WHY DOES BOSTON PREFER BROWN EGGS TO WHITE?

Why do the residents of the Back Bay district of Boston, the intellectual center of the universe, prefer brown eggs to white; while the New York millionaire must have 'em white or not at all? It cannot be because the brown egg is more of a brain stimulant than a white one, because it is generally conceded that the New York financial magnate is no moron, although his thinking machinery may not work along exactly the same lines as that of the highbrow Bostonese, and if the brown egg made him smarter than the white one he would insist on having that color.

The merits of the dispute between Boston and New York are worrying some of the most profound scholars of the country, and even the federal department of agriculture is giving the question some thought, but it is not worrying E. N. Purcell, of the Purcell Produce company, of O'Neill, at all. Mr. Purcell is supplying each community with its particular tint of eggs at the rate of several carloads each week and he says that the preference for color is merely a display of artistic temperament.

"The brain food value of the egg is determined by the soil and climate of the district in which it is produced," says Mr. Purcell, "and these things also have much to do with the appearance of the egg when it reaches the market, and appearance helps to make the price."

The best trade of both Boston and New York demand eggs of cleanly appearance, uniform size and good, according to Mr. Purcell, and it is because Holt county and the country west of here supplies more of these quantities than any other district of the state that the Purcell Produce company has recently removed its headquarters and plant from Scribner to O'Neill. The concern is one of the largest in the country in its line of business and its location in O'Neill will be of decided financial benefit to the community. It deals directly with the important markets of the east and west coasts and is not a commission concern. The company also handles live poultry of all kinds, shipping in carload lots several times a week. The Purcell company at present is located in the Gaughenbaugh mills building and in due time, as the business demands will erect buildings of its own along the tracks. Frank Youngkin, one of the partners in the company, has been in the city, in active charge of operations since the first of the month. Mr. Purcell arrived Sunday to remain permanently.

CLARENCE ZIMMERMAN APARTMENTS BURNED

Fire was discovered in the up-stairs rooms occupied by Mr. and Mrs. Clarence Zimmerman, in the Naylor building on east Douglas street, Wednesday evening about six o'clock. The fire seemed to be confined to the kitchen which was a mass of flames when discovered. The cause of the fire is not known. Mr. and Mrs. Zimmerman say that no fire had been started in their range during the day and that no one had been in the rooms for several hours prior to the discovery of the fire.

L. E. Sougey occupied the front room on the main floor with a tire repair shop. Mr. and Mrs. Sougey occupied the rear rooms on the main floor as a residence. Mr. and Mrs. Sougey also suffered some loss by breakage during the evacuation of the building, although the fire did not reach them.

We understand there was some insurance on the household goods but no insurance on the building.

John Mullen went to Omaha today.
