WHEN IT'S **ZERO**
IN THE CRANKCASE

OR A **HUNDRED**
IN THE SHADE

You Get Protective Lubrication With
Conoco Germ-Processed Paraffin Base Motor Oil

CONOCO Germ-Processed Motor Oil retains its fluidity at sub-zero temperatures. In fact, there is no practical operating condition in winter that will affect its ready lubricating flow.

Due to the Germ process and the select, premium, paraffin base crude stocks used, CONOCO Germ-Processed Motor Oil positively does not break down under the most intense cylinder wall heat.

A climb, high speed, heavy load, the temperature—none of these conditions affect the ready lubricating qualities of CONOCO Germ-Processed Motor Oil.

This oil is different from all other oils in one outstanding respect. It actually penetrates metal surfaces.

The oil never leaves the bearings. In effect, a fracture-proof film—a carry-over film—is always on duty, lubricating your motor from the instant you put your foot on the starter.

When the temperature drops down to the sub-zero zone protect your motor by using CONOCO Germ-Processed Motor Oil. Know the satisfaction of realizing that your motor is well lubricated even before you start it.

Drive in at the nearest station displaying the Red Triangle now, today and have your crankcase drained. Your winter driving will change from one of worry to one of pleasure and satisfaction.
