Claims Complete Proteins Promote Maximum Health

With food shortages impending, the quality and quantity of proteins in the human diet is assuming greatly increased importance. This subject was recently emphasized by Dr. Morris Fishbein, editor of the Journal of the American Medical Association. He says many people think only in terms of vitamin deficiency in connec-

tion with nutrition. However, when the facts become known regarding conditions now prevailing in Europe, Dr. Fishbein feels certain it will be found that protein starvation is far more serious than vitamin deficiency because it produces a breakdown of human tissues. This in turn opens the way to disease to a far gleater extent than is ordinarily caused by vitamin de-

"In this connection," states Milton Hult, president of the National Dairy Council, "the United States is in a fortunate position, in that the amount of protein in the American diet coming from milk and its products has greatly increased in the past few decades. Actually, milk, cheese and ice cream furnish 40 percent more protein for human consumption than was true in this country 30 years ago. Since the proteins of milk are of very highest quality they are of special importance during the emergency period in suplementing the less complete ones in many other foods. To supply these needs it is anticipated by the U. S. Department of

Agricuture that more fluid milk

# Will Americans Be More Tender With Their Money Than Lives of Their Sons

Washington, D. C .- A blunt challenge-whether Americans will be more tender with their money than with the lives of their sons-confronts U.S. citizens as they prepare to meet the appeal of the government to put an additional 13 billion dollars into the fight in the next three weeks.

American dollars which run off to citizens to come out and fight,

current income must lend extra money to their government during the Second War Loan campaign (which started April 12).

In recognition of the spirit of sacrifice which is sweeping over the land as our troops swing into offensive action in Africa and await the signal for a landing in Europe, the Treasury Department is offering a series of government bonds to fit every pocketbook. No matter whether Americans buy

the familiar Series E Bonds or 21/2 per cent bonds or 2 per cent bonds or tax certificates, they will be doing their part to make the Second War Loan drive a success.

Consumer Spending Too High. Consumer spending in 1942 was money to the government,

will be available this year for

consumption as such than ever

before and that fluid milk and

cream consumption will reach a

new high of 408 pounds per person for the year 1943."

As these Millions of workers who now are items grow scarcer, more of our inbuying War Bonds regularly out of come must be diverted from such expenses into government bonds.

During 1942 millions of our fathers, sons, relatives and friends were in training here and abroad. Some were already in action. Casualties were beginning to bite into every community. War Bonds became a vital link between the home and fighting fronts.

Today sacrifice has become a way of life for America's fighting men. Civilian spending on the 1942 scale must go out the window if the home folks are to attempt to match the heroism of our boys at the front.

Not every American can take his place in a bomber or in a foxhole or on a fighting ship but he can fire away at the enemy by lending

best we've had in quite a spell.

"That's true, Henry ... all over the country. As a matter of fact, there's been quite a surplus supply of grain according to some figures I saw in one of your farm papers the other day. But that surplus is being used to mighty good advantage and is making the

contribution of you farmers to the war effort

"Here's just one example of what I mean. The beverage distilling industry alone will use 100,000,000 bushels of this surplus to make alcohol seriously needed by the government for gunpowder, synthetic rubber,

chemicals and medical supplies. "So, keep it growin' Henry...you're doing a great job."

Conference of Alcoholic Beverage Industries, Inc
