CONOCO'S GERM - PROCESSED TENACIOUS FILM . . .

We sincerely believe that this disclosure alone will cause you to begin using CONOCO Germ-Processed Motor Oil . . such decided reduction in motor wear ... such triumph over the savage attack of friction and heat . . . such positive supremacy over the oil you have been using, all have a definite appeal to your pocketbook and judgment.

Charts prepared from the Pike's Peak Test records indicate a longer life for your motor by lubricating it with Germ-Processed oil. Too, you will save substantially on your gasoline cost, and in oil expense, by using this oil. And the fact that Germ-Processed oil penetrates metal surfaces means, that after starting your car on a cold morning you can safely drive at top speed with less likelihood of damage ... for CONOCO'S film is already on the job.

Less Carbon—Less Cost—More Mileage and Less Heating—More Compression. All these things mean a better all-around motor. It is truly unusual for a motor oil to so excel competition as CONOCO did in the Pike's Peak Tests. Tested out on the Pike's Peak Highway, scene of many famous automobile tests, was a memorable struggle for supremacy: . . . On the one side, three of America's representative and popular oils-on the other, Germ-Processed oil. And CONOCO Germ-Processed Motor Oil won, by all tests applied.

Only CONOCO can make Germ-Processed oils. CONOCO can give you these new motor oil merits, including penetrative lubricity. We hope to serve you soon, at stations displaying the Red Triangle.

SEND NOW for the new Free Booklet which describes in detail the story of the Pike's Peak Tests. Illustrated with photographs and charts. Address Continental Oil Company, Ponca City, Okla., or at the station with the Red Triangle.
