Meteorologists Study Sun Spots In Hope of Forecasting Weather

From the Chicago Journal of Commerce

Of an importance beyond all estimate is the theory which well-known scientists assert to be true, that the weather of the earth is affected by sun-spots and that a study of these spots will permit long-distance weather forecasting.

Business would be affected immeasurably by such forecasting. The growers of crops would be immensely benefited. Men at sea and on inland waters would be enabled to avoid great storms. Man knows the weather as a whimsical power, coming and going as it will. If he could only foresee how and when it will come and go, his life would be made much easier.

Nor would this be the sum of his benefit. If we should learn how sun-spots affect the weather, is it not conceivable that we should succeed in learning how to offset the evil effects of the sun-spots? Artificial control of the weather would seem to be by no means impossible.

Sponsor for the sun-spot theory is Dr. C. G. Abbot, head of the Astro-Physical Observatory of the Smithsonian institution. As he presents it, it is more than a theory; it is a demonstrated fact. Dr. Abbot reveals that for more than a year the Smithsonian institution has been conducting experiments which have permitted accurate weather forecasts for New York to be made three days in advance. According to Dr. Abbot, approximate temperatures have been accurately predicted for periods of from fifteen to twenty-five days ahead.

Although Dr. C. F. Marvin, head of the weather bureau, believes the results of the Smithsonian experiments are so far too inconclusive to permit their use in the making of regular weather forecasts, Dr. Abbot finds nothing inconclusive in the experiments.

Every day the Smithsonian institution receives telegraphed reports from two sun observatories which have been established, one on Mount Harqua, Hale, Arizona, the other at Montezuma, near Calama, Chile. By use of recently devised instruments, Dr. Abbot says it has been possible to measure solar radiation.

These measurements, as well as daily observations of sun spots, are telegraphed to the Smithsonian institution, which has found that the curves of solar radiation have a definite relation to temperature and barometric pressure. The effects are not the same everywhere on the earth. The institution declares the earth has two zones, on one of which the effects of the curves of solar radiation are precisely opposite to the effects of those same curves in the other zone.

The authenticity of these statements is of course not beyond dispute. But the statements have been made by leading men of science and are worthy of serious attention.

TODAY

BY ARTHUR BRISBANE

A Zulu chief, with huge war shield covered with zebra skin lashed to his back, muffer wide open and a proud look on his black face, went to greet the Prince of Wales in South Africa, riding a motorcycle.

That would have interested the old Zulu king that died in exile, a prisoner of the British. It also interests this question:

What will be the power of the races we see pleased to call savage or barbarous when they learn the use of all our modern machinery for conquering distance and conquering other human beings?

Fifty years from now every Chinese and Japanese boy, 15 years old, will be able to run a flying machine if the Mikado's advisers and the powerful men of China wish to have it so.

Those that call themselves the higher races have been protected by the fact that human beings have been fastened to their corner of earth by the power of gravitation.

When you see a Zulu chief flying Persons who pay cash may get their only profit out of satisfaction, but they are never bothered by bill collectors.—Flint Daily Journal.

Another kind of jay walker is the man who feels so badly that he walks into a falling stock market.—Anacanda Standard.

An earthquake broke up a ball game in the Canal Zone, showing plain enough that the Canal Zone is not yet a part of the nation.—Syracuse Herald.

Moving on May 1 is one way of carrying out the winter ashes.—Detroit News.

through the African sunlight on a motorcycle, and realize that any average human being can be taught to run a flying machine in eight hours, you wonder how long "white supremacy" will last.

One thing is certain, white supremacy will not last if the white people fail to keep themselves prepared.

S. W. Straus, who has done more than any one man to stimulate building in the United States, declared that during 1925 the United States building program will amount to \$6,000,000,000.

If you own any land you will be interested in the advice that Mr. Straus constantly gives to younger men, "get some real estate, and when you have got it, keep it." Nobody has any conception of the future value of real estate well chosen in the great cities.

Abd-el-krim, chief and ruler of the Rif, is preparing for heavier attacks on the French. Abd-el-krim, if alive, will be a sadder and wiser man in a few weeks.

The French can easily withdraw their men on foot from range of Abd-el-krim's guns. That they will do to avoid making good Frenchmen tar-

A Job for Two.

From Youth's Companion.

In the recent drive to raise money for the Radcliffe college endowment fund, an alumna of that college employed her nephew and another small boy to sell some excellent toilet soap among the homes in their neighborhood. "Why are you selling this soap?" inquired a woman at a house in Johnny's district.

"To raise three million for Radcliffe," was the prompt reply. "Three million dollars!" the woman exclaimed, amused at the youngster's seriousness. "And are you going to raise it all by yourself?" "No, ma'am," said Johnny, smiling brightly, "there's another little boy helping me."

gets for barbarian bullets.

Then, at their convenience, they will fly over Abd-el-krim's territories and drop persuasive arguments in the way of gas and explosives.

Those Ruffian warriors of North Africa have plenty of courage and some intelligence. They descend from the men that conquered and ruled Spain and nearly conquered the whole world.

But in their war with France, after, perhaps, a few deceptive "victories," they will find themselves as helpless as our Red Indians were with their bows and arrows against the guns of the white men.

The Rev. Dr. Stratton and some big men in his congregation believe that the church should be made usefully self-supporting.

They planned to mortgage their valuable church property in New York City, build where their church now stands a great skyscraper that would be a church and at the same time a money making institution.

Now conservative members of the congregation secure an injunction and Dr. Stratton, until further orders, cannot build his self supporting church.

Wouldn't it help religion to prove that the church can adopt itself to modern conditions, and in an age when the test of everything is ability to make money, prove its money making ability?

When in New York, you see Trinity church. Looking east down Wall Street toward the river, you see a church entirely surrounded by gigantic buildings that tower above it, as the furniture in a room towers above the houses from a child Noah's ark!

In this material age it might add to the prestige of religion if Trinity church were torn down and a skyscraper, 75 or 100 stories high, dominating all others, were made to take its place.

R. F. Hoyt's fast boat, the "Teaser," raced from Albany to New York against the fast Twentieth Century railroad flier. The boat beat the locomotive by 20 minutes. Old fashioned ideas have held back the speed of boats. With the right size, shape and power, a speed of 150 miles an hour should be reached easily.

Senator Borah wants the world to outlaw war as a crime. He thinks that would be effective. But would it? This country, with a constitutional amendment, has outlawed worse whisky than the country ever had, and plenty of it.

Merely outlawing a thing does not necessarily end it. Read the history of bold Robin Hood. You can't change men by law.

BIG CITY "HICKS"

By Chester Rowell.

If you seek suckers, hunt them in the haunts of the hard-boiled. More gold bricks are sold in Wall Street than were ever peddled in Podunk.

It was not in rural Milpitas, but in sophisticated Los Angeles, that two talented conversationalists got \$300,000 from movie and automobile magnates, public finance commissioners, investment brokers, high officials and similar "hicks," all on their mere promise to return 10 for one whenever they succeed in merging \$6,000,000,000 worth of railroads.

That is where they grow: the hicks—where the white lights glow, the ticker clicks, and everybody knows it all. Uncle Reuben reads his farm paper, and is wise. The easy mark is the one who thinks he is smart enough to beat the game. The tough nuts crack quickest.

How the Rumer Started. From the Progressive Grocer. "I confided the secret of our engagement to three of my dearest friends." "Three all told?" "Yes, all told!"

Evening classes for plasterers are held four evenings a week in the Buckman school of Portland, Ore. The first part of each evening is devoted to technical planning and designing. After this the men go to the basement of the school, which has been divided into small rooms, and there they spend about two hours in the practical work of plastering.

Artificial "milk" made by dissolving wood pulp and cotton linters is now talked "rayon."

Yeast Foam makes good bread

Dutch Cows Given All the Comforts of Home

The bovines are the only type of animal that furnishes man with food through infancy and maturity and consequently are treated with consideration by every nation for sentimental as well as economic reasons, receiving greater care than humans in some countries. Cows in Holland are treated with as much consideration as human beings. They have the best of food. Their sheds are furnished. They even have overcoats when they go out. There are lace curtains in the windows of many Dutch cowsheds. And the floors are laid with shining white tiles, kept spotlessly clean. Lest her tail should drag in the dirt, the Dutch cow has it held up by a neat chain from the roof. Her horns are scrubbed and polished.

She is carefully groomed. She spends eight months of the year indoors. To lighten the darkness of winter the cowshed is provided with electric lights. There is also some kind of heating system.

Red Herring Across Trail

This phrase, originally "to draw a red herring across the track," is frequently heard in everyday speech to signify a means used to divert one's attention, to throw one off the scent by injecting into the matter in hand a new object upon which the attention is then focused.

The expression dates back to the Seventeenth century for its origin, being a survival of the old practice of sportsmen to draw the carcass of a cat or fox or a red herring across the track in training dogs for hunting.

The uniqueness of the phrase made it stand out, and it soon became popular in the figurative sense in which it is used today.—Jean Newton in Chicago Journal.

Novelty, to Be Sure

Helen has spent the morning in the dentist's chair. Doctor Dentist had kept her mouth open for so long that when the child tried to relax her facial muscles she found it extremely difficult. "Doctor," said Helen, "my mouth feels so stretched I feel like I could whisper in my own ear."

Just Ahead

"What is the happiest day of one's life?"

"Tomorrow."—Boston Transcript.

Fool questions beget fool answers.

Let Tanlac restore your health

If your body is all fagged-out and run-down, if you are losing weight steadily, lack appetite, have no strength or energy—why not let Tanlac help you back to health and strength?

So many millions have been benefited by the Tanlac treatment, so many thousands have written to testify to that effect that it's sheer folly not to make the test.

Tanlac, you know, is a great natural tonic and builder, a compound, after the famous Tanlac formula, of roots, barks and herbs. It purges the blood stream, revitalizes the digestive organs and enables the sickly body to regain its vanished weight.

You don't need to wait long to get results. Tanlac goes right to the seat of trouble. In a day or so you note a vast difference in your condition. You have more appetite, sleep better at night and the color begins to creep back into your washed-out cheeks.

Don't put off taking Tanlac another precious day. Step into
