

HOW I MAKE A DIME BUY 30 TO 40 PERFECT CIGARETTES!!!!

IT'S a fact, men. With this new Target Tobacco I roll from 30 to 40 cigarettes for a dime. And they're some cigarettes! They taste and look like ready-mades. It's real cigarette tobacco and it's so darned easy to roll. I never thought I'd have the patience to roll my own, but now you couldn't change me. I'm havin' the best smokin' I ever had and I'm savin' 4 bits a week. Whether you're interested in savin' or not, I advise you to step right into a store and slap down a dime for this real cigarette tobacco."

MONEY-BACK GUARANTEE

For 20 ready-made smokes you pay 6¢ Federal tax (plus a state tax in some states). With Target you pay only 1¢. And your dealer offers you a money-back guarantee if you don't say Target is better than any other cigarette tobacco you have ever rolled.

Marriage Easy in Poland Young lovers in parts of Poland have adopted a motto of "marriage without priest, incense or vodka." The new ceremony consists merely of the swearing of an "oath" before a local Communist worker, who then declares the marriage valid. An Ukrainian newspaper of communistic tendencies published the names of those thus united.

States' Bear Populations California had the biggest number of bears in national forests in 1930, having 8,984 black bears and a number of grizzly bears reported. This is as near to a definite census of bears as can be reached in this country. Alaska had 5,750 black bears and 2,800 grizzly and Alaskan brown bears.

RECORDS SHOW 1931 UNUSUAL

Howard, S. D., Man Keeps Tab on Weather for 41 Years

Howard, S. D. — (Special) — King Vosburg has kept a record of the precipitation in Miner county since 1891. His records show that during this period of 41 years only three other years have been drier than 1931. The driest years recorded were 1925 with 13.64 inches, 1907 with 13.77 inches, 1894 with 14.18 inches, and 1931 with 15.78 inches of precipitation. During the last five months of 1931, 9.11 inches of moisture fell which shows that very little fell during the growing season.

The wettest years in this period were 1908 with 31.79 inches, 1903 with 31.06 inches, and 1914 with 19.06 inches of moisture. The average precipitation over this period was 21.564 inches.

The records also show that 1.53 inches fell in December, 1931, which was the wettest December since 1902 when two inches fell.

With this generous amount of moisture in the ground and a deep covering of snow at the present time, the farmers in this territory are optimistic as to the prospects of a good crop in 1932.

GREAT FORESTS AND LUMBERJACKS DISAPPEAR

Duluth, Minn.—(AP)—The head of the Lakes and cities on the iron range remain the home for most of the lumberjacks in the northwest, but most of their work is not in the woods, it is revealed in a report here by Maj. P. C. Bullard, United States district engineer.

Northern Minnesota and upper Wisconsin, in years past was swarmed with thousands of lumberjacks who each fall went into the woods not to return until spring with their "pockets filled with gold" after a winter of work at the several saw mills.

The saw mills hummed with activity and the wide area of forests was cleared after 20 years of activity in the lumber industry. The lumber industry was one of northern Minnesota's largest, ranking next to iron ore.

In the last decade or so, however, the lumberjack has been finding jobs in the woods more difficult to find and they turned to other occupations, although the offerings were reported light.

Millions of board feet of lumber have been shipped from the Head of the Lakes in previous years, with many seasons the shipments totaling more than 400,000,000. In recent years, however, only a small amount of lumber is sent from the Twin Ports and in 1931 the lowest amount since the industry was started in 1904 was sent from here.

The total shipment for 1931 is listed at 20,000 board feet. In 1906 when the industry was ranked at its peak, the shipments totaled 446,950,000 board feet.

Most of the mills have closed. The Rainy Lake Lumber company, with headquarters at Virginia, has been closed for the last few years. This company was considered the largest in the world. Cusson, the picturesque

Agents to Spot Stills from Air In New War on Liquor Traffic

Washington—Flying dry agents are to be the government's recruits in the war on liquor traffic.

A nearly new three-place airplane, captured in Texas from rum runners and a pair of pilot-prohibition officers will form the nucleus of an aviation department for the bureau of prohibition.

Liquor stills operating in the open are to be spotted from the plane and locations reported to ground crews who will do the raiding, according to plans formed by Prohibition Director Amos W. W. Woodcock.

"The use of an airplane, as I see it," Woodcock said, "will be just an ordinary use of an obviously practicable method."

"We expect the areas which now require several months of working in searches by ground parties may be covered in a few days. Besides stills in the open are usually screened from lateral view whereas they are not hidden to aviators."

The aviation section is expected to be complete within two months. Areas particularly to be patrolled, Woodcock said, will be islands in the Mississippi river, portions of North Carolina and Florida, and wooded regions of southern Maryland.

Spotting stills from the air has been employed by the bureau previously with airplanes rented by the hour.

to be arranged. The group of Indians known as the Flandreau Sioux tribe comprise about 40 families living within a radius of about five miles from Flandreau, though some live at a much greater distance. These Indian families, with the exception of a few who are renters, own their own homes.

Mother of 7—Still Young

THE woman who gives her organs the right stimulant need not worry about growing old.

Her system doesn't stagnate; her face doesn't age. She has the health and "pep" that come from a lively liver and strong, active bowels.

When you're sluggish and the system needs help, don't take a lot of "patent medicines." There's a famous doctor's prescription for just such cases, and every druggist keeps this standard preparation. It is made from fresh laxative herbs, active senna, and pure pepsin. Just ask for Dr. Caldwell's syrup pepsin. Take a little every day or so, until every organ in your body feels the big improvement.

The next time you have a bilious headache, or feel all bound-up, take this delicious syrup instead of the

usual cathartic. You'll be rid of all that poisonous waste, and you haven't weakened the bowels. You'll have a better appetite, and feel better in every way. The constant use of cathartics is often the cause of a sallow complexion and lines in the face. And so unnecessary!

Would you like to break yourself of the cathartic habit? At the same time building health and vigor that protects you from frequent sick spells, headaches, and colds? Get a big bottle of Dr. Caldwell's syrup pepsin today. Use often enough to avoid those attacks of constipation. When you feel weak and run-down or a coated tongue or bad breath warns you the bowels need to be stimulated. Give it to children instead of strong laxatives that sap their strength. It isn't expensive.

Voices From the Past

Phonographic preservation has not been altogether successful. Not all records have stood the test of time. At a recent hearing, a message recorded by Cardinal Manning could be heard clearly, a speech by H. M. Stanley and a recitation by Lord Tenynson of his "Charge of the Light Brigade" were partially reproduced. The lady who recorded Cardinal Man-

ning's message is still alive, and tells how, after she had explained the working of the instrument, the great ecclesiastic said to her: "Ah, young lady, if you had lived a century ago you would have been burned for a witch!"

"INDISPENSABLE" for children

"COD LIVER OIL is not a 'luxury,' but an indispensable food for young children. . . . Swedes Enjoy Long Life A Swedish record for longevity seems to be held by the inhabitants of the little parish of Kisa, in central Sweden. The latest figures showed that out of a population of 4,000, 92 persons were over eighty, and of these, ten were over ninety. Some years ago Kisa had Sweden's

oldest inhabitant, the farmer Sven Eriksson, who died at one hundred and five and a half years.

Island Bird Sanctuary

St. Kilda, a lonely island some seven miles in circumference off the outer Hebrides, has been sold by the former owner, Sir Reginald MacLeod, to an ornithologist who wishes his identity to remain hidden. This buyer plans to keep the island in its natural state so it may remain an ocean sanctuary for the sea birds

which migrate there in great numbers. Under the terms of the proposed plan it will be possible for tourists to land and visit the huge island aviary, but no buildings will be placed on the land.
