## Guarding 'The Rock' From Sea and Air

A view from an accompanying British war plane high above Great Britain's Rock of Gibraltar, showing another plane on patrol duty, winging high over the harbor, where are several men o' war. All are on the alert against attack by German planes from the air and German troops that might be given a "corridor" down to southern Spain by the Fascist government. The Rock, which is one of the most formidable fortresses in the world, is Great Britain's effective western door to the Mediterranean, through which British commerce and warships flow from day to day.

## Delayed Inaugural

Forrest C. Donnell was inaugurated Missouri's forty-first governor after a six weeks' delay because of contested election. He is the first Republican governor to crack the Missouri capitol's Democratic ranks since the Roosevelt landslide in 1932. This picture shows him at the inaugural in Jefferson City, Mo., with Col. ## Watchful Waiting Off Dutch East Indies

The Dutch East Indies, eyed greedily by Japan, is the new danger-spot in the Far East. When Holland fell, Dutch warships went to protect these colonies. ## Strange Interlude in War at Sea

Although facing the triple threat of submarines, mines and bombing planes, these men of a British patrol vessel can still grin cheerfully as they watch one of their number give a shipmate a trimming. TIPS to  
Gardeners

## GARDENS FOR DEFENSE

THE home gardener has an important place in our program of national defense, a much more important role than he played during the first World war.

In the face of these facts, gardeners are advised to do two things: Plan to devote increased space to vegetable gardening; and perfect plans for the 1941 garden so as to get the greatest possible yield from the available space.

In stepping up yield from vegetable gardens of limited size, two major devices should be relied on, first, companion cropping—the planting of fast-growing crops like radishes, spinach, and lettuce between rows of slower-growing vegetables like tomatoes, and cabbage. The fast growers will be pulled and used before the other crops need the space.

Second, succession cropping—the repeated planting of major crops such as beans, sweet corn, radishes, carrots, beets, and lettuce. Moderate-size, new plantings made at regular intervals during the early part of the season will provide a steady supply of fresh vegetables until the season's end.

## Slow Murder

Many states no longer follow the old common law that a person cannot be indicted and tried for a murder if the victim lives for a year and a day after the assault. For instance, in New York a short time ago, a man was convicted of murder although the deceased did not die from the bullet wound for more than four years.
