

Church Overflows for Carsten Funeral

LYNCH—Funeral services for Chester G. Carsten, 37, were held Sunday, November 18, at First Methodist church in Lynch. The church auditorium was unable to accommodate the overflow crowd that gathered to pay final respects to the young Holt county farmer who was killed Thursday, November 15, in a cornpicker accident.

Burial was in the Scottville cemetery.

The late Mr. Carsten was born at Bonesteel, S.D., and was baptized in the Catholic church. He lived at Bonesteel as a boy and graduated from high school there with the class of 1931.

He was united in marriage to Irene Williams at Bonesteel May 13, 1931. To this union a daughter, Alyce, and 2 sons, Jerry and Bobby, were born.

In the year 1932, they moved to Nebraska, coming to Holt county in 1944, where they have since resided.

He served on the school board, township board and the PMA board for several years.

Survivors include: Widow—Irene; daughter—Mrs. Eldon (Alyce) Mills; sons—Jerry and Bobby; parents—Mr. and Mrs. Frank Carsten; brother—Howard Carsten; and twin grandsons—Timothy and Brian Mills.

The body lay in state at the funeral home in Lynch Saturday afternoon, November 17, from 1 to 5 p.m.

Rev. Charles Mitchell officiated at the rites. The loud speaker system was set up so those in the church basement and packed in the church lot for some distance around could also hear the services.

Friends and relatives attending from a distance included the following towns: O'Neill, Creighton, Verdigris, northeastern Holt county and Omaha, in Nebraska; Kolsipel, Mont.; Platte, Kenesha, Brandon, Pierre, Belvidere, Delmont, Yankton and Bonesteel, in South Dakota.

With Mrs. Mitchell at the piano, a mixed quartet composed of Florence Harris, Fern King, Ernest Darnell and Glen Hefflin, sang the hymns, "Beautiful Isle," "Lead Me to Calvary" and "Does Jesus Care?"

The pallbearers were Bill Alm, Veldon Pinkerman, George Calkins, Dan McKenzie, Cecil Withersax and Walter Songdroth of Bonesteel, S.D.

Mrs. Rudolph O. Nelson, of Brandon, S.D., remained to spend the week with her sister, Mrs. Irene Carsten. Mr. and Mrs. Mike Glynn, of Belvidere, S.D., stayed for the week with his brother-in-law and sister, Mr. and Mrs. Frank Carsten.

Farm Expenses Climb 5-Fold in Decade

Farm expenses have increased fivefold in the past 10 years, reports the Middle West Soil Committee, of Chicago, Ill., in citing a recent study by Paul Robbins, Purdue university agricultural economist, based on an analysis of operating accounts kept by 600 Indiana farmers.

In the prewar period of 1935-'39, average farm expense was about \$3,000 annually, Robbins stated. In 1950, it averaged about \$15,000. Approximately \$1,000 of this rise occurred in the past 2 years.

While inflation has been a major influence in boosting expenses, an increase in the size of farms has contributed to the rise. The average Indiana farm is now about 35 acres larger than 10 years ago. Capital investment has grown from an average of \$25,000 to \$62,000.

Robbins reports that farmers have seven to eight times more cash invested in equipment than they did 10 years ago. Labor costs have risen steadily, but have been balanced to some extent by increased mechanization of farm work, more efficient use of labor and increased crop yields.

The answer to keeping costs down, says Robbins, depends on building up a sufficient volume of business to support economical farm units.

"Yields per acre will need to be increased," he said, "and perhaps more land operated to create a sufficient volume of business to keep men and machines fully employed."

The middlewest soil improvement committee points out that a cheap way to increase the volume of farm business is by the greater use of fertilizer. Plant food, it says, costs only 50 to 60 per cent more today than it did 10 years ago. Good soil management methods including the use of fertilizer can help boost the average yields of major farm crops from 50 to 10 percent in those states.

State Will Produce Over 5-Million Hogs

Nebraska farmers will produce over 5-million hogs and pigs this year, according to projected estimates of the U.S. department of agriculture, constituting an income of about 130 million dollars. Nebraska produces about 4.6 percent of the nation's total swine crop, which is expected to top 106-million head this year. Hogs rank as the number 2 cash farm crop in this state, bringing in 15 percent of the total farm income. Cattle rate the top spot.

This year's huge hog crop is expected to be the nation's second largest on record. Probably an important factor in the current rise in hog production is the use of antibiotic feed supplements. Reports from farmers in this and other plains states prove that among herds fed an aureomycin-vitamin B12 supplement, mortality is decreased, growth is more rapid and less feed is consumed up to sell-off time.

Nebraska's 1940 hog crop was 16 percent of the state's total farm income, while the 1930 crop brought 28.9 percent of the total.
