## HOUSEHOLD HINTS

If there is a constant smell of burning when cooking is going on, examine gas burners. They are probably filled with sediment from "boilovers."

Keep the broiling pan in your oven as clean as any of your other kitchen utensils. After using it wash it in plenty of hot water and soapuds. Dry it perfectly before returning to the oven. Any moisture left on the pan may cause rust in the oven.

When removing paint or varnish from a floor, apply the remover to a small area at a time, and then scrape the surface with a putty knife after the remover has softened the finish.

House plants grow toward the sun. Turn them frequently so that they will not grow one-sided.

Telling time in the Navy is on the 24-hour system. Morning hours are from one to twelve, but afternoon hours are from 1300 to 2400 (midnight). So if you ask a sailor the time and he says "seventeen," subtract 12 and you get five o'clock in the afternoon. It's simpler if you ask him what cigarette he smokes. Chances are he'll say: "Camel," for Camel is the favorite cigarette among Navy men as well as among men in the Army, Marines, Coast Guard. (Based on actual sales records from service men's stores.) Local dealers are featuring Camel cartons as gifts for men in the service from the folks back home.—Adv.

### SNAPPY FACTS ABOUT RUBBER

Seed-bearing pods high up in rubber trees when ripe go off with an audible pop. The pods, about the size of a goose egg, contain formations of gas which explode when ripe, and throw the seed as far as 100 feet. The French call rubber cautiousness from an Indian term meaning "weeping tree." Ninety per cent of roadside flats that plague car owners can be avoided. Checking air pressure while tires are cool, before inflating will show up tubes that are losing an abnormal amount of pressure due to slow leaks. Temperature, topography and types of roads as well as driving habit of owners account for wide variations in mileage from identical tires. These factors may account for a tire turning in from twenty to twenty-five thousand miles of service in Chicago whereas from seven to eight thousand miles may be the mileage it will render in Texas.
