**ACCIDENT STATISTICS FOR NEBRASKA**

Of the 245 injured persons, 21 were permanently disabled.

Gun-shot injuries and fatalities went over the top for a high record during this two-week period with 6 serious injuries, 1 disability and 8 deaths.

Football, too, is going strong with 8 serious injuries of which 2 or 3 are probably disabilities.

Of the 25 pedestrians run down by car during the past two weeks, 19 were school children—4 times as many adults as children. This indicates that the chances for school children being struck by autos are 12 times as great as for adults. What do these facts indicate with regard to present programs for safety education in our schools?

If the following six months produce as many accident casualties in Nebraska as have the last 6 months, we will injure 6668 persons, disable 542 and kill 924 in one year by accidents.

Is it any wonder that following the leadership of the Press Association in the publication of the figures, the people of the state are demanding that a state-wide public safety program be undertaken?
