TWICE-TOLD TESTIMONY
O'Neill People Are Doing All They
Can For Fellow Sufferers.

O'Neill testimony has been published to prove the merit of Doan's Kidney Pills to others in O'Neill who suffer from bad backs and kidney ills. Let any sufferer doubt this evidence of merit, we produce confirmed proof—statements from O'Neill people who again endorse Doan's Kidney Pills—confirm their former testimony. Here's an O'Neill case:

Mrs. E. B. Jones, says: "I suffered with backache. While sitting still the trouble wasn't so bad but when I went to get up I could hardly stand the sharp knifelike pains. When I bent or walked around the misery was terrible. My kidneys were in a disordered condition. I got Doan's Kidney Pills and after using a couple boxes the trouble was all gone."

FOUR YEARS LATER, Mrs. Jones said: "I think Doan's Kidney Pills are a wonderful remedy. I gladly confirm my former statement in which I told what Doan's had done for me."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Jones had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

THACKERAY AND THE MOVIES

Member of School Class Says His Novel "Gives a Picture of Time of Queen Elizabeth."

A class in a certain school in the city was reading the biography of William Makepeace Thackeray. The lesson was an intensive one, and the object was to read a paragraph, then give every point it contained.

One boy had recited in full supposedly, when Clifford became much concerned as indicated by his wry face and an eagerness to be heard.

"He left out a very important point," he said.

The class members registered disapproval on their countenances and negative nods here and there. Clifford bristled slightly at the idea of disagreement.

"He did leave out an important point," he urged, insistently.

"What was that?" asked the teacher. "That Thackeray was in the moving picture business," replied the boy. The class snickered in spots, and it was necessary for the teacher to intercede.

"Where did you read that, Clifford?" she said.

With flourish and decision he promptly opened his book and read: "Thackeray's novel, 'Henry Esmond,' gives a picture of the time of Queen Anne."

Washington a Fast Worker.

Washington was in his twenty-fifth year when, taking dinner at a friend's house, he met young, pretty and widowed Martha Custis. He could fix none of his attention on eating because he had concentrated it all on the alluring widow, whose invitation to tea for that evening he fervently accepted, says the Detroit News.

He left her home late that night only to reappear there early the next morning. Before noon they were engaged, and in a few days the "knot was tied," Martha in silk and satin, laces and brocade, with pearls around her throat and in her ears—and George in blue and silver, trimmed with scarlet, and with gold buckles at his knees and on his shoes.

Immediately following the ceremony they left for Mount Vernon, the bride in a "coach and six," and the bridegroom on horseback, riding proudly alongside.

Age-Old Fashions in Hairdressing.

Hair naturally grows outwards in all directions, and the first man who found it falling in front of his eyes and brushed it aside must have been the first man to "part" his hair!

Coming to ages, of which we have some definite knowledge, we find hairdressing in different fashions as far back as there are writings or monuments to record anything at all. So plaiting, which implies parting, is mentioned in the Bible. The Babylonians and Egyptians cultivated rows of elaborate curls, while the Greeks and Romans were short clipped.

Our modern parting dates back about 120 years. Before that gentlemen wore wigs over their own close-cropped polls. Wigs went out and since the close crop too nearly resembled the convict, hair was allowed to grow and parted as it is at present.

Salt, One of Necessities of Life.

Salt enters so largely into our physical makeup that, to compensate for the daily loss occasioned through perspiration and so on, we must have salt or die.

There are, of course, cases where an absolutely saltless diet has been temporarily prescribed for certain diseases, but, on the whole, the scientific rule is that human life is impossible without salt.

In practice, however, a good many savage races of mankind do live without salt, and even Europeans, forced through some particular circumstances to do without it, have managed to live. In reality, they have all the time been taking salt, not consciously as a separate article of diet, but in other forms contained in their food.

SCHOOL NEWS.

The following girls are taking the Foods Course in the Home Economics department of the high school: Mildred Tomlinson, Edna Simonson, Lillian Simonson, Ruby Haney, Florence Cleish, Francis Davidson, Marguerite Hough, Alice Myer, Irene Peter, Alfreda Greseck, Ardis Downey, Behia Abdouch, Dolly Springer, Mary Knapp, Ethel Anderson, Lenore Cleary.

The girls have been learning the principles of food preservation and applying them in the making of pickles and chili sauce, and in the canning of peaches and tomatoes. The tomatoes were canned by the open kettle method and the peaches by the "cold-pack" method. Next week the girls will have a lesson on jelly making; thereby completing the application of the various principles in the preservation of foods.
