prompt lubrication. And less than a dozen cold starts a day can threaten an hour's lubrication delay. In the course of the Winter that could exceed 90 hours!

Let's not just hope that 90 hours or even half that won't hurt. Avoid the worst chance of this harm . . . change today to OIL-PLATING. Your engine

becomes OIL-PLATED as you drive from Your Mileage Merchant's Conoco station with a fill of his Conoco Germ Processed oil-patented. The rare man-made substance in this Germ Processed oil effects a close bond between oil and engine parts. OIL-PLATING can't all drain down every time the car stands, and therefore OIL-PLATING isn't waiting to be restored "from scratch" every time you start up. In advance of any oilflow, OIL-PLATING is there! ... Lets the starter turn easy, the engine turn fast, and you're safely away. The only wait is a good long one before you add another quart of Germ Processed oil. OIL-PLATE today. Continental Oil Co.
