...The JOHN DEERE No. 200 Two-Row, Pull Type Corn Picker

Here's the only corn picker that's completely successful in contoured corn and it's just as good on the straightaway—the John Deere No. 200 Two-Row, Pull-Type Corn Picker. The close-coupled hitch of the No. 200 permits the wagon to hug the picker on turns, with the wagon elevator staying over the wagon at all times. Famous John Deere construction of long, gently-sloping gatherers, low-down gatherer chains, ground-hugging snapping rolls, and big-capacity husking rolls assures more corn saved and better husking.

The lightweight No. 200 weighs 700 to 1,000 pounds lighter than other two-row, pull-type pickers, yet it has plenty of strength in its rugged construction. See us for complete details. Come in soon.
