**CASE  
MODEL "A" COMBINE**

**"Head and Shoulders  
Above the Crowd"**

● That's the verdict of those who know combines. If you always have clean, upstanding crops, you may not really need a combine so capable as the Case "A." But for small seeds like clover, that take real rubbing to thresh out... or a brittle crop like beans... or fine, fluffy seeds like some of the grasses... or even grain that is tough to thresh, the "A" is in a class by itself.
