**JOHN DEERE** for Tops in Tillers

Add up the features that assure long-lived tiller satisfaction and you'll find—a John Deere is "tops" in tillers.

Its superiority begins with proper design. The overhead frame places most of the weight above the disk gang for maximum penetration and clearance. Disks are heat-treated to increase their strength; bearings are heavy-duty type, self-aligning for lighter draft.

The convenient power lift raises the disk gangs high and clear. Hydraulic Power-Trol can also be used to make your work easier. Adjustments for leveling, changing the depth of cut, and angling the disk gang to meet varying field and soil conditions, are mighty easy to make.

No matter what the tiller job may be, you'll be completely pleased with the extra-quality . . . the broad adaptability . . . the economy of operation a John Deere offers you. See us soon for complete information.

**LEARN...and LIVE!**

When your boy or girl is old enough to take the wheel of the family car, their chances of becoming a safe driver are three times better today than a few years ago—if they have had the opportunity of becoming a high school-trained driver.

Last year nearly 700,000 students—more than one out of every three eligibles—were enrolled in driver training courses given by 8,000 high schools. There is hope that in the not too distant future every boy and girl will receive driver education before taking the wheel.

How is it working? In one state, a check of 800 trained and 800 untrained drivers after a year's experience revealed that only 100 of the trained ones had run afoul of the law in accidents, violations and warnings. Of the 800 untrained, 769 had some kind of black mark against them. Other state reports confirm this progress through driver education.

Here lies one of the most encouraging answers toward reducing the tragic death and injury toll on our highways. If your community's schools give driver training courses be sure your children enroll before they attempt to drive. If not, find out why your schools do not participate in this vitally needed life-saving training. The cost of driver education to the community is small—the reward great.

Give your children the chance to—Learn and LIVE!

Drive As Though Your Life Depends On It . . . IT DOES!
