ing really poor.

CHAPTER I

-1-Victoria Herrendeen came up from the beach with her sandy fingers tight in her father's hand. Those girls down there had been mean to her because she didn't understand the French they were jabbering with Mademoiselle, and they had laughed at her. When Dad had appeared, with his usual smile, wearing his old blue coat and the loose old white trousers Mother sometimes let him wear on a summer morning, he had looked to his daughter like an angel of light. Here was her unfailing friend and champion.

He came down from the San Francisco office when he could; not every week-end, but at least every other week-end, and when he was there Victoria had the companion she loved best in the world, and the best time any little girl ever had on a beach.

Dad was a chemist-whatever that was-and worked in a laboratory with a man named Butler, who was mean to him, and a lot of other men who were nice. Victoria knew about Butler because she had often heard her mother say, "Butler wouldn't put it over on me that way, Keith. I'd not stand it! I wonder what you do."

They loved each other dearly, she and her father. They were exquisitely happy together. While she waded, and he made a beach fire

They Went up the Path.

and scrambled eggs and boiled cocoa, they liked to plan dim future days in which they two would live alone on a desert island and signal to the people on the shore for what they wanted.

She was an odd-looking child, not pretty yet, but too small to worry about looks herself. Her mother, however, was extremely concerned about them. She had just begun to realize that Victoria might be quite lovely some day-or striking, anyway, distinguished-looking-and was watching her keenly for signs of it; but Victoria did not know that. Mrs. Herrendeen said to herself that if the child ever grew up to that big red mouth, and if the deep-set slategray eyes opened a little more, and if the thick straight tawny hair were cut and curled into a becoming shape, and the dark, freckled skin cleared, she would be all right. But the big teeth had to be straightened and the hair brushed . . .

Magda Herrendeen might indulge in a little sigh about it, deep in her own soul. She was far too fond of Victoria, far too loyal to everyone she loved, her own small daughter included, to give the child any hint of it. Vicky's life must be happy, confident, free; she must never feel any inferiority or shyness.

Magda had had no trouble with her own beauty. It had been given her at about fifteen as a complete gift from the gods. It was flawless; it was only comparable to other perfect beauty.

But it was not anything tangible or even describable about her that made her lovely, nor the firm straight body with its wide shoulders and thin hips, nor the fine nervous hand and modeled arm. It was a glow, a fragrance, a light that seemed to emanate from her, and that was somehow in her voice too, and in the clothes she wore.

Victoria could not appreciate her beauty, even when new men were introduced to her and held her small sandy hand while they asked her the question all the other men had: "Do you know you have a very beautiful mother?"

She would look at her mother on these occasions and smile shyly,

of sheer delight because it was sumtelephone Johnny last night." "Johnny?"

toria agreed eagerly, giving a skip

"The polo Johnny." "Oh, yes - Mr. Kendrick. It sounded like one of your friends." "You're my friend, Dad," Victoria said, kissing his hand.

They went up the path where the daisies and marigolds were stirring uneasily in the soft sea wind, and past the white gate that always looked as if it were washed and blown clean by the winds, and into the big wide-open porch door of the boarding house

Her hand was still in his as they crossed the hall and entered her mother's room-an airy room, with flowers in it, and the good scent of husband's face.

"Not here," said Keith Herrendeen.

"She's playing golf, maybe." "Well, what shall we do?"

Victoria, feeling a little uneasily apologetic for her mother's absence, regarded him hopefully.

'What would you like to do?" "Let's have lunch first-then we can decide." So they went out to the Salisbury steaks and the corn muffins and the baked potatoes, and Victoria had two pieces of peach

ther said. "Salt air," said Vic. They went to a little tent circus

that afternoon; all the children their napkins and were going, and Victoria was enchanted.

The circus was wonderful, too, and Victoria was tired and blissful and quiet on the way home; but she did rouse up when she and her fa-Mother there stretched out flat on the bed with the powder-blue taf- den touch of self-consciousness. really poor without them, and Vicfeta cover over her, sleepy, delitoria suspected that Dad would do cious, affectionate.

"Oh, hello, you darlings," she said. She stretched a hand toward her husband, and he stooped over been very rich once, and could give her for one of their quick kisses. "I knew you'd carried her off somewhere because the Kinsolvings' nurse came up here half an hour these even, every day. And then ago," she added, jerking her long she had had a great big house to lovely body over so that he could put them in, and servants to find find a narrow ledge on which to vases for them. Mother had had a sit. "Sit there, Keith. Did you have a nice time, Vicky?"

Victoria burst into a very delirium of reminiscence, but as she presently discovered, neither parent was listening to her. Her father took off his coat and vest and collar and began to walk back and ens and hotel dining rooms and on forth between the bureau and the washstand; there was an old-fashioned washstand in an alcove, and But this had been in the old days he washed his face and hands there, when they had the big house with combed his wet hair, found himself Ferdinand in the downstairs hall a fresh collar. Used It in Their Balms

mon greeting our nostrils, gives us | weight." pleasure even before we eat the food that it flavors.

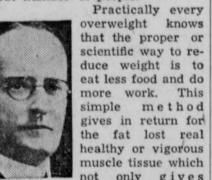

The human nose has always responded to this odor and the ancient Romans held it in particular esteem. They used it liberally in their ointments and balms as well as in their cooking, and as the ultimate mark of their appreciation of this spice they set it apart as the incense for sacrificial and ceremonial fires.

When a god was to be appeased, or the shade of a departed spirit was to be honored, it was the perfume of cinnamon wafted heavenward on uprising clouds of smoke that carried the message. No Roman doubted that an odor so pleasing to man could fail to placate the Olympian dieties.

The Roman media of atonement was not buns but bonfires, and their theory was that the more cinnamon consumed, the greater the incense and therefore the greater the pleasure of the diety or the spirit who was being honored.

Treatment of Overweight.

THEN insurance figures definitely show that in North America about two in every five of the adult population are overweight and that overweight is a handicap to good health, it is only natural that overweight condition should be a matter of vital importance to a great number of people.

Dr. Barton work or exercise, thus giving further strength.

However those of normal weight on food and performing more work means to the overweight individual. He has been given this great depoint he has been given this dislike for work or exercise. Further, every time he performs a simple acwork than when this is done by one of normal weight.

Thus to those of us of normal weight, if we wish to eat an extra slice of bread, an extra square of butter or a second dessert, we don't give this extra food a second thought. To those who are overweight it means just that much extra fat added to their weight.

Time to Try Other Methods.

However, food can only be reduced to a certain point, and only for a sat down. The lovely vision stooped | certain length of time. When the to kiss his forehead. She caught up time arrives when no more weight Seeds Should Be Kept seen her catch it up a hundred eating just the amount of food that times; it was her only one, except should be eaten if he were of norfor the two shawls. Bayer and H. used in 106 unselected overweight There was a young man in a light | patients treated in an out-patient course when the patients only report once a week or once a month this is to be expected. The results accomplished show that diet alone will take off an average of 15 pounds in less than three and one-half months. When dieting fails to get results, either thyroid extract or dinitrophenol appears to be effec-The strong fragrance of cinna- tive in causing a further loss in

When there was no loss shown for a whole month, the patient continued for one more month on the reduced diet. If at the end of this time (two whole months) there had been no loss of weight then thyroid extract was given as long as the patient continued to lose weight. When the weight remained the same then dinitrophenol was used until there was no further loss; at which time it was felt that the limit of the reduction in weight had

been reached. It was found that when 20 pounds had been lost by diet alone, another 5 or 6 pounds could be taken off by the use of thyroid extract or dinitrophenol.

Itching Pruritis.

It has been truly said that "all the world itches, but for different reasons in different persons," Thus the very cleanest and the very dirtiest individuals itch; those who perspire too much or not enough, itch; those who are big eaters and those who are small eaters, itch. Itching, or pruritis as it is called by physicians, when it exists for any length of time has usually been referred to a skin specialist. However itching can be a symptom of so many ailments that it is really the work of the family physician, according to an article by Lord Horder in the British Lancet.

He mentions among other causes of itching such ailments as diabetes, jaundice, leukemia (great increase in the white corpuscles in the blood) and uremia (waste products left in the blood that should have been removed by the kidneys).

One of the commonest causes of

itching is gout.

That food and other substances to which individuals are sensitive can cause itching is very clearly shown in those cases where hives (urticaria) and eczema appear after eating foods or coming in contact with certain substances.

Some organic ailments of the nervous system have itching as a symptom.

The thought then is that itching may not be due to any skin condition but to any of the above mentioned causes.

Records Help in Improving Sheep Ask Me Another

Systematic Check Is Urged to Produce Better Wool and Mutton.

By L. K. Bear. Animal Husbandry Spe-cialist. Ohio State University. WNU Service.

One line of pencil work a year for each ewe in the farm flock may help materially in improving the retrying to prevent and reduce the turns from wool and mutton, as a written record is a great aid in culling inferior animals.

Profits from sheep depend a great deal upon producing lambs and wool which will bring top market prices and that is impossible if the breeding flock lacks uniformity. duce weight is to Fine wool ewes should shear from 10 to 14 pounds of wool which will grade Delaine or fine combing, and simple method coarse wools should shear 8 to 11 pounds that will grade as combing

Records kept at shearing time will furnish a basis for taking out of not only gives the flock those ewes which have strength of body but light fleeces or which produce wool actually invites of a poorer grade than the flock average. The owner of the flock knows at shearing time which ewes should be discarded but it is doubtcannot grasp what cutting down ful if he can remember the fleece weights unless a written record is

kept or the culls are marked. Many of the light lambs that are sire for food and up to a certain not ready for market when the others are ready for sale are late lambs caused by shy breeding ewes or they are unthrifty lambs from tion like walking or running he is ewes which are poor milkers. Ewes doing perhaps 50 per cent more in either of these classifications should be discarded, and, again, a written record will help in identi-

fying the culls. Simple record forms that provide means for keeping a check on each ewe in the flock have been prepared by the departments of animal husbandry and rural economics. One line across the sheet provides space for all the records needed on a ewe for a year. County agricultural agents can supply these flock record forms upon request.

Dry While in Storage

Crop seeds protected from dampness in storage will have a better chance of germinating and producing strong plants even when handicapped by unfavorable weather.

Dampness in storage has a tendency to start the germinating process, and this weakens the seed, explained Dr. R. F. Poole, plant pathologist with the North Carolina Agricultural Experiment station.

Irish potatoes stored in banks should be aired frequently to prevent decay.

Corn, small grain, and other seed should be kept in lead-proof buildings with adequate ventilation to prevent the accumulation of too much moisture

However, this does not mean that the seed should be openly exposed to infestation by insect pests, Dr. Poole cautioned.

We have not found vaccination for

Vaccination for Mastitis

mastitis to be satisfatory. There seems to be no satisfactory treatment for this disease because numerous kinds of drugs, vaccines and other treatments have been relatively inefficient. The acute attack of mastitis probably is best treated with hot applications, or, if necessary, a suspensory bandage. Most essential, however, is the prevention of the disease. It is contagious, and infected animals are dangerous to the rest of the herd. Animals infected with mastitis should be segregated at one end of the barn and milked last. The hands of the milker should be carefully cleaned and disinfected following the milking of each animal. Platforms on which the animals stand should also be disinfected. -C. P. Fitch, chief, Division of Veterinary Medicine, University Farm, St. Paul.

Reed Canary Grass Reed canary grass is higher in

feeding value than timothy hay. In a trial carried on at University farm, St. Paul, it was found that fillies made larger gains with less grain when fed canary grass than when fed prairie hay. Prairie hay is just about as good, if not a little better, than timothy hay for horses. I do not know whether canary grass would excel alsike clover hay for horses, but I think it would be almo as high in feeding value. Alsike clover might prove a little more valuable than Reed canary grass for young stock because it is a little higher in crude protein. If Reed canary grass is not too coarse, it is excellent hay for horses .- A. L. Harvey, Division of Animal Husbandry,

Higher Farming Costs Labor and products bought by the

farm in 1937 are predicted by the Department of Agriculture to cause a sharp increase in the cost of farming. Price for feed for live stock and seed will stay high until the crop of the 1937 season replenishes the present drouth-reduced supply. Farm machinery, fertilizer, and building supplies are expected to advance some in price due mostly to the increased cost of labor and material. Wages on the farm have increased materially from the low in 1933, \$14.77, to the average of \$22.51 per month.

Service Wins

HANK God that when a man does a bit of service, however little it may be, of that, too, he can never trace the consequences. Thank God that that which in some better moment, in some nobler inspiration, you did ten years ago to make your brothers' faith a little more strong, to let your shop-boy confirm and not doubt the confidence in man which he had brought into his business, to establish the purity of a soul instead of staining and shaking it, thank God, in this quick, electric atmosphere in which we live that, too, wins forth .-Phillips Brooks.

Don't Sleep When Gas Presses Heart

If you want to really GET RID OF GAS and terrible bloating, don't expect to do it by Just doctoring your stomach with harsh, irritating aikalies and "gas tablets." Most GAS is lodged in the stomach and upper intestine and is due to old poisonous matter in the constipated bowels that are loaded with ill-causing bacteria.

If your constipation is of long standing, enormous quantities of dangerous bacteria accumulate. Then your digestion is upset. GAS often presses heart and lungs, making life miserable. You can't eat or sleep. Your head aches. Your back aches. Your complexion is sallow and pimply. Your breath is foul. You are a sick, grouchy, wretched unhappy person. YOUR SYSTEM IS POISONED.

Thousands of sufferers have found in

SYSTEM IS POISONED.

Thousands of sufferers have found in Adlerika the quick, scientific way to rid their systems of harmful bacteria. Adlerika rids you of gas and cleans foul poisons out of BOTH upper and lower bowels. Give your bowels a REAL cleansing with Adlerika. Get rid of GAS. Adlerika does not gripe—is not habit forming. At all Leading Druggists.

GOT RID OF BIG UGLY PORES

PLENTY OF DATES NOW...DENTON'S FACIAL MAGNESIA MADE HER SKIN FRESH, YOUNG, BEAUTIFUL

Romance hasn't a chance when big ugly pores spoil skin-texture. Men love the soft smoothness of a fresh young complexion. Denton's Facial Magnesia does miracles for unsightly skin. Ugly pores disappear, skin becomes firm and smooth.

Watch your complexion take on new beauty Even the first few treatments with Denton's Factal Magnesia make a remarkable difference. With the Denton Magic Mirror you can actually see the texture of your skin become smoother day be day. Imperfections are washed clean. Wrinkles gradually disappear. Before you know it Denton's has brought you entirely new skin loveliness.

EXTRAORDINARY OFFER

You can try Denton's Facial Magnesia on the most liberal offer we have ever made—good for a few weeks only. We will send you a full 12 or. bottle (retail price \$1) plus a regular sized box of famous Milnesia Waters (known throughout the country as the original Milk of Magnesia tablets), plus the Denton Magic Mirror (shows you what your skin specialist sees)... all for only \$1! Don't miss out on this remarkable offer. Write today.
