A WEEK OF THE WAR

War Production Chairman Nelson reported over-all munitions production in September was 7 per cent above August, with airplanes up 10 per cent, ordnance up 7 per cent, Navy and Army vessels up 22 per cent, and merchant ships up 10 per cent.

The report stated that the WPB index of munitions production increased 24 points in September to 381—four times the production rate at the time of Pearl Harbor. The treasury paid out \$5,500 million for war purposes, an increase of \$300 million over August. This amounted to 40 per cent of all payments made in the United States for goods and services during the month.

Mr. Nelson's report said four-engine bombers rolled off assembly lines very nearly on schedule. The output of heavy aircraft showed a marked increase over August, with the output of planes below August. Some new plants which came into production recently made a much better than anticipated showing. Propeller production continued a major problem, although enough propellers have been made thus far to fly all planes.

While merchant ship production was 10 per cent above August, actual tonnage delivered was 34 per cent above August—1,009,000 deadweight tons compared with 753,000 in August. This was 12 per cent above first of the month forecasts and approached closely the total production of merchant shipyards last year. During the month, 12 major combat vessels were launched, the report stated. Deliveries of major vessels were greater than forecast, but deliveries of other types were behind expectations.

The Army Specialist Corps, which had induced approximately 1,300 men, was abolished, the War Department announced, and all future commissions directly from civil life will be given in the specialist reserve until the men commissioned have completed a course of military training. Then they will be commissioned in appropriate grades in the Army.

Members of the Corps already in the service will be tendered commissions in the Army of the United States, if qualified.

The change was made, the War Department said, because it was found in advisable "in the interest of efficiency, uniformity of operations, discipline and the avoidance of duplication of effort" to have two uniformed services. Applications now on file for the Specialist Corps will "continue to be available for consideration for appointments in the Army of the United States," the department said. Under the rules no person under 35, without previous commissioned service, will be appointed unless he has been classified 4-F for physical disability. No person without previous commissioned service who is between 34 and 45 will be accepted if his classification is 1-A or 2. Exceptions will be made to these rules only where there is "critical need" for the applicant's services.

War Secretary Stimson reported the Alcan highway is now open to trucks carrying munitions and materials to troops in Alaska for its entire length of 1,671 miles. Formal opening will probably take place November 15, he said. Mr. Stimson said the furlough period of two weeks given newly inducted soldiers will be reduced to one week. Approximately 3,400 tons of mail, including more than 1,000,000 Xmas parcels, were sent to U. S. armed forces overseas during the first 25 days of October.

The War Front
Army Chief of Staff Marshal, in a letter to Commander-in-Chief King of the U. S. Fleet, said the "skillful seamanship" of the Navy has already escorted 800,000 soldiers safely "across the submarine-infested waters of the Atlantic and Pacific."

The Navy reported November 1 that two enemy aircraft carriers, two battleships and three cruisers were damaged and 100 airplanes destroyed in a great sea and air battle 250 miles north of Guadalcanal. Navy Secretary Knox said the Japanese fleet units have retired from the scene in the Solomons and the "first round" of that

battle is over. In the battle the U. S. lost an unidentified aircraft carrier and the Destroyer Porter. Following this battle U. S. Naval units shelled enemy positions on Guadalcanal. On the ground U. S. Marines and soldiers repulsed all Japanese attempts to dent their positions around Henderson Airfield. General McArthur's headquarters in Australia reported November 2 that fresh bombing raids on Jap bases at Buin and Faisi were believed to have sunk or damaged seven more enemy surface ships.

Labor Supply
President Roosevelt told his press conference that a compulsory registration for American women to determine their availability for war work is being considered. While no compulsory drafting of women for war industries is contemplated, he said, there is need for information which a compulsory registration could produce. Such a registration would require legislation which probably could not be completed until close to the end of the year.

Labor Secretary Perkins reported 4,500,000 new workers must come into the labor market before the end of 1943 and an additional 3,000,000 by the end of 1944. War Manpower Commission Chairman McNutt said that about 500,000 workers will be released to war industries when nationwide gasoline rationing becomes effective November 22.

Livestock Prices Stronger In Active Market Here

The general market condition took on a firmer undertone at the local auction last Monday, with resultant stronger prices on most classes of cattle. Action was brisk and the outlet was broad, as buyers were determined to buy cattle and get them home before the government restrictions clamp down later this month. The quality of the offering ranged from fair to good, with few choice cattle listed.

The best lightweight steer calves paid an extreme top of \$14.60, with the bulk ranging from \$12.75 to \$13.75. Heifers in this class cashed at \$13 on a scattered few. The long end moved at \$11.50 to \$12.50.

Yearling steers of good quality sold upwards to \$12.75. Bulk brought from \$11.50 to \$12.50. Yearling heifers made \$11.50 to \$12.50. Two-year-old steers sold mostly from \$12 down.

Cow receipts were rather heavy. Good beef cows paid up to as much as \$10.40. Bulk of supplies cashed from \$9 to \$10. Plainer

grades sold in the eights. Cannery and cutters turned at \$6 to \$7. Bulls scaling 1300 lbs. cashed at \$10.75 down.

In the hog division prices dipped considerably under the pressure of the current price decline at the central markets. Butchers averaging 225 to 250 lbs. made \$13.45 and \$13.50. Lighter weights sold 15 cents per cwt. cheaper. Sows sold mostly at \$13.45. Feeders scaling 60 lbs. topped at \$17.25 with a few 100-pounders making \$16.

More than 100 sheep were on offer here. Breed ewes sold by the head; lambs paid \$11 per cwt. A few horses completed the day's offering. Next auction will be on Monday, Nov. 9.

ONE BIG JOB IS TO MAKE 50 BILLION EGGS

Uncle Sam needs more than 50 billion eggs this year, and he's urging farmers to feed better feeds to encourage full production.

O'Neill Hatchery is doing its part and offers poultrymen a laying mash that's "geared up" more than 5 to 1 over ordinary laying mash in number of vitamins and trace minerals added. This new powerful yet moderately priced egg mash is called Shamrock "16 Cylinder" Laying Mash, because it's actually supercharged with 16 vitamins and trace minerals by a special concentrate, VITAMELK, made by O'Neill Hatchery's affiliated laboratory. To keep hens healthy and laying heavily, try Shamrock "16 Cylinder" Laying Mash.
