In A Class By Itself

THERE is no way to compare the Ford V-8 with any other car because there is no other car like it.

The Ford enables you to step up into the fine-car class in performance, beauty, comfort and safety. But there is no stepping up in price. That is kept down by Ford low-profit policies and unique manufacturing methods. These are as different as the car itself.

It takes eight cylinders to give the modern performance you need these days. The Ford is powered by a V-8 - the finest type of eight-cylinder engine. You have to pay more than \$2000 for that in any other car.
