"All women should marry and have lots of babies."—Mrs. Winston Churchill, on how to preserve peace.

"I'm wearing them myself"—Clifton Watson, Washington, D. C., bachelor who won 6-pr. of ladies' nylons on radio quiz.

"Farmers are sick of strikes. They need trucks, cars, machinery."—Edward A. O'Neal, pres., American Farm Bureau Fed.

"Labor needs to carry on the fight more militantly."—Wm. Z. Foster, chairman, Communist Party of U. S.

Mental Hazard
By BERT R. FERRIS
McClure Syndicate.
WNU Features.

VALERIE hummed softly as she spooned the coffee into the silex and plugged it in. She was thinking—thinking hard. She knew what was wrong with Monte, but she didn't know what to do about it. The sports writers were calling him a hoary veteran, and the arm they had so short a time before proclaimed as the "greatest" in baseball, they now glibly referred to as "Monte Cleveland's six-inning flipper."

Monte crumpled the paper and strode angrily about the room. "So I've got a six-inning flipper, have I?" he snarled. "Leo is a soft-headed old woman for starting me today, is he? Just wait until this afternoon, I'll show 'em a six-inning flipper! And I'll let 'em look at it for a full nine frames, too!"

Valerie was careful that no hint of sympathy should creep into her voice when she said quietly, "I'll wait, honey. And I'll be right there when you show them."

"Atta girl!" He caught her to him in a quick hug of appreciation. "It will help a lot just to know that you're in the stands pulling for me. I'll meet you at the south gate after the game. You'd better be early, though, there'll be a mob out to watch this play-off. You don't go for that junk, do you, Val?" he asked.

"You don't believe the old soup bone is gone . . . that I'm washed up with the game . . . ?"

"I don't even read it," she interrupted with a lie. "You know your arm is still good, Leo knows you are still a starting pitcher, and after today the sports writers will be telling the world about it."

"You're mighty well right they will!" Monte said between clenched teeth. "What do those guys expect

a ball player to do when he reaches 33, hang up his glove and collapse into a wheel chair?"

But Monte Cleveland knew he was whistling in the dark. Even now there was a painful twinge in his shoulder. And he knew that after two or three innings his arm would be numb. By the end of the sixth he would be tossing them up so any school kid could find them.

As Monte walked toward the mound, Valerie waved her little blue hat at him from the first row in the upper stands.

He pitched carefully. At the end of four innings only 12 batters had faced him. His own team had batted twice through the order and were out in front 2-0.

In the fifth he was forced to bear down all the way, and as he walked to the bench he felt that every ounce of strength had left him. His shoulder was thumping and his arm hung like a piece of lead pipe.

"Here's a note your wife sent down," the coach said, handing him a torn piece of score card.

Monte read the few lines, ripped the paper into bits and flung them away. His eyes were stormy. He looked into the stands. The blue hat was gone. He pulled the peak of his cap low, stepped in on the rubber and sent his famous fireball sizzling across the inside corner.

Monte got set for the next pitch. "Go in! into the sixth and she pulls out to have a cocktail with a friend!" he muttered to himself.

"That's O. K. with me!" The crashing impact of his delivery rocked the catcher, Gabe Hart, back on his heels. Monte stabbed the ball out of the air, wound up and whipped a vicious outside hook past the batter for the third strike.

In the last three innings Monte made but 11 pitches—pitches that brought a hundred thousand fans to their feet to scream themselves hoarse.

Valerie was waiting alone at the south gate, and Monte stopped short, astonished. "Where's your friend?" he asked. "You missed a good game."

"Oh, Monte," she said softly, coming close to him. "I'm so happy! I . . . I think I'm going to cry."

"What's the idea of running out on me?" he demanded. "I'm out there biting my tongue out with every heave, and you . . ."

"I didn't run out on you, sweetheart," Val said. "I only moved to the lower stand and took off my hat. I sent you that note to make you fighting mad. You see, honey, as I watched you through the first innings, it occurred to me that the sixth had come to be a bad mental hazard for you, and I felt sure that if you were to get downright mad . . . oh, darling, you were wonderful!"

Bermuda Opens Public Highways to Autos

A legislative decision to open Bermuda's highways to the automobile extends to the pleasure car a privilege which for years was granted only to public service and approved commercial vehicles. The much publicized motor law of this British Colony, lying in the Atlantic ocean about 640 miles southeast of Cape Hatteras, the nearest American mainland, fixed the operation of cars by the nature of the roads, explains the National Geographic Society.

Possession of an automobile was not forbidden. The law simply banned its use on public roads. As most of the roads are public, and private roads are few and short, the law in effect prohibited the general use of automobiles. Usefulness of power-driven vehicles was recognized in the motorized fire department, automotive ambulances, and sanitation and highway maintenance trucks. Freight trucks are available for hauling loads too heavy for horse-drawn wagons! A railroad has been in operation since 1931.

Back of the ban on pleasure cars was the concern of many residents to assure continuance of the traditional peace and quiet and the slow tempo of life that, along with the climate, constitutes the distinctive appeal to tourists. Bermuda early recognized the worth of the three R's freely offered by Nature—rest, relaxation and recreation.

Add Strange Shark to Smithsonian Collection

The only specimen in North America of one of the sea's strangest denizens, the bramble shark, has been added to the collections of the Smithsonian Institution.

It is a shark of medium size—the present specimen is six feet and five inches long—whose body is covered with short, sharp spines. This fantastic creature seems widely distributed through the Atlantic and Pacific. It has been reported from the Atlantic coast of Europe, the Mediterranean, and West and South Africa. The specimen now in the Smithsonian collection was caught in a net off the California coast and the creature has been reported two or three other times in the Pacific.

The bramble shark, however, is not likely to come into the nets of collectors. Its general flabbiness stamps it as a deep-water animal and the anomalous position of its fins indicates that it is a weak swimmer. Apparently it feeds chiefly on smaller fish. U. S. National Museum biologists who have studied the specimen say that it certainly was not a man eater and probably was quite inoffensive. Its spiny armament obviously was for protection, indicating that it was not an aggressive animal.

Plastic

Nylons are a family of related plastics having imposing industrial possibilities. The patent literature records more than 300 uses covering a bewildering variety of products. Industrially, nylon is a valuable plastic because of its extreme toughness, good insulating properties in electrical equipment, high softening and melting temperatures, low flammability, and resistance to common solvents. Nylon plastics may be safely sterilized by steam, a property possessed by few heat-softening resins. Industrial products made by rapid and inexpensive injection molding of nylon include such varied items as slide fasteners immune to dry cleaning solvents and ironing temperatures, and spools having a wall thickness of only a hundredth of an inch, useful for winding electrical coils for aircraft instruments. Nylon molding powder now sells for about \$1.60 a pound.

New Water

A crisp light brown salted water with a slight cheese and taster potato flavor has been developed from potato and skim milk by dairy scientists of the department of agriculture in the course of research on new ways to use surplus milk. Sticks or croutons also may be made of this potato and skim milk mixture by bakers, biscuit makers or other food specialty manufacturers. The product offers a new outlet not only for skim milk, so valuable nutritionally yet so frequently in surplus supply, but also for potatoes, especially smaller and cheaper grades, also often in surplus. Because the wafers contain no fat and do not absorb moisture readily, they keep better than such products as potato chips or shoe string potatoes yet have much the same flavor appeal.
