

Shirtwaist Frock
Simple and Chic

PATTERN 2212

It seems that girls will be girls this season—even in the field of sports! And most welcome, too, is the return to femininity in clothes. That flattering quality is most often achieved through the softness of gathers (as you see in this yoke) or easy freedom of line (like the pleated sleeve with its casual air!) But every important tailored detail is retained making the shirtwaist frock so universally becoming! See how trim the collar—how neat the front closing—how simple the pocket! Make yours of sport silk or cotton.

Pattern 2212 is available in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 3 3/4 yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

SEND FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to the Sewing Circle Pattern Department, 243 West Seventeenth Street New York City.

Smiles

IN GOOD CONSCIENCE

"What are you going to say when the congress meets?"

"I am going to avoid the complications of world economics," answered Senator Sorghum, "and concentrate on a notorious matter of plain fact and simple justice—votes for Washington, D. C."

A Sea of Troubles

"Is feminine influence increasing?"

"It is," answered Miss Cayenne. "A kingfish is conspicuous, but I shouldn't be surprised to find at any moment that some mermaid has splashed in and crowded him out of the swim."

Civic Strategy

"Crimson Gulch has a wild reputation," said the traveling man.

"That's a part of our board of trade publicity program," said Cactus Joe. "We want to warn outside gunmen to detour."

Old Port of Rome
Reveals Its Past

Excavators at Ostia Bare
Many Tombs and Houses.

Rome.—The excavations being conducted at Ostia, the ancient port of Rome, are beginning to rival, at least in the popular fancy, those at Herculaneum and Pompeii. While the two Graeco-Roman cities of the Neapolitan Campania were almost entirely dedicated to leisure and elegant life, Ostia thrived with commercial life and its people were principally manufacturers, merchants, small capitalists, clerks and sailors.

"It was a population always on the move and alert," says the Agenzia d'Italia of Rome, "and having dealings with merchants and brokers and travelers coming from every part of the ancient world. This explains Ostia's appearance, very different from Pompeii, with its large number of 'insulae,' which in ancient Rome were the type of houses used by the lower and middle classes.

Ancient Tombs Unearthed.

"The discovery made a few days ago in the excavations along the southern side of Ostia, near the new 'motor road' going to the Roman Lido, will attract especially the attention of archeologists. It

consists of a mass of tombs, some of which seem to go as far back as the epoch of Augustus and appear to be very singular in their type and structure. These excavations were made on an area of about 100 meters on one side and 150 on the other.

"A road, Roman paved, shows the beginning of the newly explored area, passing along two rows of buildings recently excavated. A little further on are some stairs at the end of which is a square showing on the left side the molding of a stone monument, on a quadrangular basis, almost five meters high. It is one of the most characteristic Roman tombs of the imperial epoch, of a style reserved for wealthy families.

"In the central part of the area excavated, both on the right and on the left, are cubicles, nearly all built with curved vaults, with niches of various sizes cut into the walls.

Many Fine Pictures.

"On the walls are remarkable paintings and stucco. One picture is three meters wide and two meters high and represents a lion devouring the head of an ox.

"Painted under the central screen is another representing a crocodile, a boat with two pigmies rowing,

also two ducks, one with a pigmy riding on its back.

"Another picture, in a niche, represents a woman sitting in front of a small table and a human figure with wings. On the right are a peacock and some other birds and on the small vault a bird looking very much like a crane.

"These pictures are astonishingly like those of the Empress Lina's 'ninfium' at Saxa Rubra. In a cubicle, enclosed in an urn, are many animal bones, most probably sheep bones, belonging presumably to animals sacrificed according to pagan rites. Every tomb is covered with inscriptions containing the names of the dead."

Find Many Mental
Ills Among Workers

Dallas, Texas.—Fully 50 per cent of all persons employed in American industries suffer from varying degrees of emotional or mental ill health, according to H. L. Pritchett, professor of sociology at Southern Methodist university.

Many men and women who are highly successful in business and are entirely rational, nonetheless suffer from emotional maladjustment, Pritchett said.

Relatively few people are engaged in the type of work they really wish to follow, he said. Most people are engaged as they are because of compulsion or circumstance.

BRISBANE
THIS WEEK

Nobody Was Frozen
One Strike Subsides
The Emperor Has Lions
1,000,000 Tiny Pigs

Several have written to this column offering to let themselves be

"frozen stiff and then returned to life" in the interest of science, as suggested by a Los Angeles chemist, R. S. Willard. They will be sorry to hear that the American Medical association calls Mr. Willard's alleged freezing "a vicious hoax."

It accuses Willard of freezing a dead monkey and then substituting a live one, supposed to have been frozen and thawed out.

Doctor Fishbein, editor of the American Medical Association Journal, says anybody frozen stiff would surely die.

It was an interesting yarn while it lasted.

New York's strike of union men against President Roosevelt, General Johnson and the WPA ("Works Progress administration") seems temporarily to have collapsed, Mr. Meany, New York labor leader, said all union men would go out and stay out and nonunion men would follow. The news is that the non-union men did not follow, and the union men went back to work.

Robert Moses of the park department, who employs 25,000 workers on park projects, reports only 110 deserters.

An interesting photograph from Addis Ababa shows two servants of the Ethiopian emperor riding on lions, one female, one male, in the palace garden. The emperor's lions are trained in this fashion for use as "watch dogs." You can easily believe that intruders "keep out."

For war purposes, however, lions are not particularly valuable. Tear gas and deadly poison gas would discourage the lions, as they would men, and lions cannot jump as high as an airplane.

In Chicago's stockyards half the hog pens are closed, prices are soaring, men have lost jobs, all for lack

of hogs to push around and butcher. The yards are suffering.

And only a little while ago an earnest government, determined to help the farmer and promote prosperity, was butchering tens of thousands of "farrow sows" to get rid of them before their little pigs could be born. "Too many little pigs will make too many big hogs," said the government.

You can imagine the ghosts of a million pigs floating over the stockyards, squeaking in their baby voices, "We told you so."

War talk continues. Mussolini announces a new air weapon "overwhelmingly powerful," but does not say what it is. Plain TNT and poison gas are powerful enough.

Hitler announcing that his country is "ready to meet any outside peril," adds: "No power on earth can attack us." That seems a little overconfident.

Uncle Sam, with all his spending, makes a little something for himself. His money-issuing privileges, paper dollars worth about 50 cents, and silver coins containing less than half their value in silver, have given the treasury a profit of about \$3,000,000,000.

And at this moment it does not appear to have hurt anybody. Who understands money?

Stocks are better, prices higher, in London and Wall Street. The London Daily Mail says: "A stock exchange boom seems to do more for world trade than anything. The reason is that it gives confidence everywhere."

Strange and powerful is "confidence." You cannot see it, feel it, weigh it, but you can easily destroy it.

Lovely woman, led by Paris fashion designers, is still trying to find out what she really wants. Unversal Service dispatches from Paris describe "dresses as transparent as lace curtains from the knee down; skin-tight evening gowns with cut-out designs as big as elm leaves from under the arms to the hip-line. Cape coats of white fur, slit wide open on both sides." One gown is made entirely of "plated gold braid."

When will women settle down finally to some one style, as men have done?

Interesting item in taxation news. For instance, government will collect income tax on "public relief." If your generous Uncle Sam gives you \$34 a month, the amount that unions now spurn, he will take back \$13.12 in income tax.

That seems like giving your little boy a stick of candy and biting off the end of it.

Trying Out Real Warfare at Fort McPherson

This photograph shows a bit of exciting action in the mimic war staged at Fort McPherson on the outskirts of Atlanta, Ga. Two pursuit and observation planes may be seen as they dived at full speed to strike troops on the ground. The latter, members of the regular Twenty-second infantry, fought back with rifles and machine guns. The planes were flown by the reserve officers under the command of Major Wiley R. Wright, and the infantry was under command of Col. F. S. Chalmers.

Boulder Dam Opens Up New Industry

Big Scale Production of
Metals Is Foreseen.

New York.—A new electrochemical industry utilizing desert ores is in the making at Boulder dam, according to chemists, who foresee large scale production of aluminum, magnesium, and other metals in the Southwest.

The completion of the enormous power houses, promised within a few months, has raised the question of electrochemical products made from ores of the nearby Nevada-Arizona desert wilderness. Never before has there been a large supply of cheap electric energy anywhere near the group of unique mineral deposits adjacent to the Colorado river. It is pointed out.

Several products now considered indigenous to Niagara falls are proposed by C. K. Leith and N. H. Eavenson of the bureau of reclamation as reasonable for the Southwest. These include aluminum and magnesium, metals practically obtainable only by electrolysis with the expenditure of vast current loads. Aluminum alone already consumes over 2,500,000,000 kilowatt hours annually in the United States under normal business conditions.

"Large deposits of alumite at Marysvale, Utah, within striking distance, offer a promising source of both aluminum and potash in one enterprise," Prof. G. Ross Robertson of the University of California, Los Angeles, says in a report made public by the American Chemical society. "Furthermore, the increasing demand for extremely light alloys is boosting prospects for magnesium, a metal in ample supply in the desert region.

"Ferrotungsten, ferromanganese,

at 663,000 horse power figured on low-water conditions, and over 1,800,000 horse power maximum capacity. A generating cost in the vicinity of two miles per kilowatt hour is estimated."

Two Sets of Triplets

Arrive About Same Time

Providence, R. I.—There's an old saw stating "it never rains." Providence Lying-in hospital was the birthplace of 20,000 babies before a set of triplets was born there. Before the mother, Mrs. George Hagopian, was discharged with her three daughters, Mrs. Robert Coughlin gave birth to two boys and a girl.

VELVET AND TWEED

By CHERIE NICHOLAS

Than a velvet "wind breaker" with a tweed skirt there is nothing smarter or newer for wear on early fall days. The model pictured is by Mainbocher. The velvet is dark brown and the tweed is in beige and brown. These velvet lumberjack blouses will probably be the rage before long—just wait until the news spreads among going-away-to-school coeds and in-their-teens junior highs. Imagine this outfit in tones of rich green and the new ginger brown or dark dubonnet red with creamy beige. These velvet and tweed outfits are smart to wear about town—good-looking any hour in the day.

Discover Mummified Body
of Man in Mammoth Cave

Mammoth Cave, Ky.—The mummified body of a man, perhaps one thousand years old, found in the Mammoth cave here, was the subject of intense interest among noted archeologists.

Grover Campbell and Lyman Cutliff, cave guides, discovered the body on a 30-foot ledge of the cave.

The man had been caught on the ledge by the fall of a four-ton rock. Marks of an implement near the base of where the rock had been indicated the man had been digging under it when it became dislodged.

Near the body was found a torch made from reeds bound with grasses. It still was sticking nearly upright in the sand. Among the crude implements found was a dagger-shaped limestone rock believed to be a weapon.

The man wore a loin cloth of fiber. It was well preserved. The man's stone spade was near his right arm.

Road Crew in Oklahoma
Kills 700 Snakes in Day

Medicine Park, Okla.—Workmen on a highway project in the Wichita mountains here killed more than 700 rattlesnakes in one day.

The snakes ranged in size from five inches to several feet in length and were discovered when a huge power shovel scooped into their den.

Many other rattlesnakes have been killed by the workmen, but never so many in a single day. Workmen believed the blasting of the highway up the side of Mount Scott, in the Wichita national forest and game preserve drove the snakes to the surface.

Thief Left With Rights

Waterbury, Conn.—Imagine the disappointment of the thief who stole 55 shoes from William Lipson, Providence (R. I.) salesman, only to find they were all for the right foot. They were samples for exhibition purposes.

GOOD LADDERS
WILL CUT LOSS
BY RURAL FIRES

"A good ladder on every farm would help a lot in lessening losses from rural fires," says David J. Price, of the United States Department of Agriculture, in enumerating small but important precautions which rural residents often overlook. Doctor Price's job is to find out all he can about fire prevention and fire fighting and pass the information along to the people of this country. Precautions such as a handy ladder, he points out, would help to prevent and control many fires in rural communities.

Speed is essential in fire fighting, and a convenient ladder makes any roof fire quickly accessible. Frequent use of ladders to inspect chimneys and flues might prevent many unnecessary losses, especially during the winter when fires are going.

Among small precautions other than convenient ladders are care in handling gasoline and kerosene, especially in kindling fires; careful disposal of hot ashes; care in using open fires and matches and in burning rubbish; repair of stoves, furnaces, fireplaces, flues, and chimneys not in first-class condition; and frequent inspection of electrical wiring and electrical appliances.

Observance of simple precautions, adequate water-storage facilities on every farm and at every rural home, with a well-manned fire truck at every cross-roads hamlet, is the Utopia at which Doctor Price hopes rural America will arrive.

In the meantime, one of his suggestions is, to paraphrase, "A farm fireman's best friend is his ladder."

Week's Supply of Postum Free

Read the offer made by the Postum Company in another part of this paper. They will send a full week's supply of health giving Postum free to anyone who writes for it.—Adv.

Vegetable Weevil Spreading

The vegetable weevil, a new flying insect which eats most of the common garden crops, is spreading in the Southern states and has appeared in California, the United States Department of Agriculture has reported.

MOSQUITOES
Inject Poison

Mosquitoes live on human blood. Before she can draw your blood, however, the mosquito must first thin it by injecting a poison. Thus mosquitoes annoy—are dangerous, spread serious disease epidemics. Don't take chances. Kill mosquitoes, flies, spiders with FLY-TOX—proved best by 10,000 tests.

Accept no substitutes... demand

FLY-TOX

Watch Your
Kidneys!

Be Sure They Properly
Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as nature intended—fail to remove impurities that poison the system when retained.

Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, swollen limbs; feel nervous, miserable—all upset.

Don't delay! Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

DOAN'S PILLS

A Sure Index of Value

... is knowledge of a manufacturer's name and what it stands for. It is the most certain method, except that of actual use, for judging the value of any manufactured goods. Here is the only guarantee against careless workmanship or use of shoddy materials.
