Yellowstone park has a vocabulary all its own and tourists visiting it the first time have many surprises in store for them. An automobile driver is never a chauffeur in the park. He is a "gear-jammer." A waitress is always a "heaver," and a cook is known only as a "meat-burner." Most of the employes in the hotels and camps of the park are students. Twenty universities and colleges are represented among the hundreds of waitresses and housemaids working in the big hotels and camps. There are also many school teachers among the women employes, and this year most of these motored to the park in their own cars. The chauffeurs and other men employes of the transportation and hotel company also came chiefly in their own autos. Many of the students motored all the way from New York, and large numbers of them came from California.

Bold Sailor Men.

From the New York Post. Vikings may no longer roam the seas, but the viking spirit burns as brightly as ever. Undaunted by the fate of the yawl Leif Ericson, which left Iceland for Nova Scotia a year ago and was never heard of again, three sturdy Norwegians embarked on a 45 foot yawl and after 73 days have arrived in this harbor none the worse for their unusual experience. They had expected to cover the 3,500 miles in 45 days, but they ran into weather which at times was so rough that they had to heave to and throw out a sea anchor astern to ride out the storm. Steam, electricity and gasoline have revolutionized transportation since the days when the Northmen fearlessly set sail for all points of the compass, but even the feats of the airmen cannot dim the glory of those who entrust their lives to man's oldest form of artificial locomotion—a plank and a sail.
