**Yellowstone National Park**  
—in Gardiner, out Cody

Roosevelt said: "The geysers, the extraordinary hot springs, the lakes, the mountains, the canyons, the cataraacts unite to make this region something not wholly paralleled elsewhere on the globe."

These and a thousand other wonders found nowhere else on earth, plus the thrilling grandeur of the Cody Road through the Buffalo Bill country—the land you will never forget—

That is Yellowstone Park on a Burlington-Planned Vacation.

The ideal and complete tour of Yellowstone Park is—in Gardiner, out Cody—because in no other way can the visitor gain the advantage of viewing the thrilling scenes between these rail gateways and the Park proper, or see the wonders within the Park in the order of their increasing importance. Nature's grand climax comes where it belongs. Ask anyone who has made the trip.

This unforgettable ninety-mile motor trip is included in your Burlington tour with-out side trip, extra transportation cost or bother.

Via the Burlington, on a round trip ticket to Yellowstone alone, you can, without extra rail cost, visit Denver and the Colorado Springs-Manitou-Pikes Peak region. You can, at small cost, visit peaceful and beautiful Rocky Mountain National-Estes Park, Colorado Glaciers, Clear Creek and Platte Canyon resort regions, the world-renowned Royal Gorge and other delightful Colorado pleasure spots. Two weeks, if that is your limit, is ample time for a glorious vacation, but three would be better, in the land of Eternal Wonder.

The low cost of the trip will surprise you.  
If you are going farther West, you can conveniently visit Glacier or other National Parks enroute. No matter where you want to go West—the Burlington can take you there—its service is at your service throughout the entire West.  
Let us help you plan your trip.

**Truck That Walks.**  
A German engineer has constructed a motor truck which does not move on wheels, but unlike the Martians described by H. G. Wells in his "War of the Worlds," can stride with the help of "legs" across deserts and swamps, can wade "knee-deep" through rivers, stamp through snowfields and step across ditches, and fell tree trunks and other obstacles in its path, says a European dispatch to the Philadelphia Public Ledger. For this purpose it is furnished with two pairs of skids, one of which always rests on the ground, while the other is moving forward with the load. When "walking" normally its stride measures about four feet in length, but, like a human being, it can regulate it when walking uphill or when stepping across an obstacle in its way. With its skids, which are ten feet long, it strides along the roads at a pace of six miles per hour, or about twice as fast as an ordinary person can go. It can go backward, turn completely around its axles without moving from the spot, and it even walks sideways if required.
