stock. This practice usually results in inbreeding and, since most farms have no trap-nests or pedigree system, it also affords the chance for reproducing poor layers. If you use males that can not transmit high egg production, you tear down the benefits of culling, for the roosters are half the breeding pen. Therefore, if you choose males from your own unpedigreed flock you are working in the dark. Vigor is not an indicator of the ability to pass on high production. It is necessary for vigor to be present before high production can be transmitted, but all vigorous birds can not reproduce high producing daughters. It is therefore wise to head the breeding pen with males purchased from outside sources that can guarantee high producing daughters.

Mrs. Gross Praises Tanlac for Overcoming Stomach Trouble of Long Standing—Says Results Are Priceless.

"Before I took Tanlac I only weighed ninety-four pounds and scarcely had strength to sweep the floor or make the beds; but now I weigh one hundred and thirty-two and am as healthy and happy as can be." This remarkable statement was made, recently, by Mrs. Mabel Gross, 1137 Aldrich St., N., Minneapolis, Minn.

"For nearly two years I had been in a seriously weakened condition and suffered nearly all the time from headache and backache. My nerves were beyond my control and I was terribly dizzy. I couldn't half sleep and my stomach was so out of order that even the sight of food nauseated me.

"The benefits I have received from Tanlac are priceless. I am now a perfectly well woman and my friends often speak of how healthy I look. I certainly have a great deal to praise Tanlac for. Health is worth everything, and that is what Tanlac has meant to me."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

First Emigrant Express.

Central Europe is to have a special Trieste, and encouragement in the way of special rates and accommodations will be extended. The emigrant express, which will be the first train to link Poland directly with the Adriatic, will not only carry Polish emigrants seeking a new home in America but also will pick up passengers in various cities of Czechoslovakia and Austria.

WHY TAKE LAXATIVES?

Discovery by Science Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent authority.

Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

As Nujol is not a medicine or laxative, it can not grip and, like pure water, it is harmless and pleasant.

Nujol is used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

His Own Medicine.

A client, seeking advice from a young lawyer on how to avoid his creditors, was instructed to place all his property in his wife's name.

Later the lawyer presented his bill for services rendered, and received the following reply:

"Dear Sir: I took your advice and placed all of my possessions in my wife's name and now I have no money to pay for your services."

Cuticura for Pimples.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

The Humorist.

"Did you," said the clever young man, "note that bit of news in the paper about an Albert Ross having a baby born with claws instead of feet?"

"No," replied his audience; "how remarkable!"

"Hardly remarkable," said the clever young man, making ready for a hasty retreat. "It might be called remarkable had the baby albatross had feet instead of claws."

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by druggists for over 40 Years. F. J. Cheney & Co., Toledo, Ohio.

Largest Bull Moose.

One thousand five hundred pounds is said to be the weight of the largest bull moose ever weighed in this country, and the greatest known horn spread is 78 inches.

There's one nice thing about an enemy. He isn't forever telling you something for your own good.

With a friend in need it usually is a case of touch and go.

Look to Your Eyes
