SHIELDS

On Saturday evening, November 3 this community held their weekly program for the dramatical and talents at the home of Edward Earley. The contestants of the younger generation in the gym division were coached by Jim Earley and John Steskal. The entrants were well matched; their ability to squirm out of seemingly difficult positions was amazing.

Seldom has a more successful contest been staged by the young people of this town.

Mrs. Pete Walnofer and Mrs. Klinger conducted the declamatory

program. There were two contestants in the extemporaneous division. This has always been considered difficult and few attempt it. Pete Farwell and Mrs. William Steskal were the two entrants. One hour before the contest each was given a topic of current interest and an opportunity to get his talk into shape. They both apparently seemed at ease and used the notes they had prepared very little.

Pete was awarded first and said in part: "Next Tuesday is election day and every Nebraskan who has the interest and welfare of his state at heart, who has the interest and welfare of his fellow citizens as well as his own interest, will go out and vote. There is only one way to vote and that is according to the dictates of your own conscience; vote for the candidates who are best qualified

to fill the position. In performing this duty they should let nothing stop them, neither party prejudice nor any other prejudice. Let them make their decision on their honest opinion of the candidate seeking

TETRAETHYL in Standard Red Crown Superfuel— Same Price as "Regular" Gasoline!

The Government at Washington has ruled that gasoline containing tetraethyl must be distinguished from gasolines lacking this valuable fluid by a metal plaque on the pumpreading, "Contains lead (tetraethyl)."

Motorists are urged to look for that plaque. It is their guarantee that they are getting gasoline containing the finest anti-knock fluid known, the very same fluid which (in larger quantity) goes into premium-priced gasoline! All Standard Red Crown pumps carry the tetraethyl plaque. And that's one reason why Standard Red Crown has more LIVE POWER per gallon, though it costs no more than "regular" gasoline!

How GLORIA GOT TO THE GAME . . .

BOSSIE HAS A RIGHT TO BAWL!

....her home is on fire and this farm does not have a TELEPHONE to call for help.

"The farmer's annual loss from fire in this country would build 40,000 homes of a value of \$2,500 each," says a report of the National Fire Waste Council.

....TELEPHONES don't prevent fires but they do help to prevent great losses by enabling the Farmer to get help in time!....

LOOK FOR THAT PLAQUE ON THE PUMP! IF IT'S THERE, O.K. BUT IF IT'S NOT, REMEMBER: YOU'RE NOT GETTING A GASOLINE WITH TETRAETHYL!

HERE'S WHERE TO GET IT!
