Home Heating Hints

By John Barclay Heating Expert

Avoid Unhealthy Dry Air—Keep Radiator Humidifier Pans Filled With Water.
MANY winter colds are caused by hot, dry air in the home while the season for burning the furnace is on. Heat, of course, absorbs the moisture in the air. This hot air also dries out and damages furniture. You can easily and inexpensively provide for air-moisture by keeping a "pan humidifier," or hot

water pan, filled with water in each room of your home. Designed to hang out of sight on the backs of radiators, these pans furnish water that can be evaporated by the radiator heat and provide moisture for the air in the rooms. This prevents the air from becoming too dry and lessens the chance of catching or spreading colds. Warm air heating plants are equipped with humidifier pans. All you have to do is to keep them filled with fresh water.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste
Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery. Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination. There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your neighbor!
