THOUSANDS OF PLAYERS IN BIG FILM UNDERWENT PHYSICAL TEST

It took people with strong hearts to film "The Trail of '98," Metro-Goldwyn-Mayer's big northern film epic now being shown at the Royal Theatre.

When Clarence Brown was assigned to direct the picture he foresaw the great physical hardships to which the cast would be subjected, so he sent out an order that all players would have to pass a rigorous physical examination before being permitted to sign for the production.

One reason for this was the fact that a month was spent on location in Colorado, at an altitude of 12,000 feet, in the dead of winter, with blizzards the order of the day and a wind with an average velocity of forty miles an hour.

More than 3,000 people were used on this location and every one of them had a medical certificate that he was physically able to stand the strain of such a trip. Several of them went on the operating table for minor operations before they could get a certificate.

The leading roles of "The Trail of '98" are played by Ralph Forbes, Dolores Del Rio, and Harry Carey.

EDUCATIONAL NOTES.

(From last week.)

There has been a change made in the Census Blanks since last year. Every Director or Enumerator should be very careful to list all children, especially those between the ages of 5 and 21 years whether married or single, since the apportionment for next year will be figured from this year's census report.

District No. 120, Helen Shirek, teacher, report that they planted eleven trees on their school grounds on Arbor Day.

District No. 148, Clara Gathje, teacher, report that the pupils are enjoying work with a "Model Store" which has recently been purchased.

The Boy's and Girl's 4 H Club work is a national project sponsored through an act of the United States Congress known as the Smith-Lever Act. Any boy or girl from 10 to 20 years of age is eligible to membership. The object of the 4 H club work is three-fold: First—To impart information of sound principles in agriculture and home making to our boys and girls; Second—Activities of Club members are demonstrated in communities where they live. Work is observed by parents and people in the community and in many instances is very valuable; Third—Through activities of the clubs character and local leadership is developed.

The pledge of the 4 H Club is:

"I pledge my head to clearer thinking,
My heart to greater loyalty,
My hand to larger service,
My helath to better living,
For my club, my community, and
my country."

The national motto of the club is—
"Make the best better."

There are hundreds of thousands of clubs throughout the United States. In 1928 there were 837 clubs with 8,653 members in 79 counties of Nebraska. We feel that this is a very valuable project for the education of our boys and girls.

LUELLA A. PARKER,
County Superintendent.

PLEASANT VALLEY NEWS.

Katheryn Grass visited in Page Thursday evening.

George Fink visited Sunday at the Claude Hamilton home.

Clyde Streeter called at the Ralph Prill home Thursday.

CARD OF THANKS.

Many neighbors and friends were so good to us during the last illness of our little son, James. We are very grateful, and in this public card we express our thanks to each and all for their kindness in form of words, deeds or flowers, and especially to his school teacher, Miss Ireneia Biglin and his classmates.

Mr. and Mrs. A. W. Barnes.

WALTER P. CHRYSLER'S TRAFFIC TALKS

SPRING HOUSECLEANING

After a winter of chains, anti-freeze mixture, and snow with its accompanying hardships to engine, batteries, tires, body-bolts and steering gear, not to mention the fan belt, and ignition system generally, the car needs overhauling. Most service stations offer a spring overhauling at a nominal lumped cost, but if not it behooves the careful driver to check up on the general conditions of his car. Here are a few items which need attention at this time.

The wheels should all be taken off, cotter pins replaced, valves inspected, tires switched to gain uniform wear and alignment cared for.

The radiator should be drained and flushed several times and filled with fresh water. The fan belt should be tightened and the water pump oiled and watched for loose connections. Rotten or badly attached hose often causes leaks.

Brakes should be inspected and additional measure put in hydraulic brakes if necessary. Goose necks and steering knuckle should be oiled thoroughly.

Loose body bolts should be tightened and a thorough oiling given to all parts of the car. See that the rear end and transmission are thoroughly oiled.

Inspection should be made of spark plugs and the engine tested for unusual carbon deposit, possible installation of new rings or dirty ignition units. Have the mechanic blow the gas line clear and see that the gas tank and line to the vacuum tank are free from dirt. Cars with an oil cleaning system should have a new cartridge installed in the oil filter.

The inside of the car should be gone over with a good cleaner, new slip covers bought, if wanted, and all buttons on top and side curtains replaced if missing.

Don't forget your windshield wiper. See that the little rubber connections are in good condition. Danger with a capital "D" comes to the man whose wiper goes back on him during a spring thunderstorm on a dark night.

Does your MOTOR SING or POUND?

STOP in the middle of a good substantial hill and listen to the various sounds coming from motors which are climbing it. Some glide along like song birds—others bellow forth like jazz-crazed saxophones. Why the difference? Simply this—the fuel.

With Conoco Ethyl Gasoline in the tank, your motor literally sings along because Conoco Ethyl delivers a steady, even flow of power—up hill or on the level. It won't knock. Hence, it eliminates that pounding noise—so hard on the ears as well as on the motor.

Being a proper admixture of Conoco, the extra miles motor fuel and Ethyl Brand of Anti-Knock Compound, Conoco Ethyl is the acknowledged pace setter for summer driving. It keeps the engine cool at all speeds—delivers maximum power and assures smooth, quiet running.

And best of all, it more than saves its slight extra cost by reducing wear and tear and by giving you the greatest motoring satisfaction you have ever enjoyed.

Try Conoco Ethyl today.

For a Better Job— in Half the Time

John Deere ND Two-Row Cultivator

Get into your fields with the ND this year! Do your cultivating in half the time it would take with a one-row—make a real reduction in your labor costs, and do a better and easier job of cultivating.

You will be sure to like the simplicity and convenience of the one master lever, by means of which you raise and lower rigs without stopping at ends of rows.

You will appreciate the advantage of the spacing levers and the tilting lever, which are operated

from the seat as you drive. The spacing levers enable you quickly to space rigs the desired distance from rows—the tilting lever enables you instantly to adjust set and such of shovels—a special advantage on hillsides.

The quick, easy dodge makes it easy to follow crooked rows. The ND works all the soil—shovels always cut their full width and kill all the weeds. Knife attachment can be furnished.

Of John Deere quality throughout, this cultivator will prove itself a real buy.

There are other features we would like for you to see. Come in any time.
