Germany Prepares for British Air Attack

There have been many pictures of British preparations to ward off Nazi invasion attempts, but very few showing Nazi preparations against British effort. These pictures show the preparations being made by the Germans on the coast of occupied France, to withstand the daily batterings of the RAF. At left, an anti-aircraft gun is placed in position. Be careful when grating lemon rind that you do not grate any of the white part underneath the skin, which contains no lemon flavor and is very bitter. The lemon flavor comes from the oil found only in the yellow rind at the surface.

Milk scorches easily, so heat it in a double boiler or warm it over low heat in a pan set on an asbestos mat. To help keep the milk from sticking to the sides, rinse the pan in cold water before heating.

When preparing bread crumbs for escalloped dishes, croquettes, etc., tie a cloth or paper bag over the mouth of the meat grinder and put the bread in. The crumbs will then be deposited in the bag instead of being scattered on the floor.

Never use a sharp instrument to loosen the ice trays in your refrigerator; you might puncture the coils. Take a dull instrument and use it as a wedge under the rim. When you replace the trays, wipe them with a cloth. It's the freezing of the excess water that makes trays stick.
