the "Extra Something" that pays you more

Only the ALL-CROP Harvester has air blast separation. Between cylinder and strawrack, shelled grain and straw are whirled upward in a high arcing blast of air. Kernels are thrown free from the lighter straw and chaff, separating much of the material even before it reaches the big ten-foot strawrack.

This extra separating action saves more grain, beans and seeds — puts more in the bin and more in your pocket. It's another reason why a New ALL-CROP Harvester brings first on your list for '52.

ALL-CROP is an Allis-Chalmers trade-mark.
