

# Let's 'Tune in' on this Discussion...

Wherever you go you run into discussions like this. The topic might be anything from the current movie to important world affairs. But, to hold your own in these discussions, you must be "in the know." For instance, suppose the conversation switches to the merits of your Consumers Public Power District—

## Here's Something To Remember—

When you talk about Consumers Public Power District, you are talking about thousands of Nebraskans—including yourself if you live in a community served by Consumers.

In reality, Consumers is the people of Nebraska. Under the provisions of the Nebraska Legislature, this Nebraska institution is owned and controlled by the people of Nebraska and operated for the sole benefit of Nebraskans.

To provide even further assurance that you may continue to enjoy the advantages provided by this state-wide electric system, the Nebraska Legislature has added to the law provisions that the local distribution system of any community served at retail by Consumers must be turned over to that community—debt-free—when Consumers has paid for the property, if the people of the community so desire.

### YOU SHOULD KNOW THESE FACTS...

- 1 Consumers Public Power District is entirely self-supporting—while it pays taxes, it receives no tax money for its support.
- 2 As a part owner of Consumers, you receive the benefits but you are not required to invest one cent either directly or in taxes.
- 3 Consumers is actually a local institution. The people of each community are assured the benefits and ultimate debt-free ownership of the facilities in that community.

## Attention, Car and Truck Owners!

The State Tax Commissioner having adopted and issued a schedule of values applicable to cars and trucks to be assessed in 1945, which is higher than the 1944 valuation, the tax on your car or truck is more in 1945 than in 1944.

Owing to insufficient description of cars, and particularly trucks, in the schedule issued by the Tax Commissioner, it was very difficult to properly identify a car, and especially trucks, registered with the County Treasurer, and set a proper valuation on them, hence in some instances the valuation for 1945 may be excessive.

You have received notice of you taxes on your car or truck. Before paying it, if you will check with this office as to the valuation you are paying on, and upon proper check of the kind of a car or truck you have, it is found the valuation is excessive, an adjustment will be made before you pay the tax. If, on the other hand, you have paid the tax, if an adjustment should be made a refund of taxes will be recommended by me.

In winter, your car needs an oil that flows freely and lubricates instantly. Equally important, the oil you use must not thin out and breakdown after your motor gets hot.

With Champlin HI-V-I... the new fighting aviation oil... you get this TWIN-ACTION.

For Champlin HI-V-I was developed especially to meet all weather demands of our air forces... to be used wherever they had to fly... in freezing northern outposts... seething desert wastelands... and through the stratosphere.

N-Hexane, an extraordinary new solvent, thoroughly de-waxes Champlin HI-V-I, producing a remarkable new cold pour test rating.

It flows freely at zero or below. Then, the unusually high viscosity index of Champlin HI-V-I gives it extra stamina to withstand the most extreme temperatures... even boiling or above.

So this winter, give your aging car on the ground, the TWIN-ACTION lubrication essential in the sky. Use Champlin HI-V-I.

Available now in refinery sealed cans from friendly Champlin service stations and dealers. Also always ask for Champlin PRESTO gasoline.
