

With the whole United States watching with interest to learn whether the Senate will get through debating the tariff bill before the close of the special session of Congress, it is interesting to go into the gallery to watch them in action.

ORDER OF HEARING OF PROBATE OF FOREIGN WILL

The State of Nebraska }
SS.

Holt County }
In the Probate Court of said County.

In the Matter of the Estate of May Hewitt, Deceased.

On this 19th day of November, A. D., 1929, Edward F. Jones filed his petition in this Court, and presented an authenticated copy of the Last Will and Testament of May Hewitt, deceased, late of the County of Cass and State of Iowa, the prayer of said petitioner being that a day be fixed by this Court for the purpose of approving and allowing said Last Will and Testament, and causing the same to be filed and recorded in this office.

It is therefore hereby ordered, that Thursday, the 12th day of December, A. D., 1929, at 11 o'clock a. m., be fixed for hearing said petition, when all persons interested in said matter may appear and show cause why the prayer of said petition should not be granted; and that notice of the pendency of said petition and the hearing thereof, be given to all persons interested in said matter by publishing a copy of this order in The Frontier, a weekly newspaper printed in said county, for three weeks prior to said day of hearing.

(County Court Seal.)
C. J. MALONE,
County Judge
26-3t.

'Smiling Irish Eyes'

100% Talking, Singing & Dancing LISTEN! "Shure You Don't Have to Ask Why I'm Smiling—There's a Wee Bit O' Love in My Heart"—that's Coleen Moore singing "Smiling Irish Eyes." Singing, not one but three songs. And talking for the first time on the screen. It's worth the price of admission just to hear her voice. It's one of the finest all-talking pictures we have ever shown. Hear Coleen sing "A Wee Bit O' Love," "Come Back to Erin," and "Smiling Irish Eyes." Hear James Hall play the violin. See Coleen dance an Irish folk dance.

Glorious! Glamorous! Brilliant with life and love! Gorgeous scenes in Technicolor! and Girls! Girls! Girls! Heart-breaking romance on a brilliant background of gaiety and laughter. The stage-hit "Burlesque" all talking. An all-star cast. Stage comedians and chorus "queens" in a rollicking sequence of laugh moments. A beauty chorus of 100. Brilliant costumes!

ADMISSION—NIGHTS 10c and 50c
MATINEE SATURDAY—10 & 25c

Many new faces there are, for the last election brought more than the usual number of defeats to those Senators seeking election. Also, there have been two deaths of Senators since the fourth of March, with the resulting appointments to fill vacancies. The last Senatorial death occurred about two weeks ago, that of Senator Burton of Ohio. So notable had been his service to the nation in his long public career, including terms in both Senate and House, that the funeral was held in the Senate Chamber, an honor which had been shown no other Senator for fourteen years. The business of the nation stopped for a few minutes while the President, Vice-President, the Cabinet, Judges of the Supreme Court, members of the Diplomatic Corps, ranking officers of the Army, Navy and Marine Corps, the Senate and House paid him tribute. A statesman of unimpeachable record.

Today, Senator Burton's successor took his oath. In accordance with the custom, Senator Fess, the senior Senator from Ohio, asked the Senator who was debating the tariff bill if he would "yield" for a few minutes. Receiving assent, he asked for the reading of the certificate of appointment of Hon. Roscoe C. McCulloch as Senator from Ohio. Thereupon, Senator Fess stated that Mr. McCulloch was in the Chamber ready

to take the oath. Vice-President Curtis said: "Is there objection to administering the oath? The Chair hears none, and the Senator-designate will present himself and take the oath of office." Senator Fess then escorted to the rostrum the fine-looking Senator-designate, many years younger than the man he was succeeding. The Vice-President administered the oath—doubtless, a much more impressive ceremony for a man to take part in alone than when accompanied by thirty-one others, as is always the case at the opening of a new "Long" session of Congress. The new Senator then signed the oath and immediately held a veritable reception in the seat to which Senator Fess escorted him. Republican and Democratic Senators came up to meet him. They showed the same friendly feeling which they always seem to have for each other, in spite of the very biting and unkind remarks they make in debate.

Other changes were in the seats of the Senators. Unlike the House, the Senate members have assigned seats. Of course, the newer members have to take the seats not already held by the older ones. Consequently, at the beginning of each session, some Senators are able to move up into better positions vacated by outgoing members. Many seem to cling, by choice, to their old seats. Others prefer a

change. Sitting in the gallery, one must wonder whether the Senators, tired out by a long, drawn-out and apparently endless debate on one bill, welcome little diversions as do the gallery spectators. Judging from the fact that as soon as a roll call was asked for, numbers of Senators came into the Chamber from the cloak-rooms where they had been visiting, reading or studying, they are not loathe to think of other things occasionally. Probably, they noticed the two scientific looking men who moved about the Chamber with peculiar pieces of apparatus, taking frequent readings from them. Perhaps they were studying the condition and temperature of the air. Certainly, an altogether too large amount of sickness is suffered by Senators. If any of it is due to impure air, it should be corrected.

Another diversion to the frivolous gallery observer was the Senator with flowing black necktie; another, was one whose large, bald spot was obviously covered with carefully brushed long hairs; still another, was a new mustache which the Senator unconsciously caressed as he debated eagerly; another, was a large, pompous Senator in frock coat and cream-colored vest and, another, one with the ever-present red carnation in his button-hole.

While there are always these and other diversions, the debate goes on. The papers say the Senators are only trying to kill time and gain political prestige at home. But, to one who listens, comes the ring of sincerity, conviction of an eager attempt to bring about conditions more favorable to the prosperity of the home folks. Let us honor them for their efforts.

NOTICE.

I understand that some book salesmen are canvassing the county, giving the impression that I am sending them out and that I am asking school boards and teachers to buy their books. Please understand that I will send out no one, at any time, to any teacher or school board without first notifying teachers or school boards personally. If any teacher or school board buys any books or other articles from agents, they do so upon their own responsibility. Some of the articles and books sold by these people are very commendable and are a very good thing in the school, others are of very little value. If you wish to buy anything of this nature and are in doubt as to its value for your purpose, call me before you make the purchase. Do not allow unscrupulous salesmen to talk you into buying what you do not want or

need.
Signed: Luella A. Parker,
County Superintendent.

Announcing

a revolutionizing Motor Oil, a new principle and a Challenge

the Challenge

Several years ago, the exclusive North American patent rights on the Germ Process were acquired by this Company. It was evolved and patented by two British scientists after exhaustive chemical and physical laboratory tests.

Germ Process oils were revolutionary in that they met every requirement, through special characteristics, for each type of internal combustion motor. These scientists, by the Germ Process, eradicated the prevalent weaknesses existing in motor oils regardless of their base.

This Company has made innumerable laboratory and road tests, under every conceivable condition, over the past seven years, and we are now prepared to state definitely that your motor oil problem is solved by the Germ-Processed Motor Oil.

By comparison, our tests prove that the "Germ Essence" creates the only safe motor oil under all conditions and at all times operates at the highest obtainable efficiency.

We are now prepared to meet any challenge of competitors. I confidently believe that Conoco Germ-Processed Paraffin Base Motor Oils are superior to any other motor oils made from any crude by any process.

More than twenty thousand outlets are now prepared to offer to the public such a motor oil for the discriminating buyer, and for a technical problem which has always been recognized but not solved until now.

J. M. Moran President,
CONTINENTAL OIL COMPANY

Here are our Claims for
Conoco Germ-Processed Motor Oil—
Check against the oil you are now using

1 Under the Germ patents . . . exclusive to CONOCO for North America . . . there is imparted to CONOCO Germ-Processed Motor Oil an "oiliness" which is responsible for its greater lubricating value, greater film strength, greater penetrativeness, greater adhesiveness, greater tenacity, greater permanence, greater stability, greater stamina and a more nearly perfect compression seal than any other oil on the American market. Because of this affinity for metal—this actually combining with the metal itself, CONOCO Germ-Processed Motor Oil never leaves the bearings. Where other oils drain out and leave the surface dry, Germ-Processed oil penetrates the metal surfaces, forming a film that adheres for months. This "carry-over" film—this always present film gives ample lubrication to all parts needing it when a cold motor is started, until such time as oil from the crank case can reach them.

2 This remarkable and exclusive feature of CONOCO Germ-Processed Motor Oil is reinforced by the fact that these oils are refined from only carefully selected paraffin base crudes by the most modern and scientific methods known to the petroleum technologist. Patented processes are used to remove all objectionable elements, leaving a perfectly balanced, stable product that is 100% lubricating oil. Thousands of tests demonstrate its remarkable resistance to corrosion.

The majority of motor oils never receive this degree of refining. None ever exceed it.

3 Increased gasoline mileage and improved motor performance are realized through the use of this new oil. The exclusive CONOCO Germ Process so adds to the "oiliness" of this lubricant that metal-against-metal friction is eliminated, even in motor starting after all oil ordinarily would have drained from the motor into the crankcase. The perfect sealing qualities of the CONOCO fracture-proof

film insures a high compression efficiency that results in greatly increased motor performance. Marked improvements in power, speed, acceleration and flexibility are noticeable.

4 Due to the Germ Process and the select, premium, paraffin base crude stocks used, CONOCO Germ-Processed Motor Oil positively does not break down under the most intense cylinder wall heat. A climb, high speed, heavy load, temperature extremes—none of these strains cause this oil to heat sufficiently to actually burn, break down or evaporate to any appreciable degree. By comparison with many oils on the market, you may confidently expect a saving in oil consumption up to 50%.

5 Automotive engineers agree that 40% to 60% of all motor wear occurs during the starting period. This destructive wear is definitely reduced by the use of CONOCO Germ-Processed Motor Oil. Ordinary oil, thinned by heat and dilution, drains down past the piston rings when the motor is stopped, leaving little or no protective film. On starting the motor, a considerable time is required for the oil to reach all bearings and working surfaces. Under adverse conditions, such as winter temperatures, this time may be from 15 to 20 minutes or even longer.

Since CONOCO Germ-Processed Motor Oil never leaves the bearings and working surfaces, it is always there under any and all conditions to provide needed lubrication until the normal supply of oil arrives.

6 Unlike other oils, dilution does not impair the "oiliness" value of CONOCO Germ-Processed Motor Oil.

7 CONOCO Germ-Processed Motor Oil retains its fluidity at sub-zero temperatures. No practical operating conditions in winter will affect its immediate lubricating value at the first touch of the electric starter.
