## A HAPPY NEW YEAR!

With this greeting we wish to express our appreciation of your many favors during 1941. It has been a real pleasure to serve you and we hope that you have been pleased with our efforts. During 1942 we will strive to render even better service to our customers in price or quality if it is possible to do so.

LECTRIC customers of Consumers Public Power District in the Northeastern Division, now own an additional \$85,000.00 in properties of this division as a result of a scheduled bond retirement on January 1, 1942. In retiring \$85,000 outstanding bonds. Consumers follows a definite calendared schedule, and as each payment is made, the electric customers of the division gain that much additional ownership the property. . . . It may seem a paradox, and might be best described by the old saying of "Eat your cake and have it too." which is just about what customers of Consumers do. A definite percentage of the roverus is set aside each month in a STPARATE FI D for the retirement of bonds in and division of Consumers Public Power District. That fund is earmarked for the payment

of bond principal and it is not or CAN NOT be used for anything else. As these bond retirement payments fall due, the money is always on hand and ready for prompt payment on the exact date due. So, it may be said that while electric customers in this division are enjoying the multiple benefits at efficient, reliable electric service at attachery low rates, they-at the some time-me bacord of year by year, owners of larger and langer on las in their own electric processes so that a figurely they will be the sole owners of the electrical facilities that serve them. Of course, in addition to the bond principal payments such as the one just made, interest on these bonds is also being paid on a regularly scheduled arrangement. In truth, then, Consumers IS your OWN electric service institution. in which you acquire a greater equity each year.
