Housewives Are Urged To Turn In Waste Fats

That there is an acute need for more fats and greases is emphasized in a recent statement by Donald M. Nelson, chairman of WPB.

Over 85 per cent of all glycerine produced is now used for military purposes and the need is increasing. Housewives have been most co-operative in response to appeals to save waste fats; but government surveys reveal that while six out of ten women are saving fats, only three out of ten have thus far been delivering their waste fat to meat dealer collectors.

Directions are very simple. Housewives simply strain waste fats of every kind into a clean can and, as soon as the can is full, take over the functions which President Roosevelt transferred from the Board of Economic Warfare and the Reconstruction Finance corporation.

DEHYDRATION SAVES SHIPPING SPACE

With Allied forces fighting on battlefronts scattered around the world, tremendous amounts of food and ammunition are constantly being shipped to supply these numerous bases and provide a reserve. A great space saver has been the dehydration of foods which not only saves shipping area, as is shown in the chart above, but makes it possible for soldiers and sailors to carry enough food in their pockets to sustain them for several days.
