We will get you Big Prices and Big Fills. We believe that we can more than please you. A trial from you will mean more business for us."

CORN BELT COM. CO.,  
South Omaha. 10-1f

## ARE YOU GOING TO GET MARRIED? IF NOT, WHY NOT?

The merchants and business men of O'Neill will donate cash and useful articles amounting to about \$200 to the couple that will get married in front of the Grand Stand at the Holt County Fair on Wednesday, September 23, at 3 p. m.

The Fair Association will furnish the Minister. First come, first served. All letters strictly confidential.

Send your name to John L. Quig, Secretary, O'Neill, Nebr. 13-2

## PETER HANSEN FARM HOUSE TOTALLY DESTROYED BY FIRE

(Atkinson Graphic.)

The farm home of Peter Hansen, south of Holt creek, was burned to the ground Wednesday, together with the entire contents.

The members of the family were all absent from the place and in Atkinson doing their trading at the time and were unaware of the disaster to their home; and did not know how the fire could have started.

As to whether Mr. Hansen carried insurance or not, The Graphic is not informed.

## Things to Remember About Your License

Quite a few amateurs have complained that they had to go through a re-examination for a renewal of their operator's license.

There are a few points to consider in this connection. First is to watch the expiration date and the second is to get three amateurs to write that your station was heard on the air within the three months prior to your application for renewal.

The license will then be renewed without trouble, but if you wait until it has expired an examination will be necessary.

Also remember that you are never notified about expirations so that you must watch both your operating and station licenses.

## Method of Eliminating Some Capacity Effects

A handle for turning the knobs may be made from a wooden dowel rod one-quarter inch in diameter and about twelve inches long. A pencil eraser attachment designed to fit over a pencil end is slipped on one end of the rod. This provides a vernier that is

as good as any on the market. The adjustment was secured by putting the eraser end up to the edge of the dial and slowly twisting the outer end of the rod. Before using, the eraser should be tapered with sandpaper.

## That Oyster of Oysters

By S. M. WILDHOLT

(© 1925, Western Newspaper Union.)

MEREDITH GRIMWELL grinned literally from ear to ear. His huge, jovial features beamed benignly on all alike.

But on this rosy morning Meredith's puffed cheeks were slashed by an unalloyed broad smile. His mischievous eyes gleamed wickedly as he tackled the intellectual passivity of Stanley Worth.

"Terribly depressed, Stan," he mourned gleefully. "An 'It's a woman.' Stanley removed a cigar from his lips with deliberate precision. "A woman," he repeated, with elaborate emphasis.

"A woman," Meredith confirmed gayly. "She's a jewel—strong on cats, but one of them dieting kon-o-seers." Stanley half-laughed; knowing Meredith so well, he couldn't be positive that this was the forthcoming joke. "You mean," he felt safe to correct, "she's a dietical connoisseur."

"See here—a letter I got a few days back," said Meredith, "just after we'd been out an' had some oysters—raw."

Stanley took the tinted, folded sheet and read the contents. His face remained calm until he reached the signature, when a brief arch of his eyebrows betokened recognition.

Dear Dith: So enjoyed seeing you enjoy those oysters. It was a real treat. Your delightful, ingenious pleasure was more than refreshing. But you like oysters so well—did you ever hear of the Eocene oyster? It's a marvel, indeed. I try to imagine an Eocene oyster reposing lusciously within your sensitive, experienced mouth—try to picture the real enjoyment your face must reflect when you contentedly munch that oyster of oysters—really, Dith, the prospect intrigues me. If only you could obtain one Eocene—but no; it is too much to hope, dear boy.

As ever,  
CELIA R.

That signature, "Celia R.," altered matters for Stanley.

"Well," urged Meredith, seeing that Stanley had finished, "did you ever eat an Eocene oyster?"

Stanley hesitated, vaguely puckering his brows. "No," he said slowly, "I don't believe I ever did."

"Imagine!" rambled Meredith exultantly. "Not a waiter, not a chef, not a soul I've met can tell what an Eocene oyster really is like. But Celia, ah!" He rolled his round eyes angelically ceilingward.

"This dietical connoisseur," hinted Stanley. "Has she—is she otherwise as great a genius?"

"Oh, sure," granted Meredith, with wide generosity. "She really likes me, too."

Stanley pondered mentally, wondering for what under the healthy sun Celia R. could have come to "like" Meredith Grimwell in so startling a manner. The last time he had seen her—a dazzling light broke through the cloudy membranes of his thoughts. She had said, "You think you are so intellectually aloof, Mr. Stanley Worth. Let me warn you that if ever any of your dear friends come within my reach—and she had shrugged her white-powdered shoulders in resentful hauteur.

"Don't you think," asked Stanley, feeling his way with extreme care, "don't you think you might be mistaken about her liking you?"

"Oh, no," with bland assurance. "We have so many tastes in common."

Stanley half smiled, but with a trace of pity. "Would it—hurt—so very much—if you should be mistaken?" he queried slowly.

Meredith looked at him with a startled expression. Then he laughed with all-permeating jelly-shakings, a laugh that reached every nook and cranny of his robust person. "Easy come, easy go, Stan," he replied blithely.

Stanley heaved a profound sigh of relief.

"Now tell me," demanded Meredith, "tell me what an Eocene oyster really is. That's what I came for, you know. I hate to parade the name without somethin' back of it."

Stanley led the way to his well-provisioned library.

"Didn't know you invested in cook books," ventured Meredith slyly.

"I didn't," briefly gruff. "Eocene oysters don't grow in pantries."

Meredith produced the pink-tinted letter. "It's spelled E-o-c-e."

"I know," said Stanley. "But read that over again. Note very carefully what she says about the oyster, where she imagines it to be, how she thinks it will look."

Meredith looked at his friend in a puzzled, baffled way. He referred to the letter—"reposing within your sensitive, experienced mouth—"

"Enough," interrupted Stanley, lifting a book from a shelf. He blew off a tiny cloud of dust. "Are you ready?" he asked, thumbing to "E" in the index.

"Shoot?"

"Well"—Stanley paused dramatically. "An Eocene oyster is known only as a fossil. It lived in Eocene time, a period of geological history." He paused again, to favor Meredith with a conciliating eye. That worthy was scrutinizing the ceiling, an incipient ear-to-ear smile curving at the corners of his wide mouth. "An Eocene oyster," Stanley went on, "is thirteen inches long, eight inches wide and six inches deep."

The incipient smile broadened, and Meredith slapped his thigh. "Bull's eye!" he exclaimed bolsterously. "Thank you, Stan, old boy. I had begun to suspect. And I always heard a sense of humor would kill any romance!"

## Hints to Amateurs Who Wind Their Own

Here is a hint for those amateurs who "wind their own" coils for variocouplers, variometers, etc., on cardboard tubes. We have all been warned time and again regarding the ill effects following the shellacking of such coils to keep the wire in place after it is wound, the said ill effects being capacity or a condenser-like action between the wire and the shellacked covering, which causes a certain degree of choking of the signals.

This difficulty was overcome in the following way: The cardboard tubes are thoroughly dried in a warm oven and then given a coat of shellac both inside and out. As soon as this has dried the outside is given another coat. This should leave the surface quite glossy.

The wire is then wound in the usual manner, the ends being secured through holes in the edges of the tube. The wire is then "painted" with wood alcohol, which the covering absorbs greedily; then the coil is set away to let the alcohol evaporate. Keep it away from fire. The alcohol softens the shellac and this in turn sticks to the cotton covering of the wire where it is in contact with the tube. It will be found that the wire is held securely enough for couplers and variometers also the rotors of these, but not for tuning coils with which a slider is used.

## Grid Leak Takes the "Fry" Out of the Set

The amateur who has a one or two-stage audio frequency amplifier on his set is well acquainted with the hiss or frying sound it gives forth when operating at its best or highest capacity. By placing a grid leak across the secondary of the last amplifying transformer nearly all the frying and hissing noise can be eliminated without noticeably reducing the signal strength.

When static is real bad the strength of the leak can be increased to where it will take the harshness out of the static, but it will reduce the signals somewhat.

The ordinary grid leak consisting of pencil marks on a strip of paper can be used, but best results are secured by making these lines with ordinary black drawing ink.

## To Make a Mounting for "W. P. 11" Tube

It is in some places impossible to purchase a socket for the "W. P. 11" tube (generally called the "peanut" tube) at any price.

With a piece of bakelite three inches square, four binding posts and some spring brass wire one can be made. The spiral part of the wire is

bent around a six-penny wire finishing nail firmly held in a vise for the three small contacts, and the one for the "grid" contact (which is larger on this tube) is bent around a twenty-penny spike.

The inside of the coils is brightened with a rat-tail file to insure contact.

This socket works perfectly, and the natural springiness of the wire takes up any sudden jar.

## SHORT CIRCUITS

The successful radio amateur is generally a man of parts.

An eastern radio club wants a suitable design for a club pin. How would a crystal set in platinum do?

Doctor De Forest says that radio has fired the imagination of youth. We know some youths whose imaginations might well be fired.

When your ice bill comes in, don't grumble. Think of the fellow who has to provide for the wide range of the radio broadcast.

If the loud speaker on your radio is unsatisfactory, how would you like to have a desk next to a fellow who yells all day over the telephone?

A loading coil is an inductance connected in the antenna circuit to receive longer wave lengths than the natural wave length of the antenna.

A man buys a radio set, not so much to hear a great orchestra, but to tune that orchestra in and out and thereby show the musicians that they have nothing on him when it comes to bringing out harmony.

A prominent government official writes that the poor quality of music furnished by the smaller radio stations is handicap to radio development in the smaller towns. He believes that by redistributing the output of the high-grade stations much better progress will be made.

## Slanguage and Language

Slang is perpetually changing, language much more slowly. The common spoken language of any one period, is, as it were, the melting pot from which the pure gold of its literary language is distilled. The slang, having contributed its quota, dies, but the literary language lives on. It has emerged from the crucible pure coin for ever. Any great language, such as Greek or Latin, is eternal, for in the hands of a master it becomes a thing of power, a vehicle for the living truth. And once that truth has poured through it, it is immortal, a radiant garment of thought, no longer the tongue merely of merchants and artisans, but the speech of gods and heroes.—Nineteenth Century.

## Fools Himself

Why is it that a woman can make a fool of a wise man and a wise man of a fool? She can't. It is true that a wise man often makes a fool of himself about a woman, but it is his own vanity and egotism that betray him into folly. For instance, it is a common thing for an old man with a huge fortune to marry a girl young enough to be his granddaughter. In such cases the man lulls himself into the belief that he is so handsome and attractive that a girl prefers him to a boy of her own age. But it is self-conceit—not the girl—that does the trick.—Family Herald.

## What Else Was There for Millicent to Do?

When Mrs. Gray came home Millicent met her at the door; she seemed bursting with news.

"Mother!"

"Well, dear?"

"What do you think Robert and that Jones boy did this afternoon?"

"Why, nothing bad, I hope—"

"Mother!" Millicent paused impressively. "They went and they built—a fire! Yes'm! With kerosene! Out behind the chicken coop where you told 'em they never, never must!"

"Millicent! Your little brother! Why, he might have—but why didn't you stop him?"

"Mother, told him, and I told him, and he said he would too, and I took him by the shoulder and shook—"

But Mrs. Gray was seized with a sudden suspicion. "Millicent, you know I keep the kerosene locked in the storeroom, and Robert doesn't know where I keep the key. Look me in the eye, Millicent. How did he get that kerosene?"

Millicent's eyelids flickered. "Well, you see, mother—er—when I saw that Robert and that Jones boy were determined to build a fire, why—er—I had to get the things for 'em, didn't I, and superintend 'em, didn't I?"—Youth's Companion.

## His Gratitude Greater Than His Knowledge

A Filipino boy who had studied English in a Hawaiian night school sent the following letter to a white man who had befriended him and who had made him a present of some pictures and a shirt:

"I received your kind and welcome letter from you, so, I in it, I was very, very glad to hear from you that you so stated at present in good health and fiscal condition. At the second how glad I am and your sister that you were received of our picture in that brilliant afternoon, and so, by this time we were very pleasant that you will keep it so well the same as our bodies always talking and caring for you here. And so, even that picture is not very personally playing of your spirit so, be carefully like so as you body. About the shirt is coming to in my hand, I full of joy and a merry heart so that you did not forget of your promised to me, and now, it is very thanking at the heaven and you of your truly remember and present of this your brother did not know how to forget asking of God at the heaven that he always caring and protecting to you here day and night and far of badly misfortune."—Pathfinder Magazine.

## ROBERT KLINE, FOUR, DIES OF PTOMANINE POISONING

(Atkinson Graphic.)

Robert, aged four, little son of Mr. and Mrs. V. G. Kline, of Ewing, died Friday the 7th inst., at the Campbell hospital in Norfolk from ptomaine poisoning, taken from canned meat, as near as can be determined.

Funeral services were held Sunday at the Methodist church in Ewing. Interment was made in Woodlawn cemetery, Atkinson, at ten o'clock Monday forenoon, preceded by a short service conducted by Rev. Clinton Senneff at the J. H. Wahl home.

## NOTICE TO CONTRACTORS.

The City of O'Neill, Nebraska, will receive sealed bids for the furnishing of material and construction of a concrete gutter, ten feet in width, on Fourth Street, in front of Lots 21 and 22 in Fahy and Gillispie's Subdivision of Lots 14, 15 and 16, in Block 9, in the Original Town of O'Neill, Nebraska, and in front of Lots 1, 2, 3 and 4, in Block 15, in the original town of O'Neill, Nebraska; and for the furnishing of material and construction of a concrete curb to said gutter. Said gutter to be six inches deep, the bottom five inches on which are to be composed of a mixture of five parts of gravel to one of cement, and the top inch of said gutter to be composed of a mixture of two parts of gravel to one of cement. All bids to

include cost of necessary excavation to place such curb and gutter on grade to be established by the City Engineer of O'Neill, Nebraska. Each bidder shall submit with the bid a certified check for 10 per cent of the amount of such bid payable to the City of O'Neill, and the person to whom the contract is awarded shall be required to furnish bond in the amount of such bid for the construction of such work and payment for all material furnished and labor performed on such work. Bids shall be filed with the City Clerk not later than seven o'clock P. M. on September 16, 1925. The City reserves the right to reject any and all bids. The estimate for such work is as follows:

"ESTIMATE.  
I estimate the cost of gutter, ten feet wide, in front of Lots 21 and 22 in Fahy and Gillispie's subdivision of Lots 14, 15 and 16 in Block 9 in the Original Town of O'Neill, Nebraska, and in front of Lots 1, 2, 3 and 4 in Block 15 in the original Town of O'Neill, Nebraska, to be 21 cents per square foot. Cost of curb in front of said lots 75 cents per running foot.  
M. F. NORTON,  
City Engineer."  
CITY OF O'NEILL, NEBRASKA.  
ED. T. CAMPBELL,  
City Clerk. 13-3

## (First publication Aug. 20.) LEGAL NOTICE.

Jane Crowe and all persons having or claiming any interest in Lot 6 in Block 25 in the Original Town of O'Neill, Holt County, Nebraska, real names unknown, defendants, are notified that on August 17, 1925, Ed. L. O'Donnell, plaintiff, filed a petition and commenced an action in District Court of Holt County, Nebraska, against you, the object and prayer of which are to have plaintiff decreed to be the owner of Lot 6 in Block 25 in the Original Town of O'Neill, Holt County, Nebraska; to have the title to said premises quieted in plaintiff; to have you decreed to have no lien upon or interest in said premises; to have a mortgage of \$100 dated August 9, 1889, recorded August 12, 1889, in Book 49 of mortgages at page 112, decreed to be fully paid and to be barred by the statute of limitations of Nebraska and to be no lien upon said premises; to remove the clouds cast upon plaintiff's title to said premises by reason of the claims of defendants; and to have you forever enjoined from asserting any lien upon or interest in said premises.

You are required to answer said petition on or before September 28, 1925.

ED. L. O'DONNELL,  
Plaintiff.  
12-4

## (First publication Aug. 6.) NOTICE TO CREDITORS. Estate No. 171.

In the County Court of Holt County, Nebraska, August 6, 1925  
In the matter of the Estate of Mary Harrington, Deceased.

CREDITORS of said estate are hereby notified that the time limited for presenting claims against said estate is December 3, 1925, and for the payment of debts is August 6, 1925, and on December 4, 1925, at 10 o'clock A. M., each day, I will be at the County Court Room in said County to receive, examine, hear allow, or adjust all claims and objections duly filed. (County Court Seal.)  
C. J. MALONE,  
County Judge.  
10-4
