

BRISBANE

THIS WEEK

Lightweight Lives Long
Eyes, Also, Work
Japan Will Oblige
The Russian Letdown

Gilbert K. Chesterton, dead at sixty-two, weighed more than two hundred and fifty pounds. As every doctor will surmise, he died of heart disease. His weight explains the unnecessarily early death. A pump breaks down if you overwork it; a sixty-two-year-old heart breaks down if you compel it to supply with blood—food, drink, oxygen—too many billions of cells.

Every cell in the body must have, from a laboring heart, its supply of food and oxygen, pumped every second.

The brain, alone, contains thirty thousand million separate cells, according to Doctor Carrel. In his 100 surplus pounds, Chesterton carried scores of billions of useless cells, each making an unnecessary demand on the heart.

Do not let yourself remain fat after forty if you would live to be old. To become thin and stay thin requires some effort of the will, often more disagreeable than dying.

At one of the ultra-radical workers' meetings in France, the red flag displayed and the communist "international" hymn sung, there was radical and determined talk. Monsieur Thorez told the meeting the factories of France would soon belong to the workers.

If the plan is sent through some workers would discover that it takes more than a red flag and a hymn to run a factory and make it pay; if factories did not pay there would be no pay rolls. Brains count as well as hands. The eyes carry no load, but they direct the feet and hands.

South China thought she wanted a war with Japan, and will probably have it. Troops from a Japanese naval squadron land at Amoy, Fukien province, accompanied by the usual convincing flock of airplanes.

War with Japan is the easiest thing to have, if you really want it.

In Canton, South China's big city, parades and mass meetings were organized to increase and express hatred of Japan.

The outpouring recalls Voltaire's description of a glass of English beer—"froth at the top, dregs at the bottom."

Russian sovietism came quickly, and might go quickly; signs of a breakdown are seen already. Those that do more and better work get special rewards; engineers, chemists, scientists occupy fine apartments compared with those of ordinary workmen. That is hardly "straight communism." Now Russia will have a constitution and house of parliament, important steps in the direction of conservatism.

Tell your little boy and girl to include in their prayers the following: "And please, Lord, do not send us any more wars."

Uncle Sam recently began delivering hundreds of millions of bonus bond dollars to 3,518,000 veterans of the war—many veterans and a big bonus, for a war in which we were not concerned until foolishness pushed us in.

The French Premier Blum, first Jewish prime minister in French history, is a man of unusual ability, combining common sense with the radicalism of his Socialist party. Mr. Birchall writes to the New York Times that there is fear of anti-Semitic outbreaks in France; observers "see a ground-swell of an anti-Semitic movement in the vicious attacks of the right against the new Jewish premier." French anti-Semitism, according to Mr. Birchall, has survived the Dreyfus case, which should have ended it.

Our railroads find it hard to make money, but at least they are safe railroads.

W. Averell Harriman presented a gold safety medal from the fund established in memory of his father, E. H. Harriman, to F. E. Williamson, president of the New York Central, which has lost one life in 12 years.

It is interesting to learn from Mr. Ripley that the first Cunard steamship did not carry as many passengers as could be carried by one of the lifeboats on the Queen Mary. What is more important, each lifeboat has wireless apparatus.

The last chapter in the Lindbergh murder and kidnapping tragedy is written with the return to Colonel Lindbergh of \$14,065 held by New Jersey as evidence against Hauptmann.

Smart Silks for Spectator Sports

By CHERIE NICHOLAS

IF THERE is one place more than another that daytime fashions show off in a panorama of surpassing style interest, it is at the races. The influence of the French races and Ascot was very evident at the openings of our own American tracks this season. Although there were no trailing skirts there were the reminiscent cartwheels, the tiny elaborate "doll" hats which smart Parisiennes love so well with flower, vegetable and bird trimming—millinery fantasies such as are almost amusing in their eccentricities, yet quite worthwhile in that they are adding such zest to the current mode. Silk taffeta frocks and suits were numerous and set the pace for an interesting style movement. Skirts 14 inches from the ground, any number of short-sleeved dresses and jackets.

Typical of the choices of many well-dressed women was the very short black silk crepe suit with a fitted jacket that is worn with an enormous black feather-trimmed cartwheel hat. A huge white kid water lily at the shoulder gave a dramatic touch. Much is being said in fashion circles in regard to water lily colorings and water lily boutonnieres and corsages. As to suits of this type the fashion parade includes them in dark silk failles, in faconne silk taffeta, and of course, the gay printed suits are that ubiquitous they are taken for granted.

As to the newer silk prints there is a marked tendency to select tiny neat patterns for daytime wear. Made up in trimly tailored frocks with short sleeves and matching jackets, you have the costume-ideal for going about town and for the

CIRCULAR LINES FOR NEXT AUTUMN

While most women are concentrating now on the purchase of their summer wardrobe those who are designers of fashionable clothes are concerned about next fall and winter's styles. They are considering the creations shown in recent Paris collections and thinking up ideas to produce something new in the way of silhouettes for the autumn.

The first inkling of the trend which has leaked out of the workrooms concerns the width of hemlines. Circular lines are said to be so well liked that every one of us will be wearing skirts that whirl around us like ballet costumes before many months have gone.

Feminine Allure Feature of Negligees for Summer

Negligees good for all year, and especially charming for summer, are made of bluish satin, with deep insets of ivory Alencon lace. The body of these negligees is cut on the bias, so that it drapes around the figure attractively. A rolled hem finishes the edge. The sash ends have lace trimming.

Another type of negligee has two bias ruffles for a shawl collar, and three bias sleeve ruffles arranged in tiers, all edged with Val lace. Very practical for summer, especially when the fabric is dotted swiss or washable silk.

Barnyard in Prints

The barnyard is glorified in silk sheer animal prints of white roosters, birds and bunnies instead of traditional dots on black. One smart model features a vest and three pleated tiers of a twin print on a red ground.

Sports Garb Colors Gay

Summer sports clothes stress colorful hues and comfort. Molyneux has evolved evening pajamas of light green linen topped by a jacket of the same fabric lined with multi-colored printed crepe.

practical hours of general activities. Now that summer is nearing the trend toward cool silk sheers, both plain and print are obvious. To glorify these intriguing prints one must be accessory-minded to a high degree, which is not at all difficult since the shops are filled to overflowing with the most fascinating neckwear, gloves, bouquets, belts, footwear and handbags that genius might devise.

Some of the smartest women are endorsing tunics over slim skirt foundations. See the tunic model to the left in the picture. Schiaparelli's new gingham silk taffeta is the fabric chosen for this tunic. It is worn with a red leather belt over a black silk crepe skirt.

Seen at the Belmont race track was the jacket dress centered in the illustration. It is styled of dotted silk crepe, white on gray (a very important color in gray this season). Fitted jacket, square shoulders with big sleeves, and a ruffled jabot on the dress are details that interpret high swank.

The contrast jacket is a pet project with fashion these days. Note to the right in the illustration the stunning model. Here a black sheer silk dress is topped by a short swaggy jacket of white silk crash embellished with coin dots in jockey colors—maroon and blue. The hat is of white silk crash with extreme eye-shading brim which is inspired by a jockey's cap.

WHITE LINEN SUIT By CHERIE NICHOLAS

The linen suit in natural or pure white is an important number on the style program for summer. The accent on suits has been most pronounced all spring and now enthusiasm for suits is continuing for summer—suits of linen particularly that are cool and comfortable as temperature rises. The classic white suit here pictured is of linen of superfine grade imported from Moygashel, Ireland. It is particularly smart for town wear when accompanied with dark accessories such as fashion decrees with white. Note the navy beret, the navy-striped silk shirt, the navy gloves and bag. These identical accessories carried out in Dubonnet red are stunning.

A Fox Bracelet

Fur bracelets are next. Fox takes the lead and either bands the elbow or encircles the lower arm just above the wrist.

POULTRY

LICE, MITE, FLEA, ENEMIES OF HENS

Some Pests Can Live Years Without Food.

By Prof. Glenn W. Herrick, New York State College of Agriculture, WNU Service.

The hen that supplies the nation's daily breakfast food does her job well, even though many enemies war against her. At least nine different species of lice, several species of mites, and at least two species of fleas attack the hen.

Some enemies of the hen, like the common poultry mite, are so small that they would run about thirty to an inch. Some live on bits of feathers and scales of the skin; others are bloodsuckers. Some cannot live for more than a few days away from the hen; yet the fowl tick has been known to live without food for three years at a time.

Fowls are often affected with a disease known as scaly leg or scab, caused by a very small mite scarcely visible to the unaided eye. The bird eventually becomes lame. Fowls sometimes develop the habit of pulling out their own feathers, even those from others. Most often this habit is due to a tiny itch mite which lives at the base of a feather.

In contrast with lice, the common poultry mite is not a permanent resident on the hen. It might be described as the chicken bedbug, for it attacks the fowl at night and leaves in the morning to hide in cracks and crevices of perches. During the night the mites swarm over the fowls, gorge themselves with food, irritate the hens, and cause them to lose rest and sleep.

Poultrymen have learned to combat these enemies of the hen through chemical and other means.

Double Yard Plan Helps to Check Contamination

Ground on which poultry has run for several years may become "chicken sick," according to H. H. Alp, poultry extension specialist, University of Illinois. The greatest contamination usually exists in the ground nearest the poultry house, particularly when the flock is large.

Now is a good time to plow up the yards and prepare for an abundance of green feed for the flock. A two-yard system is recommended where the flock is large enough to warrant this additional trouble. Double yarding helps to prevent serious permanent soil contamination and also provides a means of having green feed available over a longer period. Crops commonly used in poultry yards are wheat, rye, oats and rape. Wheat and rye are best used early in the spring. Oats and rape are more suitable for summer cropping. Swiss chard makes an excellent summer crop to be fed to birds confined to houses and yards, according to Alp. Laying birds should not be allowed to eat any large quantity of rape, as it has a tendency to darken the color of the egg yolk.

Feeding Skimmilk

Liquid skimmilk should preferably be fed to the flock from earthenware, tin, aluminum or graniteware fountains and dishes. As a rule the milk combines with the zinc in galvanized ware and forms zinc lactate, sometimes bad for chicks and ruinous to the container itself. If necessary to use such containers, fill the galvanized dish with milk and set it away in a warm place for a day or so, then throw away the milk and scrub the dish. This removes most of the undesirable soluble material and the dish will be safer for use in feeding.—Wisconsin Agriculturist.

Trouble at Water Fountain

Because most worms and disease germs thrive in moist, warm surroundings, the soil and litter around the water fountain probably holds first place as an incubator of trouble. And for this reason measures should be taken to protect the chicks, and poultry, against the hazard. This can be done quite satisfactorily, says the Missouri Farmer, by constructing a wire platform for the fountain which will screen in the wet litter and soil so that chicks cannot have access.

Poultry Hints

Growing chicks should average one pound in weight at seven weeks and two pounds at twelve weeks.

About 25 species of ducks, four species of geese, and one of swan are common to Minnesota waters.

Rocks are not so active and may have difficulty in getting on high perches if they do not have a ladder.

Keep goslings away from swimming water until well feathered and when they are to be killed for early market.

Interior fixtures, especially roosts and nests, should be of simple design and construction with a minimum of cracks wherein parasites may hide and dirt accumulate.

These Colored Mammy Tea Towels Will Bring Gayety to Your Kitchen

PATTERN 5547

No "afternoons off" for this colored Mammy, for she must "wash the cups and saucers up, and put the clothes away." But you can take an afternoon off and embroider yourself a set of tea towels with these amusing Mammys, for the work goes

Household Questions

Those little tile tables which are such a help in summer entertaining are now so reasonably priced that you can easily indulge in two or more. Those made of tiles are especially nice.

Goldenrod when cultivated makes a beautiful garden flower. It blooms from late July to October.

Dry the outside of ice trays after filling with water and before putting back into a mechanical refrigerator. If this is done trays will not stick and may be easily removed.

Wash out chamois skins on a windy day. Hang up to dry on the clothesline and the wind will blow the skins so they will be very soft when dry.

When mulching perennials avoid using too heavy a mulch. The purpose of the mulch is to keep the plants cool, not warm.

very quickly, it's cross stitch, outline, running and single stitch. Her gay hand and checkerboard apron suggest themselves for the brightest floss you can find. A set's nice to donate when Fair time comes around.

In pattern 5547 you will find a transfer pattern of seven motifs—one for each day of the week—averaging 6 by 8 inches; material requirements and color suggestions; illustrations of all stitches needed.

Send 15 cents in coins or stamps (coins preferred) to The Sewing Circle, Household Arts Dept., 250 West Fourteenth St., New York, N. Y. Write plainly pattern number, your name and address.

"Mental" Wastebasket Is Necessary to Well-Being

A wastebasket may not impress one as being a very interesting topic for discussion, not even when it is qualified by a powerful adjective like "mental." But don't let that stop you!

For this particular kind of utensil is important. In fact, it has proved itself so valuable in maintaining order in my mental household that you, too, may find it worth investigating.

This wastebasket is the imaginary container into which at night I toss the day's rubbish that has gathered in my mind. It can contain all the litter of doubts, worries, grudges and fears that—unless one is eternally vigilant—can slip into the human mind. But there is no necessity for these things to stay festering or corroding there during the night. And so out they go! And while I sleep—the more peacefully for being rid of the trash that can contaminate the subjective mind—some angelic janitor must collect and dispose of it, since in the morning every trace has disappeared.—Mary Pickford in Cosmopolitan Magazine.

Week's Supply of Postum Free

Read the offer made by the Postum Company in another part of this paper. They will send a full week's supply of health giving Postum free to anyone who writes for it.—Adv.

Wise Rules

The rules for restraining instincts should be very wise.

105 Years' Difference in Ages of Bride and Groom

An Egyptian man of one hundred and thirty has recently married again—for the nineteenth time. His bride is twenty-five.

His other wives are dead, but his 23 children objected to his marrying again because of the one hundred and five years between him and the girl.—London Answers.

NEW KITCHEN STOVE MAKES ITS OWN GAS

Housewives Marvel at Coleman Range That Lights Instantly Like City Gas—Cooks a Meal with 2c Worth of Fuel

A new kitchen range that offers every cooking convenience of the finest city gas range is now available to housewives, wherever they live.

W. C. Coleman, pioneer inventor of gas-pressure appliances, brings to a lifetime of inventive genius his crowning achievement in this amazing new Coleman Safety Range. This new stove makes its own gas from ordinary, lead-free gasoline. A patented method of carburization converts liquid fuel into gas, much the same as in present day automobile engines.

The Coleman Range lights instantly, like city gas. Its fuel-saving Band-A-Blu Burners, another of Mr. Coleman's outstanding developments, produce a clean, clear-blue flame, so hot that a low flame does all ordinary cooking. Tests show an average family meal for five takes about 2c worth of fuel.

Coleman Ranges are finished in gleaming porcelain enamel. Their pleasing colors combine outstanding beauty with unequalled performance.

Readers of this paper wishing full information about these wonderful new Coleman Ranges will receive beautifully illustrated literature and a valuable stove check chart by simply addressing a postcard to Mr. W. C. Coleman, Dept. WU-236, Wichita, Kansas.—Adv.

THE DEATH BATTERY OR HOW MELVIN PURVIS CAPTURED THE GARSON JAIL-BREAKERS

AN INSIDE STORY OF MELVIN PURVIS AMERICA'S NO. 1 G-MAN

MELVIN PURVIS, the young lawyer who became America's ace G-Man, who directed the capture of Dillinger, "Pretty Boy" Floyd, "Baby Face" Nelson, and others. Mr. Purvis reveals here methods used in capturing criminals. Names have, of course, been changed. This inside story is published as proof that CRIME DOES NOT PAY!

JACK, YOU AND FRED WATCH THIS TOWN... I'LL GET IN THE CAR AND SCOUT THE ROADS AHEAD.

OKAY, CHIEF—BUT WATCH OUT! THOSE JAIL-BIRDS HAVE IT IN FOR YOU!

PURVIS' KEEN EYE SPOTS SOMETHING...

HA! NEVER SAW THAT BEFORE, MAYBE IT'S DISCONNECTED FROM SOMETHING.

AHA! A BATTERY BOMB! IF I'D TOUCHED THE STARTER OF THIS CAR-IT WOULD HAVE BEEN THE END OF MELVIN PURVIS!

A STRANGE CLUE!

WHAT'S THIS? AHA! DON'T RECALL SEEING THAT BEFORE... I'LL JUST BRUSH IT UP AND HAVE IT ANALYZED.

I'VE GIVEN THAT MUD THE ELECTROLYSIS TEST, MR. PURVIS. IT CONTAINS COPPER ORE.

BY GEORGE! THERE'S AN ABANDONED COPPER MINE NOT FOUR MILES FROM THAT TOWN... THAT'S THE CLUE WE'VE BEEN LOOKING FOR!

THE ELECTROLYSIS TEST.

Some of the mud Melvin Purvis brought in was placed in solution in this beaker, and then an electric current was passed through it. The copper ore in the mud was revealed when it was deposited on one of the metal plates connecting with the electric wire.

24 HOURS LATER IN THE ABANDONED COPPER MINE...

STICK 'EM UP, TOM AND NICK GARSON! YOUR ATTEMPT TO GET REVENGE ON THE G-MEN HAS TRAPPED YOU!

GEE, I'M GLAD THAT BOMB DIDN'T GO OFF, MR. PURVIS!

SO AM I! WELL, PAUL AND JOAN, YOU SEEM TO HAVE EATEN UP ALL YOUR POST TOASTIES BEFORE I FINISHED MORE! MY STORY HAVE SOME MORE? ...THEY'RE JUST THE THING FOR A JUNIOR G-MAN'S BREAKFAST YOU KNOW!

BOYS AND GIRLS! JOIN MY JUNIOR G-MAN CORPS!

I'LL SEND YOU FREE MY OFFICIAL JUNIOR G-MAN BADGE... PUT YOUR NAME ON THE SECRET ROLL... AND SEND YOU MY BIG EXCITING BOOK THAT TELLS ALL ABOUT CLUES, SECRET CODES, SELF DEFENSE, INVISIBLE WRITING... SECRET'S EVERY JUNIOR G-MAN OUGHT TO KNOW... INSTRUCTIONS ON HOW TO BECOME A ROVING OPERATIVE AND EVEN CHIEF OPERATIVE! ALSO MY BIG CATALOG TELLING BOYS AND GIRLS HOW TO GET OTHER FREE PRIZES! SEND THE COUPON NOW!

Post Toasties

Corn Flakes

THIS IS THE NEW POST TOASTIES PACKAGE. THERE ARE MICKEY MOUSE TOYS ON EVERY BOX.

"Post Toasties—that's the clue to better breakfasts!" says Melvin Purvis

"BOYS and GIRLS, take a tip from B-m—have a big bowl of Post Toasties with luscious, ripe fruits and berries!" says Melvin Purvis.

"I know you'll like them—every spoonful! Post Toasties are made from the sweet, tender little hearts of the corn... where most of the flavor is stored. And every golden-brown flake is toasted double crisp, so it will keep its crunchiness longer in milk or cream. And Post Toasties are just the thing, these hot days, for a cool lunch, an afternoon snack—for a supper treat, too!"

Get Post Toasties, the better corn flakes, now... the price is low. And join the Junior G-Man Corps!

A POST CEREAL—MADE BY GENERAL FOODS

CLIP COUPON NOW!

MELVIN PURVIS, % Post Toasties, Battle Creek, Michigan

I enclose... Please send me the items checked below. Check whether boy () or girl ().
