county was good, but the corn did not a draw or ravine. The roads were hill; he told me it took him two hours give promise of more than half a muddy and all through Kansas were to climb the hill. not very well kept up.

mostly wheat straw, some cane and are a great many Mexicans here. We then went on to St. Ewdard corn fodder and some millet. I have The capitol buildings are beautiful we had on our rip.

this trip we crossed the fertile valley of the Loup and drove about one southeastern Colorado. Here we saw up after they are built.

We drove a little over one day in voads, but they do not keep the roads everything we had along. After two days house ley of the Loup and drove about one hundred miles up the Plate river valley. Much of this is irrigated and we saw many alfalfa stacks. The corn did not look very good at I much of it showed the effects of frost damage.

At Elm Creek they thought that corn would be about half a crop and told me that the small grain crop was above the normal for that power of the saw that the small grain crop was above the normal for that normal for the formal for the saw the gate of the state from corner and only saw them dragging the roads in one place, while the saw that I located a three room bungalow that I we crossed the state from corner in one place, while the roads in one place, while the roads in one place, while the roads in one place, whil told me that the small grain crop was above the normal for that part of the country this year.

If arm buildings and silos. There were this is one of the masterpletes above the normal for that part of the country this year.

This is one of the masterpletes of the five years to build the dam and the been taken off. We then came to the peer taken off. We then came to the country this year. From Elm Creek we drove to Nor-catur, Kansas, where we stopped with Mr. and Mrs. S. D. Gallentine. At this Colorado. We did not stop to look Country irrigated by this project as

looked dry and as we were getting pass between Woolton, Colorado, and out of the corn belt the country look- Raton, New Mexico. Here we reached million dollars worth of silver out of fee and 45 cents postage to vote this

towns along gave evidence of crops of some kind and I was informed that the wheat crop was good both in quantity and quality this year.

I had always heard of the carburator troubles in the mountain altitudes and by some accident got my carburator set about right the very first change I made with it. We passed a great many cars stalled on the hill. Some men were underneath draining yasoner, of Arnold. At this place it Yasoner, of Arnold. At this place it

That night in the tourist camp a man it is a costum to put up feed for Our first stop was at Neligh where we visited my uncle, Wm. Bartell and into Colorado. This was one level car stopped. He had passed me early evident the stock will have to depend family. The small grain in that road for one hundred miles, not even in the day and I passed him on the on this barren range for winter susta-

The next place of interest was

the impression that the farmers of being built of a yellow stone, the city this section are having hard times. had a splendid tourist camp, but The crops in this vicinity were this section are having hard times. had a splendid tourist camp, but cousins place very easy and we took as a charged \$1.25 for the night, giving us a good rest after washing and clean-

town Mr. Gallentine informed me there was an oil boom on, that several car loads of material had been shipped in and that they were going to start drilling for oil there soon.

Colorado. We did not stop to look through any of these mines, but could our route took us west from there.

A great many have their gardens in but the Japanese and Mexicans raise ley. This used to be a silver mining garden truck and sell it so cheap that town in southern New Mexico. One of the address there to the pays one to raise their own the country irrigated by this project as coun of the old residents there told me this garden.

We next came to our first Mountain had been a lively little town at one ed more barren than ever to me. How-ever the number of elevators in the foot hills of the Rockies.

Itele we reached infinion donars worth of street were and that there were seventeen saloons in the town at one around and formalities connected with

rained nearly all night which was a gas lines, some were waiting for calves running with them this sum-Armistice Day was observed by the Armistice Day was observed by the Legion in this city last Tuesday. A confetti ball was enjoyed during the evening.

In this city last Tuesday afternoon, October 28, just to weeks from the day we left home. The business section of the city was and friends so did not get to the fair wheat crop. Practically all they raise here is wheat, some oats, but the oats was a poor crop this year.

The business section of the city was and friends so did not get the fair wheat crop. Practically all they raise here is wheat, some oats, but the oats was a poor crop this year.

The business section of the city was from home. The business section of the city was and friends so did not get wheat, some oats, but the oats was a poor crop this year.

The business section of the city was and friends so did not get wheat, some oats, but the oats was a poor crop this year.

The business section of the city was and friends so did not get wheat, some oats, but the oats was a poor crop this year.

The business section of the city was and friends so did not get wheat crop. Practically all they raise here is and draining the carburators. There were large and draining the carburators. There were large and small cars alike.

The trip and is the last visit we made. We were a little over four hundred wheat crop. Practically all they raise here is and draining the carburators. There were cleaming made and draining the carburators. There were large and draining the carburators. There were large and draining the carburators. There were cleaming and draining the carburators.
